The spring 2013 edition of the Wisconsin ATV - UTV Association's print publication, Trail Tales. Every day we interact with thousands of consumer products. We not only expect them to perform their functions safely, reliably, and efficiently, but also to do it so seamlessly that we don't even think about it. However, with the many factors involved in consumer product design, from the application of human factors and ergonomics principles to reducing risks of malfunction and the total life cycle cost, well, the process just seems to get more complex. Edited by well-known and well-respected experts, the two-volumes of Handbook of Human Factors and Ergonomics in Consumer Product Design simplify this process. The second volume, Human Factors and Ergonomics in Consumer Product Design: Uses and Applications, discusses challenges and opportunities in the design for product safety and focuses on the critical aspects of human-centered design for usability. The book contains 14 carefully selected case studies that demonstrate application of a variety of innovative approaches that incorporate Human Factor and Ergonomics (HF/E) principles, standards, and best practices of user-centered design, cognitive psychology, participatory macro-ergonomics, and mathematical modeling. These case studies also identify many unique aspects of new product development projects, which have adopted a user-centered design paradigm as a way to attend to user requirements. The case studies illustrate how incorporating HF/E principles and knowledge in the design of consumer products can improve levels of user satisfaction, efficiency of use, increase comfort, and assure safety under normal use as well as foreseeable misuse of the product. The book provides a comprehensive source of information regarding new methods, techniques, and software applications for consumer product design. Almost all mechanical devices used in every industry require lubrication. Lubricant Analysis and Condition Monitoring explains the benefits of identifying, planning, implementing and using lubricant and machine condition monitoring programmes to extend the lifetimes of both lubricants and machines, to achieve maximum productivity and profitability while reducing impacts on waste and the environment. This book: Offers a comprehensive overview of all types of tests used in lubricant condition monitoring programmes Discusses monitoring the condition of all types of components, machines, equipment and systems used in all industries Considers new and emerging machines, equipment and systems, including electric and hybrid vehicles Suggests which tests to use for each type of machine, equipment or system and, just as importantly, which tests not to use Provides practical examples of

how to set up, run and manage condition monitoring programmes and how to achieve significant cost savings through planned and predictive maintenance schedules Gathering vital information that users of lubricants need in one place, this book is of practical use to mechanical, maintenance, manufacturing and marine engineers as well as metallurgists, chemists and maintenance technicians. Advocates the "salad bar beef production model" that is supposed to be "land and farmer friendly." We create technology enabling us to do things never before possible and it ultimately changes the way we live, work, play, and interact with each other. Throughout human history, the democratization of technology making a technology available to the masses, has brought about sweeping cultural, social, political, and societal changes. In the last half-century, the democratization of computers, information, the Internet, and social media have revolutionized and transformed our lives. We now stand at the beginning of a new era sure to bring about waves of new revolutions, the cognitive systems era. Until now, humans have done all of the thinking. However, our lives are about to be infused with artificial entities capable of performing high-level cognitive processing previously possible only in the human mind. Systems capable of this kind of "synthetic cognition" will achieve and surpass the level of human experts in almost every field of endeavor. Far from replacing humans, these cognitive systems will be our collaborators, teachers, confidants, colleagues, and companions. The future will belong to those who can better partner with these cognitive systems. Made available to the average person via the Internet, handheld devices, and through ordinary objects all around us, expertise will become democratized. Everything will change when anyone has access to expertise in any field and new things will be possible. The democratization of expertise is the foundation on which our society's revolutions will be built over the next half-century. This book discusses societal and cultural revolutions throughout history brought about by the adoption of new technology and gives brief histories of human cognitive augmentation and artificial intelligence. In the coming cognitive systems era, humans, by collaboratively partnering with cognitive systems, will together achieve expert-level performance—synthetic expertise—with humans performing some of the cognitive processing and cognitive systems performing some. As the capabilities of cognitive systems improve over time, the balance of thinking will shift from being mostly human to mostly artificial. This book introduces the Levels of Cognitive Augmentation to describe this shift. Drawing from previous research in cognitive systems and intelligent agent theory, the knowledge stores required for expertise are identified in a Knowledge Level description of expertise. This book introduces a new abstract level, called the Expertise Level to describe the skills needed for expertise. Combining the knowledge-level and expertise-level descriptions, this book introduces the Model of Expertise. This book demonstrates use of the Model of Expertise by presenting several synthetic expert architectures: a synthetic teacher (Synthia), a synthetic friend/therapist (Sy), a synthetic elderly companion (Lois), a synthetic research companion (Synclair), and an automated scientific hypothesis explorer (Ashe). This book is intended for anyone interested in the fields of cognitive systems, cognitive computing, cognitive augmentation, or artificial intelligence or the impact of technologies from these fields on society. Anyone doing research and development in the area of cognitive systems or artificial intelligence will find this book particularly useful.

