In the context of a plateau in the development of new methodologies for using nuclear magnetic resonance to investigate the structure of macromolecules, 21 lectures and ensuing discussions, and three panel discussions evaluate the status of the field and the directions it might take. The keynote address discusses the possibilities and limitations of NMR studies of the intramolecular dynamics of biomolecules. Among the other topics are proteins involved in cell adhesion processes, incorporating motional properties into the interpretation of three-dimensional solution structures, the accurate measurement of internuclear distances by suppressing spin diffusion, and flexible molecules. We all watched Terri Schiavo die. The controversy around her case dominated the headlines and talk shows, going all the way to the U.S. Supreme Court, the White House, and the Vatican. And it's not over yet. Despite her death, the controversy lingers. In *Silent Witness*, former LAPD detective and New York Times bestselling author Mark Fuhrman applies his highly respected investigative skills to examine the medical evidence, legal case files, and police records. With the complete cooperation of Terri Schiavo's parents and siblings, as well as their medical and legal advisers, he conducts exclusive interviews with forensics experts and crucial witnesses, including friends, family members, and caregivers. Fuhrman's findings will answer these questions: What was Terri and Michael Schiavo's marriage really like? What happened the

day Terri collapsed? What did Michael Schiavo do when he discovered Terri unconscious? How long did he wait before calling 911? What do medical records show about her condition when she was first admitted to the hospital? What will the autopsy say? The legal issues and ethical questions provoked by Terri Schiavo's extraordinary case may never be resolved. But the facts about her marriage, her condition when she collapsed, and her eventual death fifteen years later can be determined. With *Silent Witness*, Fuhrman goes beyond the legal aspects of the case and delves into the broader, human background of Terri Schiavo's short, sad life. Our English classrooms are often only as vibrant as the literature that we teach. This book explores the writing of African American author Ralph Ellison, who offers readers and students engaging fiction and non-fiction that confront the reader and the world. Here, teachers will find an introduction to Ellison's works and an opportunity to explore how to bring them into the classroom as a part of the reading and writing curriculum. This book attempts to confront what we teach and how we teach as instructors of literature through the vivid texts Ellison offers his readers. Harness the power of Linux to create versatile and robust embedded solutions

About This Book Create efficient and secure embedded devices using Linux Minimize project costs by using open source tools and programs Explore each component technology in depth, using sample implementations as a guide Who This Book Is For This book is ideal for Linux developers and system programmers who are already familiar with embedded systems and who want to know how to create best-in-class devices. A basic understanding of C programming and experience with systems programming is needed. What You Will Learn Understand the role of the Linux kernel and select an appropriate role for your application Use Buildroot and Yocto to create embedded Linux systems quickly and efficiently Create customized bootloaders using U-Boot Employ perf and ftrace to identify performance bottlenecks Understand device trees and make changes to accommodate new hardware on your device Write applications that interact with Linux device drivers Design and write multi-threaded

