Raising awareness of human indifference and cruelty toward animals, *The Global Guide to Animal Protection* includes more than 180 introductory articles that survey the extent of worldwide human exploitation of animals from a variety of perspectives. In addition to entries on often disturbing examples of human cruelty toward animals, the book provides inspiring accounts of attempts by courageous individuals--including Jane Goodall, Shirley McGreal,

Birute Mary Galdikas, Richard D. Ryder, and Roger Fouts--to challenge and change exploitative practices. As concern for animals and their welfare grows, this volume will be an indispensable aid to general readers, activists, scholars, and students interested in developing a keener awareness of cruelty to animals and considering avenues for reform. Also included is a special foreword by Archbishop Desmond Tutu, urging readers to seek justice and protection for all creatures, humans and animals alike. Illustrated guide to the crucial Italian philosopher and author of *The Prince*. 'Machiavellian' is a popular byword for treachery and opportunism. Machiavelli's classic book on statecraft, *The Prince*, published over 400 years ago, remains controversial to this day because of its electrifying frankness as a practical guide to power. Is it a how-to manual for dictators, a cynical philosophy of 'the end justifies the means', or a more complex and subtle analysis of successful government? Machiavelli was a loyal servant of the Florentine republic. His opposition to Medici despotism led him to torture on the rack and exile, and yet he chose as his model for the Prince the most notorious tyrant, Cesare Borgia. *Introducing Machiavelli* traces the colourful life of this paradoxical realist whose clear-sighted patriotism made him the first truly modern political scientist. Machiavelli is seen as central to the postmodern debate on Civil Society. This book brings the creative turbulence of Renaissance Italy to life, and presents a compelling portrait of a key figure of European political history. *The Volkswagen Rabbit, Jetta (A1) Diesel Service Manual: 1977-1984* covers 1977 through 1984 models with diesel engines, including those built on the "A1" platform. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned

communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom. Logic is the backbone of Western civilization, holding together its systems of philosophy, science and law. Yet despite logic's widely acknowledged importance, it remains an unbroken seal for many, due to its heavy use of jargon and mathematical symbolism. This book follows the historical development of logic, explains the symbols and methods involved and explores the philosophical issues surrounding the topic in an easy-to-follow and friendly manner. It will take you through the influence of logic on scientific method and the various sciences from physics to psychology, and will show you why computers and digital technology are just another case of logic in action. Longlisted for the 2015 Man Booker Prize *The Illuminations*, the fifth novel from Andrew O'Hagan, a writer "of astonishingly assured gifts" (*The New York Times Book Review*), is a work of deeply charged beauty--and one that demonstrates, with poignancy and power, that no matter how we look at it, there is no such thing as an ordinary life. Anne Quirk's life is built on stories--the lies she was told by the man she loved and the fictions she told herself to survive. Nobody remembers Anne now, but in her youth she was an artistic pioneer, a creator of groundbreaking documentary photographs. Her beloved grandson Luke, a captain with the Royal West Fusiliers in the British army, has inherited her habit of transforming reality. When his mission in Afghanistan goes horribly wrong, he returns to Scotland, where the secrets that have shaped his family begin to emerge. He and Anne set out to confront a mystery from her past among the Blackpool Illuminations--the dazzling lights that brighten the seaside town as the season turns to winter. Rabbit has become a paunchy conservative in 1969's lurid and confused America. *The Volkswagen Rabbit, GTI Service*

For a quarter century, more than a million readers—scribes and scribblers of all ages and abilities—have been inspired by Anne Lamott's hilarious, big-hearted, homespun advice. Advice that begins with the simple words of wisdom passed down from Anne's father—also a writer—in the iconic passage that gives the book its title: “Thirty years ago my older brother, who was ten years old at the time, was trying to get a report on birds written that he'd had three months to write. It was due the next day. We were out at our family cabin in Bolinas, and he was at the kitchen table close to tears, surrounded by binder paper and pencils and unopened books on birds, immobilized by the hugeness of the task ahead. Then my

father sat down beside him, put his arm around my brother ' s shoulder, and said, ' Bird by bird, buddy. Just take it bird by bird. ' ”

The final section is devoted to dental disease and abscessation, including the techniques required for a full dental examination and evaluation. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity.