Making Sense of World History is a comprehensive and accessible textbook that helps students understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical "episodes" that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates the many ways in which societies have influenced each other through history, and allows us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unified authorial voice and offering a narrative from the ancient to the present, this is the go-to textbook for World History courses and students. The Open Access version of this book, available at <https://www.taylorfrancis.com/books/9781003013518>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. With more than 1000 newspapers, 1100 local radios, 200 television channels, 3000 online news portals, and over 80 colleges providing media education and training, news media, and media education are vibrant fields in Nepal. This book provides a comprehensive overview of Nepal's news media, including empirical studies, critical reviews, and theoretical and philosophical analyses focusing on journalism and contemporary media practices in the country, using local standpoints and global perspectives. Laying foundations of academic research and discourse, it explores key issues about the state of media and journalism practices of Nepal and situates them against the professional standards of global journalism and journalism education. The book covers all news media, including traditional (newspaper, radio, and television) and digital platforms.

The Cat Kid Comic Club is deep in discovery in the newest graphic novel in the hilarious and heartwarming worldwide bestselling series by Dav Pilkey, the author and illustrator of Dog Man. The comic club is going in all different directions! Naomi, Melvin, and siblings are each trying to find their purpose. Naomi has an idea to get rich quick that causes a lot of commotion and emotion. And when faced with rejections, the friends try and try again to stay true to their vision. To top it off, a surprise visitor comes to class to stir things up. Will a desire for money and power cloud Naomi's purpose? Is it quitting time? Will the club ever be the same? The hilarity is nonstop as the baby frogs navigate sibling relationships, follow their path, and create art -- with purpose! Featured as stories-within-the-story, the mini comics showcase each baby frog's perspective and individual art style. In this groundbreaking graphic novel series, award-winning author and illustrator Dav Pilkey uses a variety of techniques -- including acrylic paints, colored pencils, photography, collage, gouache, watercolors, and much more -- to illustrate each frog's creative purpose and encourage teamwork. The kaleidoscope of art styles, paired with Pilkey's trademark storytelling and humor, fosters creativity, collaboration, independence, and empathy. Readers of all ages will enjoy this fun, exciting, and purposeful graphic novel adventure. (Piano Vocal). This sheet music features an arrangement for piano and voice with guitar chord frames, with the melody presented in the right hand of the piano part as well as in the vocal line. This book advances our understanding of the nature, grounds and limits of human dignity by connecting it with Kant's notion of an ideal moral community, or "Kingdom of Ends". It features original essays by leading Kant scholars and moral and political philosophers from around the world. Although Kant's influential injunction to treat humanity as an end in itself and never merely as a means has garnered the most attention among those interested in analyzing human dignity with a Kantian lens, Kant himself places much more emphasis on the Kingdom of Ends as crucial for defining human dignity. The chapters in this collection focus not only on interpretive issues related to the Kingdom of Ends but also on practical applications that have the potential to advance discussions about the nature and foundations of rights, the content of moral principles, the importance of moral ideals and attitudes and the nature of moral motivation. Exploring and connecting the ideas of human dignity and the Kingdom of Ends significantly deepens our moral understanding, advances discussions in moral and political philosophy and enhances our appreciation of Kant's moral theory. Human Dignity and the Kingdom of Ends: Kantian Perspectives and Practical Applications will appeal to scholars and advanced students of Kant, moral philosophy, political philosophy, and political theory. Unaware of the Depth of my Spiritual Warfare... From Early Childhood Sexual Abuse to the Abuse of Religion and Spiritual Warfare, My Faith is Tested and Bound, when I refuse to give it up. I Celebrate Recovery... ... AGAIN and AGAIN. Can one woman tame the biggest philanderer to walk the streets of Memphis? Gunner Hawthorne is the sexiest, wealthiest, and the most colossal prick you'll ever meet. He's at the top of his career game and has everything to show for it. Gunner is preparing his team for one of the biggest takeovers in cosmetic history. Gunner, as usual, is full of himself as he insults the female owner of his company's biggest competitor, Vrede Cosmetics. He is now forced to make what he wronged back right. But, can Gunner woo Vrede without falling for her in the process? *Content Warning: Contains explicit scenes and language. Intended for 18+ Audience This volume adds in important ways to understanding the power and complexity of the forces in the lives of children that impact their literacy learning. The critical issues presented emerge from interpretivist research and thinking practices that are constructivist in nature. The chapters by researchers, teacher researchers, teacher educators, and teachers are antidotes to the present political context in which political agendas are being used to define literacy, literacy teaching and learning, and literacy research in narrow ways. Providing a rich source of information about how young

