**Concepts and Controversies in Obsessive-Compulsive Disorder**  
May 25 2020 Few syndromes in psychopathology generate as much popular curiosity and clinical exploration as does obsessive-compulsive disorder (OCD). Since the 1970s, research on OCD has increased exponentially. Specific advances include an improved grasp of the

heterogeneity of the disorder, identification of putative subtyping schemes, and the development of increasingly sophisticated theoretical models of the etiology and maintenance. Perhaps most importantly, research has led to advances in treatment; and where as the first line therapies (cognitive-behavior therapy and serotonergic medication) are not entirely effective for every sufferer, they have transformed OCD from an unmanageable lifetime affliction into a treatable problem that need not reduce quality of life. Despite the aforementioned advances, there have emerged a number of sharp disagreements concerning OCD. Differences have surfaced over phenomenological issues, etiological models, and approaches to treatment, and often occur (but not exclusively) along disciplinary lines between biologically oriented and cognitive-behaviorally oriented authorities. For example, medical approaches posit that abnormal biological processes cause OCD, whereas psychosocial formulations emphasize the role of learning and dysfunctional cognitions. Yet because theoretical conjecture and empirical findings from within each tradition are typically addressed toward distinct and narrow audiences, clinicians, researchers, and students with broad interests are hindered from gaining a clear grasp of the diverse (and sometimes polarized) perspectives.

*Nutrition: Concepts and Controversies* Mar 27 2023 Nourish your mind and body with NUTRITION: CONCEPTS AND CONTROVERSIES. More conversational than a pure-science text, this book explores the essentials of nutrition--including how the body breaks down and uses food, food safety, sports nutrition and special nutritional needs throughout the human life cycle--and asks you to weigh in on relevant debates, such as

world hunger, chronic diseases, dietary guidelines and eating patterns. Available with the MindTap learning platform, the 15th edition also offers self-quizzing and activities to propel your learning from memorization to mastery. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Attention Deficit Hyperactivity Disorder** Apr 04 2021 Compiling the expertise and research of many of the most widely-cited opinion leaders in the field, this reference spans the etiology, assessment, and management of ADHD and covers all the essential data required to care for patients with this disorder including clinical definitions, psychosocial management approaches, medication dosing ranges, and

Essentials of Terrorism Apr 16 2022 Captivating, concise, and accessible, this Fourth Edition of Gus Martin's popular text introduces readers to the modern landscape of terrorism. *Essentials of Terrorism: Concepts and Controversies* covers key foundational topics by defining terrorism and introducing its history and causes, as well as discussing terrorist environments (domestic, international, religious, etc.), tactics, targets, and counterterrorism. The Fourth Edition presents new information regarding homeland security, emerging terrorist movements, gender-selective terrorism, the Internet and terrorism, social networking media and terrorism, religious terrorism, and media coverage of terrorism. It also presents new data, case studies, photos, and maps to show readers the locations of major terrorist activities and the devastation they have caused.

**Controversies and the Metaphysics of Mind** Sep 28 2020 Since ancient times, metaphysical theories have been shaped by the dialectical relations between metaphysical positions. The present book offers a new account of the role of controversies in the evolution of ideas in current metaphysics of mind. Part One develops a pragmatic theory of metaphysical controversies that combines Kantian themes and themes from current argumentation theory. The theory developed in this book underscores the role of a unique type of dialectical arguments which establish metaphysical positions as "controversial relevant alternatives

"in the evolution of "chains of debates" in metaphysics. In Part Two and Part Three, this theory is applied to chains of debates in present day metaphysics of mind which address the problems of consciousness and personal identity. One of the contentions defended in this book is that the intellectual history of metaphysics is not a process in which positions are replaced by opposite positions, but rather, "a history of their status as relevant alternatives." The book analyzes in detail and demonstrates how "progress" in contemporary metaphysics of mind consists in a dialectical process through which challenges to extant positions lead to innovative alternatives that are intrinsically relevant to advancing the understanding of the issues under discussion.

**Nutrition Concepts and Controversies** Sep 09 2021

**Nutrition** Feb 14 2022 In this update of a textbook that has been used in nutrition courses for about 25 years, dietitians (formerly affiliated with Florida State U.) present current information about standard topics in the field. However, the new USDA Food Guide Pyramid was introduced just as this text went to press. Emphasizing healthy lifestyle choices throughout life, the authors also address debates over genetically modified foods and treating global hunger. Chapters contain special features on nutrients, consumer issues, and a list of resources available on the companion CD and student website. Annotation :2005 Book News, Inc., Portland, OR (booknews.com).

