Princess Nicki has perfect posture, wears perfect princess attire, and has perfectly memorized every chapter of "Manners for Monarchs" -- but she refuses to eat her vegetables. From Caldecott Honor recipient Marjorie Priceman comes a droll, playful story about a perfectly picky eater. All the water in the world is all the water in the

world. We are all connected by water, and this message is beautifully, lyrically delivered from poet-musician-author George Ella Lyon. Where does water come from? Where does water go? Find out in this exploration of oceans and waterways that highlights an important reality: Our water supply is limited, and it is up to us to protect it. Dynamic, fluid art paired with pitch-perfect verse makes for a wise and remarkable read-aloud that will resonate with any audience. On sale: 03.22.11 A nation in danger. A challenge he can't refuse. War rages between Israel and their enemies. For forty days, the Philistines most fearsome warrior - a brutish giant named Goliath - mocks the Israelites from across the valley, challenging them to a fight. No one dare respond. When the king learns that David wants to battle the giant, everything changes. With no weapons aside from a slingshot, the young shepherd must fully trust God to defend the Israelites. Filled with colorful illustrations and

biblical truth, *Facing the Giant* is part of the Bible Pathway Adventures' series of biblical adventures. If your children like gripping action and courageous Israelites, then they'll love this biblical adventure series from Bible Pathway Adventures. The search for truth is more fun than tradition! Sisterly bonds, dark desires, and terrible secrets converge in this "tale of scorching family dysfunction that ranges among the gothic, domestic, and carnal" (Publishers Weekly).

Summoned to their magnificent family home on the shores of Lake Ontario—a paradisiacal mansion perched on an escarpment above the city—three adult sisters come together in what seems like an act of family solidarity.

Pregnant and unwell, the youngest has left her husband and four young children in New Zealand and returned home to heal. But while their home features immaculate gardens the likes of which few could imagine possessing, it is also a place of trauma and

vengeance, where family togetherness leads to feasting on each other's sexual appetites and weaknesses. Each daughter has her own particular taste, and overlaying everything is their parents, with unquenchable cravings of their own. As the affluent family endures six intense days in one another's company, old fissures reappear. When long-buried truths finally come to light, the sisters and their parents must face the unthinkable consequences of their actions. Solve each puzzle on your way through fantastical settings and brilliant stories! Trace through mazes with your finger and help each character and their faithful pets on their adventure. Wrap up warm and join little corgis Belle and Pip on a Christmas adventure in London! Belle LOVES the bustle of Christmas preparations at Buckingham Palace, but her family say she's in the way, and that Christmas is NOT for corgis! So Belle decides to slip out and explore London, where she's sure there

will be Christmas sprit in abundance! But on the busy streets, Belle finds everything a bit too bright, a bit too noisy and FAR TOO LOUD! Luckily, a streetwise puppy called Pip turns up and whisks Belle off on a wonderfully romantic whirl around the sights of London. All too soon it's time to head home, but when the couple finally work out how to get back into the palace . . . Pip disappears. Will Belle ever see him again? Perhaps . . . with the help of a special royal couple, who might just bring Belle a wonderful Christmas surprise. For dog-lovers everywhere, this Lady and the Tramp-esque romp around London at Christmas is full of heart . . . and waggy tails! John Jensen, a crocodile, cannot quite understand why he feels so different from everyone else, but a kindly doctor reassures him that no one is exactly the same as anyone else. CROSS! When she finds a crow with a broken wing she just has to help. But will she be able to put her frustrations to one side and help her new friend to fly again? Shortlisted for the Sainsbury's Children's Book Prize 2017, this empowering book is perfect for fans of Rosie Revere, Engineer, Fantastically Great Women Who Changed the World and Good Night Stories for Rebel Girls. 'If you're looking for a new book with a determined, strong female role model then this is for you' Being a Mummy blog 'This was such a fun book. We need more books with girl inventors!' Twirling Book Princess blog 'This exuberantly riotous story... blends the fun of rhyme with the touching friendship between a charismatic crow and a never-say-die young inventor' Lancashire Evening Post 'A lovely story of ingenuity and determination' Parents in Touch 'I doubt many will fail to fall for Izzy and her mechanical mind. Pip Jones' rhyming narrative is a cracker to read aloud and Sara Ogilvie's

imagination must be almost as fertile as young Izzy's... A real riot.' Red Reading Hub blog 'Jones's loping, engaging rhymes and Ogilvie's vivacious images evoke both inspiration and frustration' The Guardian This book is a captivating account of a professional mathematician's experiences conducting a math circle for preschoolers in his apartment in Moscow in the 1980s. As anyone who has taught or raised young children knows, mathematical education for little kids is a real mystery. What are they capable of? What should they learn first? How hard should they work? Should they even "work" at all? Should we push them, or just let them be? There are no correct answers to these questions, and the author deals with them in classic math-circle style: he doesn't ask and then answer a question, but shows us a problem--be it mathematical or pedagogical--and describes to us what happened. His book is a narrative about what he did, what he tried, what worked,

what failed, but most important, what the kids experienced. This book does not purport to show you how to create precocious high achievers. It is just one person's story about things he tried with a half-dozen young children. Mathematicians, psychologists, educators, parents, and everybody interested in the intellectual development in young children will find this book to be an invaluable, inspiring resource. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession. Titles in this series are co-published with the Mathematical Sciences Research Institute (MSRI). Although mistreated by her stepmother and stepsisters, Cinderella meets her prince with the help of her fairy

"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat*

What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more An astonishing new science called

neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving,

inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.
