The First English Explorer Nov 09 2021 The first real explorer, for the English, was Anthony Jenkinson. He sailed to Russia and set out into the unknown to discover an overland route, right across Asia. His detailed reports and his map were a revelation for the Tudors. In 1557 Anthony Jenkinson was sent by the merchants of London to find an overland route right across Asia to Cathay and the riches of the Orient, setting off a year before Queen Elizabeth I came to the throne. His expedition to the east took place some twenty nine years earlier than the first English expedition to the west. As well as surviving storms, Jenkinson was faced with thieving, illness and several attacks by bandits, before eventually, by sheer persistence, reaching Bokhara, which is now in Uzbekistan. He had completed two thirds of the journey and had reached the 'Silk Road' that led to Cambaluc (Beijing), before finding that he could go no further because the route ahead was closed by continuous wars. In later expeditions, he travelled to Persia where he nearly had his head

off and he also went to Moscow where he managed some extensive negotiations with Tsar Ivan the Terrible on behalf of the Muscovy Company. His reports back to the Company in London us a great insight into what Russia was like at the time, and T and Persia. 'This book is a lively and carefully researched study Anthony Jenkinson,' – Sir Ranulph Fiennes, Bt, OBE 'This important book fills an undoubted gap in the history of English travellers sixteenth century,' – Professor David Loades, FSA, Emeritus Professor of History at the University of Wales The First English Explorer will appeal to fans of history, particularly those with a strong interest in explorers and eastern travel.

Journeys on the Silk Road
Feb 24 2023 When a Chinese monk brought a scroll into a hidden cave in 1900, he uncovered one of the world's greatest literary secrets: a time capsule from the ancient Silk Road. Inside, scrolls were piled from floor to ceiling, undisturbed for a thousand years. The gem within was the Diamond Sutra of AD 868. This Buddhist teaching, made 500 years before Gutenberg inked his press, is the world's oldest printed book. The Silk Road once linked China with the Mediterranean. It conveyed merchants, pilgrims and ideas. But its cultures and oases were swallowed by shifting sands. Thanks to the Silk Road's rediscovery was a man named Aurel Stein, a Hungarian-born scholar and archaeologist employed by the British

service. Undaunted by the vast Gobi Desert, Stein crossed thousands of desolate miles with his fox terrier Dash. Stein met the Chinese monk and secured the Diamond Sutra and much more. The scrupulous journey—by camel through arid desert, by boat to London’s curious scholars, by train to evade the bombs of World War II—merges the explorer’s adventures, political intrigue, and continued controversy. The Diamond Sutra has inspired Jack Kerouac and the Dalai Lama. Its journey has coincided with the growing appeal of Buddhism in the West. As the Gutenberg Age cedes to the Google Age, the survival of the Silk Road’s greatest treasure is testament to the endurance of the written word.