**The Rise of Contemporary Spiritualism** Feb 02 2021 Talking to the dead and communication with 'the other side' is often presented as a taboo in an increasingly technological and medically advanced world. However, practices of spiritualism and mediumship continue to remain popular and in high demand within contemporary Western societies. This book analyses the practices of today's mediums, who insist on standing at the threshold between life and death, interpreting signs and passing on communications, and asks how such concepts and practices are perceived by contemporary society. Using first-hand material gathered from alternative fairs, mediumistic congresses, séances, and interviews with both practitioners and clients, as well as thorough textual analysis, Anne Kalvig provides a clear overview of the various forms of consumption of mediumship in Western society and places these within a socio-cultural, religious and historical context. She also raises questions as to the controversies surrounding spiritualism and its representation and relationship with popular culture and the media. This book will be of interest to researchers in the field of sociology, religious studies, folklore, media studies and anthropology as well as to anyone interested in the upsurge of contemporary spiritualism, psychic phenomena and the paranormal.

**The Handbook of Information and Computer Ethics** Mar 03 2021 This handbook provides an accessible overview of the most important issues in information and computer ethics. It covers: foundational issues

and methodological frameworks; theoretical issues affecting property, privacy, anonymity, and security; professional issues and the information-related professions; responsibility issues and risk assessment; regulatory issues and challenges; access and equity issues. Each chapter explains and evaluates the central positions and arguments on the respective issues, and ends with a bibliography that identifies the most important supplements available on the topic.

**Concepts and Controversies in Tidal Marsh Ecology** Oct 10 2021 In 1968 when I forsook horticulture and plant physiology to try, with the help of Sea Grant funds, wetland ecology, it didn't take long to discover a slim volume published in 1959 by the University of Georgia and edited by R. A. Ragotzkie, L. R. Pomeroy, J. M. Teal, and D. C. Scott, entitled "Proceedings of the Salt Marsh Conference" held in 1958 at the Marine Institute, Sapelo Island, Ga. Now forty years later, the Sapelo Island conference has been the major intellectual impetus, and another Sea Grant Program the major backer, of another symposium, the "International Symposium: Concepts and Controversies in Tidal Marsh Ecology". This one re-examines the ideas of that first conference, ideas that stimulated four decades of research and led to major legislation in the United States to conserve coastal wetlands. It is dedicated, appropriately, to two then young scientists - Eugene P. Odum and John M. Teal - whose inspiration has been the starting place for a generation of coastal wetland and estuarine research. I do not mean to suggest that wetland research started at Sapelo Island. In 1899 H. C. Cowles described successional processes in Lake Michigan freshwater marsh ponds. There is a large and valuable early literature about northern bogs, most of it from Europe and the former USSR, although Eville Gorham and R. L. Lindeman made significant contributions to the American literature before 1960. V. J.

**British TV Comedies** Jan 21 2020 This collection offers an overview of British TV comedies, ranging from the beginnings of sitcoms in the 1950s to the current boom of 'Britcoms'. It provides in-depth analyses of major comedies, systematically addressing their generic properties, filmic history, humour politics and cultural impact.

**Varicocele and Male Infertility** Jun 25 2020 This SpringerBrief analyzes varicocele from a novel approach, and provides the reader with a comprehensive view of its scientific and clinical significance. The Brief covers all the important aspects of varicocele related to infertility, from epidemiology to assisted reproduction techniques, contemplating pathophysiology, semen analysis, specialized sperm function tests, and clinical management including all available treatment options from three distinct perspectives, i.e., current concepts, consensus and controversies. Each topic is addressed using the same template, offering the best information from all angles to readers. This SpringerBrief is aimed at both clinicians and scientists involved in the study and care of male and female fertility, and is written by a team of three internationally recognized authors with expertise in andrology and male infertility. The text is the first of its kind, and presents an invaluable tool both for the basic scientists with an interest in reproductive medicine and for clinicians working in the field of infertility.