applications using POSIX threads Measure real-time latencies and tune the Linux kernel to minimize them In Detail Mastering Embedded Linux Programming takes you through the product cycle and gives you an in-depth description of the components and options that are available at each stage. You will begin by learning about toolchains, bootloaders, the Linux kernel, and how to configure a root filesystem to create a basic working device. You will then learn how to use the two most commonly used build systems, Buildroot and Yocto, to speed up and simplify the development process. Building on this solid base, the next section considers how to make best use of raw NAND/NOR flash memory and managed flash eMMC chips, including mechanisms for increasing the lifetime of the devices and to perform reliable in-field updates. Next, you need to consider what techniques are best suited to writing applications for your device. We will then see how functions are split between processes and the usage of POSIX threads, which have a big impact on the responsiveness and performance of the final device The closing sections look at the techniques available to developers for profiling and tracing applications and kernel code using perf and ftrace. Style and approach This book is an easy-to-follow and pragmatic guide consisting of an in-depth analysis of the implementation of embedded devices. Each topic has a logical approach to it; this coupled with hints and best practices helps you understand embedded Linux better. If you are a software developer or administrator who wishes to create simple, reusable environments using Vagrant, this book is the perfect choice for you. Whether you are a system administrator with extensive experience in virtualization or a developer wishing to create development scripts for cloud deployment, you will find easy-to-follow recipes and techniques in this book that will allow you to create robust and reproducible virtual environments. This collection portrays characters from the margins of society--knee-deep in a marsh waiting for a greenwing teal or dodging a holdup at an all-night grocery Profiles the 1975 murder of Martha Moxley, presents new evidence that points the finger of suspicion to Martha's neighbors, and discusses how the police mishandled the case and may have prevented the crime from being solved. An anthology of essays examining the nature and practice of sexual masochism The contested psychoanalytic concept of masochism has served to open up pathways into less-explored regions of the human mind and behavior. Here, rituals of pain and sexual abusiveness prevail, and sometimes gruesome details of unconscious fantasies are constructed out of psychological pain, desperate need, and sexually excited, self- destructive violence. In this significant addition to the Essential Papers in Psychoanalysis series, Margaret Ann Fitzpatrick Hanly presents an anthology of the most outstanding writings in the psychoanalytic study of masochism. In bringing these essays together, Dr. Fitzpatrick Hanly expertly combines classic and contemporary theories by the most respected scholars in the field to create a varied and integrated volume. This collection features papers by S. Nacht, R. Loewenstein, Victor Smirnoff, Sigmund Freud, Jacques Laplanche, Robert Bak, Leonard Shengold, K. Novick, J. Novick, S. Coen, Margaret Brenman, Esther Menaker, S. Lorand, M. Balint, Bernhard Berliner, Charles Brenner, Helene Deutsch, Annie Reich, Marie Bonaparte, Jessica Benjamin, S.L. Olinick, Arnold Modell, Betty Joseph, and Janine Chasseguet-Smirgel. First Published in 1997. Routledge is an imprint of Taylor & Francis, an informa company. For audiences of the popular FX television series *The People v. O.J. Simpson: American Crime Story*, based on Jeffrey Toobin's *The Run of His Life* and starring Cuba Gooding, Jr., John Travolta, David Schwimmer, and Courtney B. Vance. Named on *Vogue Magazine's "American Crime Story Reading List"* as one of the "eight definitive books on the trial of the century." Twenty years ago, America was captivated by the awful drama of the O.J. Simpson trial. The Simpson "Dream Team" legal defense had a seemingly impossible task: convincing a jury that their client was innocent of the murders of Nicole Brown Simpson and Ron Goldman. In order for O.J. Simpson to get away with murder, the defense attorneys had to destroy the

reputation of Mark Fuhrman, a brilliant Los Angeles detective who was the lead on the murder scene and had collected overwhelming physical evidence against Simpson. Now Fuhrman tells his side of the story in the #1 New York Times bestseller *Murder in Brentwood*, a damning exposé that reveals why and how Simpson's prosecution was bungled. Fuhrman offers a sincere mea culpa for allowing his personal mistakes to become a focal point of the defense's strategy but also stands by the evidence he collected, writing: "One thing I will not apologize for is my policework on the O.J. Simpson case." With Fuhrman's own hand-drawn maps of the crime scene, his reconstruction of the murders, and interrogation transcripts, *Murder in Brentwood* is the book that sets the record straight about what really happened on June 12, 1994—and reveals why the O.J. Simpson trial was such a catastrophe.

