A helpful, engaging guide to the revision of scholarly writing by an editor and award-winning author "Pamela Haag has been called 'the tenure whisperer' for good reason. Any scholar who hopes to attract a wider audience of readers will benefit from the brilliant, step-by-step guidance shared here. It's pure gold for all aspiring nonfiction writers." --Nancy MacLean, author of Democracy in Chains: The Deep History of the Radical

Right's Stealth Plan for America Writing and revision are two different skills. Many scholar-writers have learned something about how to write, but fewer know how to read and revise their own writing, spot editorial issues, and transform a draft from passable to great. Drawing on before and after examples from more than a decade as a developmental editor of scholarly works, Pamela Haag tackles the most common challenges of scholarly writing. This book is packed with practical, user-friendly advice and is written with warmth, humor, sympathy, and flair. With an inspiring passion for natural language, Haag demonstrates how to reconcile clarity with intellectual complexity. Designed to be an in-the-trenches desktop reference, this indispensable resource can help scholars develop a productive self-editing habit, advise their graduate and other students on style, and, ultimately, get their work published and praised. Send students into their exam with the confidence to aim for their best with this formula for effective and structured revision including guidance that helps students practice vocabulary, grammar and all four skills. - Enable students to avoid misconceptions with common mistakes highlighted throughout - Build students' vocabulary and grammar knowledge with recaps for each topic - Develop students' reading, listening, speaking and writing skills through short questions for every topic - Allow students to identify areas for improvement with sample answers and

Written by experts and covering all key topics,
Concentrate guides go above and beyond, not only
consolidating your learning but focusing your revision
and maximising your exam performance. Each guide
includes revision tips, advice on how to achieve extra
marks, and a thorough and focused breakdown of the key
topics and cases. Revision guides you can rely on: trusted
by lecturers, loved by students... "I am hugely impressed
by this little textbook on the substance: it does a better
and clearer job at explaining key issues than many of the
core texts. - Dr Eleni Frantziou, Associate Professor in
Public Law & Human Rights, Durham University "The
Concentrate books are my favourite revision guides as the
quality of the information is always more comprehensive
than others." Carly Hatchard, law student, University of
Bolton "This revision guide is excellent ... I would
certainly recommend it as a revision aid" - Claudia Carr,
Principal Lecturer, Hertfordshire Law School, University
of Hertfordshire "The Concentrate structure is extremely

good, it makes it so much easier to revise ... no key information is left out, it's a great series." Emma Wainwright, law student, Oxford Brookes University "A really good overview of the key themes, tensions, and debates ... encourages students to go that bit further to increase their chances of scoring better in the assessment."

- Professor Nicola Glover-Thomas, Professor of Law, University of Manchester "I have always used OUP revision and Q&A books and genuinely believe they have helped me get better grades" - Anthony Poole, law student, Swansea University "Undoubtedly a good resource ... I would certainly recommend it as additional material for modules assessed by examination." - Dr Ben Stanford, School of Law, Liverpool John Moores University "The detail in this revision textbook is phenomenal and is just what is needed to push your exam preparation to the next level" - Stephanie Lomas, law student, University of Central Lancashire

The OCR A Level Chemistry A Revision Guide provides comprehensive, specification-matched content, packed with engaging revision and practice material to keep you focused. It also

contains a wealth of exam-style questions to test your knowledge and skills to help you fully prepare for the exams. This resource is a brief, easy to follow set of revision questions taking you through the 3 areas of study for GCSE Medicine Through Time. The book is divided into Disease, Surgery and Public Health and asks revision questions with relevant answers to help prepare students for examination. The format is designed to allow for effective self-study or for use with a parent or friend to test exam readiness. Ever read up on a subject in a medical textbook, remembered it well immediately after, but several weeks later had great difficulty in recalling anything about it? Or, when treating a patient with an asthma attack, you wondered, 'Have I missed something important?' Memorizing Medicine aims to address these commonly experienced sentiments by rewriting the traditional medical textbook in a manner that places primary emphasis on recall. Drawing upon well-established psychological principles, the book uses a broad range of strategies to maximize the ability of the reader to recollect large swathes of information at a later date. The result is an original and refreshing style of textbook in which no two pages are quite alike, and where facts are presented in a hierarchical fashion so that essential features of each condition or symptom can be grasped immediately, while finer points are given in more detailed reading. Each of the main topics in general

medicine is presented as a mini-tutorial, using cartoons, hierarchies, and mnemonics, thus breaking down dense text into 'bite-size' chunks and creating a framework for effective learning, whether for clinical practice or taking exams. The mnemonics themselves have been devised to be relevant to the topic - the causes of atrial fibrillation follow a form of A.T.R.I.A.L. S.W.I.T.C.H.; the various causes of liver disease are T.A.B.O.O.S. Memorizing Medicine can be used as a general medical textbook in its own right, or may be used as a bridge between standard textbooks and self-test revision guides. It is an invaluable revision aid and is equally suitable for undergraduate and postgraduate medical exams, as well as for any practising physician who wishes to refresh their knowledge. GCSE Maths OCR Revision Guide (with online edition) - Higher This is a concise revision guide to the core basic sciences for all surgical trainees preparing for Part A of the Intercollegiate MRCS examination. Covering anatomy, physiology and pathology it has been written in a style to facilitate easy learning of the essential facts, with indications of both their clinical relevance and importance. This book concentrates on those topics which tend to be recurring examination themes for initial surgical training. It will be an invaluable resource for the basic surgical trainee as well as proving useful for those in higher surgical training and for the surgically-inclined, well-motivated student. The book covers in one volume all the essentials of the basic sciences – anatomy, physiology and pathology - to aid the candidate for the MRCS examination. In covering the applied basic science the books explains the application and clinical relevance of the three sciences. The text is written in an appropriate ‘bullet-point’ style to allow easy reading rapid exam preparation. The contents

concentrate on the recurring common themes of the examination, thus helping direct appropriate learning and focussing on the specific important areas of knowledge. The book is illustrated with clear line drawings which are clearly annotated to aid learning. Now available on StudentConsult with a downloadable ebook version included. 250 new online single-best answer questions in the format of the MRCS Part A examination will give the reader valuable experience in assessing their knowledge. Each answer will refer back to text for further reading as required. New and updated OSCE 'Clinical scenarios' will be included at the end of every chapter. There are very few radiology multiple choice question books on the market that reflect the current trends and developments in the field of imaging. Hence, the emphasis of this book is on cross-sectional CT and MR imaging. It highlights the current understanding and concepts in the state-of-the-art imaging of a wide range of diseases in the body. The multiple choice questions are organised according to body systems and imaging modalities. There are twelve sections in the book, testing the reader in a broad range of imaging knowledge. The questions are accompanied by expanded answers, which provide the reader with a summary of the key facts relating to a particular topic. This is especially useful in assisting the reader in consolidating his or her understanding of the subject. The questions are devised in a format similar to those

encountered in the Part 2A examination of the Royal College of Radiologists (UK) and the Part 2 examinations of the Joint Australian and New Zealand College of Radiology. Candidates taking the American Radiology Board examinations will also find the book informative. This examination and revision guide comprehensively tests knowledge at all levels in obstetrics and gynaecology. The wide-ranging sample questions have detailed answers to provide proper explanation and aid understanding, and the variety of question formats prepares students for all possibilities in the examination. The best of five question format is ideal for DRCOG candidates, the EMQs prepare the MRCOG candidates, and the MCQs will test both DRCOG and MRCOG candidates. The book is also highly recommended for undergraduates preparing for their finals, who will welcome the sample best of fives and EMQs now that essays and short answer questions are becoming a thing of the past.