*American Corrections* Jul 07 2021 *American Corrections: Concepts and Controversies*, by Barry Krisberg, Susan Marchionna, and Chris Hartney, presents an incisive view of every aspect of corrections (including jails, probation, sentencing, prisons, and parole), prompting students to think critically about the complex issues involved in responding to the current crisis in the U.S. correctional system. Incorporating theory, research, and the most recent available data, the book takes a contemporary and issues-oriented approach as it explores the most interesting and progressive developments in correctional policy and practice. Students will come away with practical knowledge, as well as a framework for thoughtful analysis of a subject that can seem mysterious or impenetrable. In addition, the book covers subjects many corrections texts treat only minimally, including women in corrections, the death penalty, and special populations. Perhaps most importantly, the book offers a point of view on what is plaguing the American correctional system and a realistic look at the solutions that offer real promise.

**Making the DSM-5** Oct 22 2022 In 2013, the American Psychiatric Association published the 5th edition of its Diagnostic and Statistical

Manual of Mental Disorders (DSM-5). Often referred to as the "bible" of psychiatry, the manual only classifies mental disorders and does not explain them or guide their treatment. While science should be the basis of any diagnostic system, to date, there is no knowledge on whether most conditions listed in the manual are true diseases. Moreover, in DSM-5 the overall definition of mental disorder is weak, failing to distinguish psychopathology from normality. In spite of all the progress that has been made in neuroscience over the last few decades, the psychiatric community is no closer to understanding the etiology and pathogenesis of mental disorders than it was fifty years ago. In *Making the DSM-5*, prominent experts delve into the debate about psychiatric nosology and examine the conceptual and pragmatic issues underlying the new manual. While retracing the historic controversy over DSM, considering the political context and economic impact of the manual, and focusing on what was revised or left unchanged in the new edition, this timely volume addresses the main concerns of the future of psychiatry and questions whether the DSM legacy can truly improve the specialty and advance its goals.

Contemporary Criminal Law Dec 12 2021 This is a comprehensive, introductory criminal law textbook that expands upon traditional concepts and cases by coverage of the most contemporary topics and issues. Contemporary material, including terrorism, computer crimes, and hate crimes, serves to illuminate the ever-evolving relationship between criminal law, society and the criminal justice system's role in balancing competing interests. The case method is used throughout the book as an effective and creative learning tool. Features include: "vignettes, core concepts, 'Cases and Concepts', 'You Decides, excerpts from state statutes, 'legal equations' and Crime in the News boxes" fully developed end-of-chapter pedagogy includes review questions, legal terminology and 'Criminal Law on the Web' resources" instructor resources (including PowerPoint slides, a computerized testbank and classroom activities) and a Student Study Site accompany this text

**Current Controversies in Epistemology** Jul 27 2020 Epistemology is one of the oldest, yet still one of the most active, areas of philosophical

research today. There currently exists many annotated tomes of primary sources, and a handful of single-authored introductions to the field, but there is no book that captures epistemology's dynamic growth and lively debates for a student audience. In this volume, eight leading philosophers debate four topics central to recent research in epistemology: The A Priori: C. S. I. Jenkins and Michael Devitt The A Posteriori: Richard Fumerton and Nicholas Silins The Regress of Justification: Declan Smithies and Peter Klein Skepticism: Anthony Brueckner and Ernest Sosa Ram Neta's introduction to the volume, descriptions of each chapter, annotated bibliographies for each controversy, and supplemental guide to further controversies in epistemology (with bibliographies) help provide clearer and richer views of active controversies for all readers.

*Drone Warfare* Feb 20 2020 This book provides an introduction to the core concepts, issues and controversies of Drone Warfare. It traces, explains and interrogates how this technology impacted upon decision making, strategy and political choices over countering and killing insurgents, terrorists and potential opponents of the West.

Aging Nov 23 2022 Presenting current research in an innovative format, Harry Moody and Jennifer Sasser's *Aging: Concepts and Controversies* encourages students to become involved and take an informed stand on the major aging issues that we face as a society. Using their extensive expertise, the authors provide a thorough explanation of the issues in the Concepts sections and current research in the Controversy sections, demonstrating the close links between concepts and controversies in these broad areas of aging: health care, socioeconomic trends, and the life course.

