preparation oi_ the notes there has been no effort to present 'a complete digest of.corporation cases, nor even to cite them all. I have endeavored rather to notice the latest decisions upon points arising out of the'statutes, thus giving the searcher a clue which will guide him in working back wards to the more ancient precedents. I have amplified most the notes of those Opinions which have been published since the latest editions of the digests. I have thought it best to follow, in a general way, the order of the text in arranging the notes. This has led sometimes to great appar ent abruptness in the collocation of the notes - a result which I could not well avoid. The notes have received care ful attention in the general index, and are thus rendered accessible when they do not appear under the heads where they would perhaps be naturally expected by the reader. The Great Smoky Mountains National Park is one of America's most beautiful and popular national parks. Located in the southern Appalachian Mountains of Tennessee and North Carolina, it is home to more than 100,000 species of plants and animals. The grandeur and sheer scale of the park has been captured in Donald W. Linzey's new book, Natural History Guide to the Great Smoky Mountains National Park. It is the most extensive volume available on the park's natural history. Written from the perspective of a naturalist who has spent over fifty years conducting research in the park, this volume not only discusses the park's plant and animal life but also explores the impact that civilization has played in altering the area's landscape. Linzey, who has been a major contributor to the All Taxa Biodiversity Inventory, a concentrated effort to identify every species of plant and animal living within the park, draws from this deep reservoir of research. His book provides a thorough overview of everything a visitor to the park would need to know, without complex jargon. Both casual readers and those more interested in the ecology of the Great Smoky Mountains will find this book an enlightening and educational guide. Donald W. Linzey, a wildlife biologist and ecologist, is professor of biology at Wytheville Community College in Wytheville, Virginia. He is an authority on the mammals of the Great Smoky Mountains National Park and its environs.