children come to know reading and writing as a tool of communication in a range of social and cultural contexts, this book: *presents current research and thinking in the field; *documents research that is currently being ignored by many who make decisions about children's learning; *values who children are and what they bring with them to school; *provides a useful tool for advocacy and for social action toward improving education in ways that can make a difference in the lives of young children; and *raises thoughtful issues for discussion. Critical Issues in Early Literacy is essential reading for early childhood teachers and prospective teachers, for teacher educators, for literacy researchers (including teacher researchers), for special educators, for those working with English-language and foreign-language learners, and for early childhood education administrators, advocates, and policy makers.

When a big Hollywood movie studio comes to New Orleans and wants to use Bitsy Duhe's gorgeous Victorian house for a shoot, Bitsy consents--as long as Charlotte La Rue, owner of Maid for a Day, agrees to take care of her beloved home during filming. . . Soon Charlotte meets the cast and crew, including Hollywood ingénue Angel Martinique. The movie seems to be going well--until a body is found dead in Angel's dressing room, a bloody letter opener just a few feet away. To Charlotte, there's no shortage of suspects. But when the police zero in on Angel, Charlotte does a little digging into Angel's past, and comes up with a bit more dirt than she bargained for--enough to put her in the crosshairs of danger if she doesn't watch her step. . . "Leaves the reader wanting more." --Romantic Times "This cozy series gets better with each book." --Library Journal

Originally published in 1929, the author begins the discussion of nationality by a survey of its main factors - race, language, religion, the homeland, tradition, literature and the will to live together. With the discovery that racial purity is a myth, race in its biological sense loses much of its significance, though racial self-consciousness remains virtually unaffected. The second half of the volume studies the historical origins of nationality and its world-wide ramifications. The nationalities of Europe are briefly surveyed in a single chapter, while the British Empire, India, the Jews and the Americans, have chapters to themselves. The study of Asia is completed by an additional chapter on National Groups of the East. Towards the end of the volume the author returns to the discussion of the meaning of nationality, defines its relation to the state, Patriotism, Internationalism and war, and sums up its merits and its defects. This book is a re-issue originally published in 1929. The language used and assumptions made are a reflection of its era and no offence is meant by the Publishers to any reader by this re-publication. This concise, practical textbook clearly explains how to go about developing and implementing a global strategy for any organization, from Born Global start-ups, to more established large companies struggling to manage their global extensions, to nonprofits including non-governmental organizations (NGOs) and charities. FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations. Consumption stalks Elizabeth James. At least that's what the doctors from Harley street, the best available in Britain if not the world, say it is. One drop of blood at a time. Her only hope is the clean air, good food, and care of her uncle, Dr Standfast. Life on Barnecourt farm, high on a down in Dartmoor, may be her last chance. A chance that strange, almost human, men threaten. Especially when they

