Health Care Reform and American Politics Jan 24 2023 The Patient Protection and Affordable Care Act signed by President Obama in March 2010 is a landmark in U.S. social legislation, and the Supreme Court's recent decision upholding the Act has ensured that it will remain the law of the land. The new law extends health insurance to nearly all Americans, fulfilling a century-long quest and bringing the United States to parity with other industrial nations. Affordable Care aims to control rapidly rising health care costs and promises to make the United States more equal, reversing four decades of rising disparities between the very rich and everyone else. Millions of people of modest means will gain new benefits and protections from insurance company abuses - and the tab will be paid by privileged corporations and the very rich. How did such a bold reform effort pass in a polity wracked by partisan divisions and intense lobbying by special interests? What does Affordable Care mean-and what comes next? In this updated edition of *Health Care Reform and American Politics: What Everyone Needs to Know*®, Lawrence R. Jacobs and Theda Skocpol-two of the nation's leading experts on politics and health care policy-provide a concise and accessible overview. They explain the political battles of 2009 and 2010, highlighting White House strategies, the deals Democrats cut with interest groups, and the impact of agitation by Tea Partiers and progressives. Jacobs and Skocpol spell out what the new law can do for everyday Americans, what it will cost, and who will pay. In a new section, they also analyze the impact the Supreme Court ruling that upheld the law. Above all, they explain what comes next, as critical yet often behind-the-scenes battles rage over implementing reform nationally and in the fifty states. Affordable Care still faces challenges at the state level despite the Court ruling. But, like Social Security and Medicare, it could also gain strength and popularity as the majority of Americans learn what it can do for them. *What Everyone Needs to Know*® is a registered trademark of Oxford University Press.

Health Disparities Apr 03 2021 This uniquely accessible volume challenges professionals to understand—and help correct—health disparities, both at the patient level and in their larger social contexts. Dedicated to eradicating this ongoing injustice, contributors focus on marginalized populations, the role of healthcare systems in perpetuating inequities, the need for deeper engagement and listening by professionals, and the need for advocacy within professional education and the political/policy arena. The compelling case narratives at the core of the book illustrate the interrelated biopsychosocial components of patients' health problems and the gradations of learning needed for practitioners to address them effectively. The book's tools for developing a health disparities curriculum include a selection of workshop exercises, facilitator resources, and a brief guide to writing effective case narratives. A sampling of the narratives: "Finding the Person in Patient-Centered Health Care" (race/ethnicity/culture). "The Annual Big Girl / Big Boy Exchange" (gender). "Just Give Me Narcan and Let Me Go" (poverty/addiction). "Everyone Called Him Crazy" (immigration). "Adrift in the System" (disability). "Aging out of Pediatrics" (mental illness and stigma). "Time to Leave" (LGBT) A work of profound compassion, *Health Disparities* will be of considerable interest to researchers and practitioners interested in public health, population health, health disparities, and related fields such as sociology, social work, and narrative medicine. Its wealth of educational features also makes it a quality training text. "I was impressed when I read *Health Disparities: Weaving a New Understanding through Case Narratives*. As a patient who has experienced unpleasant situations in health care, I was moved to see that it was emotional and personal for the writers. The book confirms for me that the time is now for change to take place in our health care systems. I see this book as a light that can shine bright in the darkest places of health care. The editors have assembled a powerful book that provides all health professionals with specific steps they can take towards addressing and then eventually eliminating health disparities. A few steps that I really connected with were improving critical awareness, delivering quality care, listening and empathizing with patients and families, and advocating for changes. I recommend that anyone interested in working to improve health care obtain a copy of this book—it's filled with useful information that every medical professional should know. The book reminds me of a quote by Wayne Dyer, 'When you change the way you look at things, the things you look at change.'" -Delores Collins, Founder and Executive Director, A Vision of Change Incorporated, Certified Community Health Worker. Food Politics Feb 13 2022 We all witness, in advertising and on supermarket shelves, the fierce competition for our food dollars. In this engrossing exposé, Marion Nestle goes behind the scenes to reveal how the competition really works and how it affects our health. The abundance of food in the United States—enough calories to meet the needs of every man, woman, and child twice over—has a downside. Our over-efficient food industry must do everything possible to persuade people to eat more—more food, more often, and in larger portions—no matter what it does to waistlines or well-being. Like manufacturing cigarettes or building weapons, making food is big business. Food companies in 2000 generated nearly \$900 billion in sales. They have stakeholders to please, shareholders to satisfy, and government regulations to deal with. It is nevertheless shocking to learn precisely how food companies lobby officials, co-opt experts, and expand sales by marketing to children, members of minority groups, and people in developing countries. We learn that the food industry plays politics as well as or better than other industries, not least because so much of its activity takes place outside the public view. Editor of the 1988 Surgeon General's Report on Nutrition and Health, Nestle is uniquely qualified to lead us through the maze of food industry interests and influences. She vividly illustrates food politics in action: watered-down government dietary advice, schools pushing soft drinks, diet supplements promoted as if they were First Amendment rights. When it comes to the mass production and consumption of

food, strategic decisions are driven by economics--not science, not common sense, and certainly not health. No wonder most of us are thoroughly confused about what to eat to stay healthy. An accessible and balanced account, Food Politics will forever change the way we respond to food industry marketing practices. By explaining how much the food industry influences government nutrition policies and how cleverly it links its interests to those of nutrition experts, this path-breaking book helps us understand more clearly than ever before what we eat and why.