In *Healing after Parent Loss in Childhood and Adolescence: Therapeutic Interventions and Theoretical Considerations*, experts explore the varied, often complex, and always tragic circumstances under which young people face losing a parent. Profound grief and feelings of powerlessness may accompany loss of a parent at any age, but distinctly so when such loss is experienced during formative years. Whenever these individuals seek help, therapists must be psychically prepared to enter into arenas of trauma, bereavement, and mourning. The children, teens, and adults presented are diverse in age, culture/ethnicity, and socioeconomic status. A diverse group of contributors showcase a wide range of effective approaches—from traditionally structured short- and long-term psychotherapies and psychoanalysis, to psycho-educational, supportive, and preventive interventions. The writers in this volume do not shy away from tough matters such as urban violence, AIDS, and war; they address concerns practicing clinicians face, such as when to work with children, adolescents, and adults individually, and when and how to involve their surviving parents and families. Included in this book are issues related to the self-care and professional development needs of therapists who take on this difficult but essential work, including peer support and supervision. This volume is likely to spark important re-examinations across all fields of mental health practice. It will equip and empower clinicians of all kinds who undertake work with those who are grieving. *Healing after Parent Loss in Childhood and Adolescence* promises to be a vital and stimulating read for supervisors, teachers, and trainers of child, adolescent, and family clinicians.

On November 22, 1963, a murder was committed in Dallas, Texas. Nearly 80 percent of the American people don't believe the victim was killed by a lone gunman. The House Assassinations Committee determined it

was the work of "a conspiracy," yet no conspirators were ever identified or brought to justice. For more than forty years the case has remained unsolved—until now. Mark Fuhrman has cracked some of the best-known, most puzzling crimes in American history. In *A Simple Act of Murder*, he investigates the tragedy that rocked a nation: the assassination of President John F. Kennedy. Cutting through the myths and misinformation, Fuhrman focuses on the hard evidence, unveiling a major clue that was ignored for more than four decades—a breakthrough that will change the ongoing debate forever. Once you read this book, you'll know definitively who killed JFK.

South Carolina Baptist Richard Furman (1755-1825) personified a host of seeming contradictions. As a Regular Baptist baptized by a Separate Baptist, an ardent patriot with puritan sensibilities, a Federalist who zealously defended religious liberty, and a slave-owning aristocrat who associated with backwoods revivalists, Furman is a complex figure in American history. His doctrine of atonement exhibited this same complexity, as he uniquely held to both a penal substitutionary theory of the atonement as well as to a moral governmental view, models of the atonement that were often conceived as mutually exclusive in the nineteenth century. Furman was the first of his American Baptist kind to attempt to integrate these two models. As a Baptist standing at the political, cultural, and theological crossroads of America, Furman blended Edwardsean and confessional Calvinism, Regular and Separate Baptist traditions, and a host of other elements into his theology, laying the groundwork for an entire generation of Southern Baptists who followed in his theological footsteps. Swidler's memoir is filled with insights on this transformative period of U.S. history and includes anecdotes about key historical figures, among them David E. Lilienthal, Harold Ickes, Lyndon B. Johnson, John F. Kennedy, and Nelson Rockefeller."--BOOK JACKET. As a traveling evangelist, advocate of religious freedom, leader of the patriot cause, minister, and educator, Richard Furman became an important figure in American religious history and a potent political force in South Carolina. The only book-length treatment of the Baptist scholar and minister. Published at the 100th Anniversary of General Motors, featuring the photography of iconic classic car photographer Michael Furman, and lively, entertaining essays by America's most distinguished classic car historians and journalists. Focuses on seven contemporary Jewish American writers, relating to topics such as the Orthodox way of life, interest in pre-Holocaust Europe, Israel, Jewish feminism, and the Holocaust. Ch. 3 (pp. 40-57), "The (Mischievous) Theological Imagination of Melvin Jules Bukiet, " explores the viability of a meaningful Jewish identity in a post-Holocaust world in works set in pre-Holocaust Poland, in postwar Europe, and in the U.S. today. Bukiet's "After" (1996) is a controversial, ironic work that deals with anti-heroic Holocaust survivors and their impious attempts to engage the post-Holocaust theological crisis. Ch. 4 (pp. 58-81), "Thane Rosenbaum's 'Elijah Visible': Jewish American Fiction, the Holocaust, and the Double Bind of the Second-Generation Witness, " is another version of an essay that appeared in "The Americanization of the Holocaust" (1999). Rosenbaum presents American children of Holocaust survivors suffering from the ghosts of their parents' experiences in Europe.