scratch at her window in the depths of the night. Strange animals, a dog that walks upright and understands English, stalk the brush. Almost as disturbing, a visitor, a young man, almost literally drops from the sky into her life. What does it mean to bring Asia into conversation with current literature on everyday multiculturalism? This book focuses on the empirical, theoretical and methodological considerations of using an everyday multiculturalism approach to explore the ordinary ways people live together in difference in the Asian region while also drawing attention to increasing trans-Asian mobilities. The chapters in this collection encompass inter-disciplinary research undertaken in Australia, Hong Kong, Malaysia, Singapore and South Korea that explores some core aspects of everyday multiculturalism as it plays out in and across Asia. These include an increase in intraregional movements and especially labour mobility, which demands regard for the experiences of migrants from Burma, China, Nepal, The Philippines and India; negotiations of cultural diversity in nations where a multi-ethnic citizenry is formally recognised through predominantly pluralist models, and/or where national belonging is highly racialized; and intercultural contestation against, in some cases, the backdrop of a newly emergent multicultural policy environment. The book challenges and reinvigorates discussions around the relative transferability of an everyday multiculturalism framework to Asia, including concepts such as super-diversity, conviviality and everyday racism, and the importance of close attention to how people navigate differences and commonalities in local and trans-local contexts. This book will be of interest to academics and researchers studying migration, multiculturalism, ethnic and racial studies, and to advanced students of Sociology, Political Science and Public Policy. It was originally published as a special issue of Ethnic and Racial Studies. The MicroStrategy Engine Essentials course explains the inner workings of the MicroStrategy Engine. In this course, you will study specific reporting scenarios and the MicroStrategy Engine's techniques for composing the SQL queries that produce MicroStrategy reports. You will study concepts such as level metrics, transformation metrics, custom groups, and relationship filters from a SQL point of view. The course also reviews the most commonly used VLDB Properties. Long ago in an ancient land, a group of nomadic people, without a land to call their own, wished to gain passage through a land of bellicose nations known throughout history as the Moabites and Amorites. To the very unfortunate peoples who happened upon the borders of these barbaric nations, they would ultimately be cut off in battles waged against them, until one dreadful day. Emissaries were dispatched in the hopes of obtaining permission to pass through their land, but instead war broke out and brought an end to those antagonistic nations. The battle was fought on the East Side of the Amon River, in what is now the land of Jordan. Both the Moabites and the Amorites were no match for the nomads, who had endured living in the wilderness and surrounding mountains for almost half-century. Those nomadic people also had possession of a very powerful book, in which all of their victories were recorded. The year in which the battle against the Moabites and Amorites was fought is recorded as 1290 BCE. It is said that the book was given to them from on high, and during battles their leader would simply hold the book up toward heaven, and celestial beings would destroy their enemies. It then became known throughout all the surrounding lands and nations that their God was a powerful being who fought on their behalf. As centuries passed, the use of the book became extinct, and as a result, a high priest set out to hide the book in various parts of the world, so that no one person or nation could harness its power to be used against humanity. In the event that the book was ever needed, the high priest left clues and codes that, once deciphered, would lead to the various hiding places of each part of the book. The world is now facing an enemy that has not been seen since times of old--an enemy far more sinister than can be imagined by the human mind. Now an epic world battle is nearing, and without the book, all will be lost. This story starts simply. It begins with the search for: The Book of the Wars of God "This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy"-- The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. This exciting new book (which includes a database on CD-ROM) is a complete reference tool for everything you need to know about the car, truck and specialty vehicles business, including: Automotive industry trends and market research; Mergers, acquisitions, globalization; Automobile manufacturers; Truck makers; Makers of specialty vehicles such as RVs; Automobile loans, insurance and other financial services; Dealerships; Components manufacturers; Retail auto parts stores; E-commerce ; and much, much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. This book also includes statistical tables, an automobile industry glossary, industry contacts and thorough indexes. The corporate profile section of the book includes our proprietary, in-depth profiles of the 400 leading companies in all facets of the automobile industry. Purchasers may also receive a free copy of the company profiles database on CD-ROM. Balancing skills and theory, Principles of Public Speaking emphasizes orality, Internet technology, and critical thinking as it encourages the reader to see public speaking as a way to build community in today's diverse world. Within a framework that emphasizes speaker responsibility, critical thinking and listening, and cultural awareness, this classic book uses examples from college, workplace, political, and social communication to make the study of public speaking relevant, contemporary, and exciting.