**Essential Tremor: Current Concepts and Controversies** Sep 21 2022 Tremors, Volume 163 in the International Review in Neurobiology serial highlights new advances in the field, with this new volume presenting interesting chapters. Each chapter is written by an international board of authors. Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in the International Review on Neurobiology serial Updated release includes

the latest information on Tremors

Handbook of Public Policy Agenda Setting Jan 01 2021 Setting the agenda on agenda setting, this Handbook explores how and why private matters become public issues and occasionally government priorities. It provides a comprehensive overview and analysis of the perspectives, individuals, and institutions involved in setting the government's agenda at subnational, national, and international levels. Drawing on contributions from leading academics across the world, this Handbook is split into five distinct parts. Part one sets public policy agenda setting in its historical context, devoting chapters to more in-depth studies of the main individual scholars and their works. Part two offers an extensive examination of the theoretical development, whilst part three provides a comprehensive look at the various institutional dimensions. Part four reviews the literature on sub-national, national and international governance levels. Finally, part five offers innovative coverage on agenda setting during crises.

*Madness* Jan 13 2022 *Madness: History, Concepts and Controversies* provides a comprehensive and critical analysis of current perspectives on mental illness and how they have been shaped by historical trends and dominant sociocultural paradigms. From its representation among world religions and wider folkloric myth, to early attempts to rationalize and treat symptoms of mental disorder, this book outlines the principle contemporary models of understanding mental health and situates them within a wider historical and social context. The authors consider a variety of current controversies within the mental health arena and provide numerous pedagogical features to allow students the opportunity to understand and engage in current issues and debates relating to psychological disorders. By discussing key issues such as the social construction of mental illness, this text provides an essential overview of how societies and science has understood mental illness, and will appeal to students, researchers and general readers alike.

Crime and Criminal Justice Mar 15 2022 "The text is logically organized and easy to read and understand. Students will find the text intriguing as they move through the coverage of the controversies from the text."—Michelle L. Foster, Kent State University Updated with new

content and current controversies that facilitate critical thinking, debate, and application of the concepts, Mallicoat's Crime and Criminal Justice, Second Edition, provides accessible and concise coverage of all relevant aspects of the criminal justice system, as well as unique chapters on victims and criminal justice policy. Using an innovative format designed to increase student engagement and critical thinking, each chapter is followed by two Current Controversy debates that dive into a critical issue in criminal justice. These features challenge misconceptions by providing a balanced debate of both the pros and the cons of each issue and are followed by probing questions to help students think critically about timely topics. With contemporary examples that students can easily apply and a broad range of effective learning tools, this practical text helps students go beyond the surface toward a deeper understanding of the criminal justice system. This title is accompanied by a complete teaching and learning package. Contact your SAGE representative to request a demo. Access this week's topic.

**Aging** Feb 26 2023 Presenting current research in an innovative text-reader format, *Aging: Concepts and Controversies*, Ninth Edition

encourages students to become involved and take an informed stand on the major aging issues we face as a society. Not simply a summary of research literature, Harry R. Moody and Jennifer R. Sasser's text focuses on controversies and questions, rather than on assimilating facts or arriving at a single "correct" view about aging and older people. Drawing on their extensive expertise, the authors first provide an overview of aging in three domains: aging over the life course, health care, and the socioeconomic aspects of aging. Each section is followed by a series of edited readings, offering different perspectives from experts and specialists on that subject. New readings focus on whether current federal spending on the elderly is sustainable and fair to other groups, how older consumers are reshaping the business landscape, and the challenges of marketing and selling to customers 60 and over. More emphasis is placed on how social class and inequality earlier in life can shape our final years and the number of older Americans living in poverty. The section on Aging and Health Care has been thoroughly updated to reflect the latest data about chronic diseases that affect the elderly, government spending on health care, and policy changes to programs like Medicaid and Medicare. The section on the Social and Economic Outlook for an Aging Society gives the most current picture of the racial and ethnic diversity of older Americans, their participation in the labor force, and their income and wealth.

*Advertising to Children* Dec 20 2019 Advertising to Children stimulates and informs the debate on the ethics and effectiveness of marketing to children. The research tackles a wide range of issues including smoking and alcohol consumption.

**Statistics Achieve, 2-term Access Card** Apr 23 2020

**Nutrition** Aug 08 2021 Pre-packaged with a laminated supplement including updates for Dietary Guidelines for Americans, 2010, and Healthy People 2020, NUTRITION: CONCEPTS AND CONTROVERSIES UPDATE provides practical applications and accessible explanations to dispel common misconceptions about nutrition and empower readers to make lasting behavior changes.

*Madness* Nov 30 2020 This important book provides an engaging, critical

overview of the social, political and cultures filters through mental illness has been understood through the ages.