"Writer Caroline Lockhart (1871-1962) lived a life as colorfully picaresque and as successful as any of her bestselling Western adventure novels or her widely quoted newspaper column. Her popular novels, championing the region and the Old West culture of which she became a part, were compared favorably to those of Owen Wister, and one,

The Fighting Shepherdess, was made into a movie. She also attracted national attention as the owner-editor of the Cody Enterprise. H. L. Mencken praised her outspokenness as an investigative reporter and as a critic of Prohibition, and Christopher Morley borrowed her witticisms verbatim for his column in the New York Post. Lockhart's devilishly honest humor, he said, could "make the human lung crow like Chanticleer." Although her writings are little known today, Lockhart left a body of work that reveals her to be a first-class interpreter of the West in a time of economic and social transition." "Necah Stewart Furman's informative and compelling literary biography intersperses a lively chronicling of Lockhart's life with an objective and probing analysis of her books, short stories, and articles. Furman has made thorough and judicious use of newspapers, interviews, and manuscripts, including personal correspondence and diaries, to detail the western sojourns, the civic controversies, the love affairs, and the real-life adventures that honed Lockhart's point of view and formed the basis of her fiction. From her Kansas childhood, to her early success as a reporter in Boston and Philadelphia, to the excitement of "making it big" as a writer-journalist, civic leader, and rancher based mainly in Cody, Wyoming, a remarkable portrait emerges of a woman who broke conventions and made her own mark not only in a frontier setting but in a primarily masculine literary genre."--BOOK JACKET.

After a curious courtship, an innocent orphan marries Willard, a man with money, taste, and experience. When he abandons her and their two daughters, Sadie raises her girls and waits for him to return. "Beyond Yiddishkeit deals in an intelligent and perceptive way with the issue of Jewish identity in an affluent and highly educated suburban community. Particularly significant is that it relies upon participant observation, as well as ethnographic interview techniques and data, on the part of the author. In this way, the work constitutes the first major study of this type conducted within the liberal Jewish American community. As such, it is a "pioneering" work. Equally impressive is the author's command of the sociological literature on issues of identity and her ability to apply it to the data gathered in this study. She makes sociological jargon intelligible and presents an easily-read and well-constructed book. Her ability throughout the work to focus on issues of modernity is insightful and brilliant. I found myself racing through the book and, indeed, read it in one sitting. This really is an unparalleled work in this field." -- David Ellenson, Hebrew Union College Jewish Institute of Religion

If you are a system administrator or Linux professional who wants to learn to set up, install, and manage OpenVZ containers on a server to implement OS-level virtualization, then this book is for you. Along with elementary

knowledge of Linux programming, you need to have a conceptual understanding of system components and functions. A collection of the most significant contributions to psychoanalytic and psychological understanding of the effect of object loss on adults and children. Annotation copyright by Book News, Inc., Portland, OR The president of Furman University reflects on a variety of subjects. Recognizing the wide-spread need for community today, Merz and Furman consider its importance for schools, how reforms attempt to create community in schools, how other reforms attempt to build relationships between schools and external communities, and finally how schools might be more successful in building and maintaining strong personal relationships. The authors use classical sociological writings, as well as modern communitarian and feminist thought to develop a theory of community. They examine what kinds of communities are possible today, and which naive notions are apt to lead to nostalgia and failure. They point out that many current attempts at community building are counterproductive and lead to greater isolation and impersonal bureaucracy. They reveal many paradoxes in the current reform movement, particularly attempts at systemic reform which can have many unintended and frustrating consequences. Finally, based on their theory and an examination of a number of real schools, Merz and Furman give concrete suggestions for better school communities.
