Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem. What does it mean to become a man in the Arctic today? *Becoming Inummarik* focuses on the lives of the first generation of men born and raised primarily in permanent settlements. Forced to balance the difficulties of schooling, jobs, and money that are a part of village life with the conflicting demands of older generations and subsistence hunting, these men struggle to chart their life course and become inummariit - genuine people. Peter Collings presents an accessible, intelligent, humorous, and sensitive account of Inuit men who are no longer youths, but not yet elders. Based on over twenty years of research conducted in Ulukhaktok, Northwest Territories, *Becoming Inummarik* is a profound and nuanced look at contemporary Inuit life that shows not just what Inuit men do, but who they are. Collings recounts experiences from his immersion in the daily lives of Ulukhaktok's men - from hunting and sharing meals to playing cards and grocery shopping - to demonstrate how seemingly mundane activities provide revelations about complex issues such as social relationships, status, and maturity. He also reflects on the ethics of immersive anthropological research, the difficulties of balancing professional and personal relationships with informants, and the nature of knowledge in Inuit culture. *Becoming Inummarik* shows that while Inuit born into a modern society see themselves as different from their parents' generation, their adherence to traditional ideas about life ensures that they remain fully Inuit even as their community has witnessed drastic upheaval. In this wrenching sequel to *Divided We Fall*, Danny and friends fight to defend Idaho

against a Federal takeover and the ravages of a Burning Nation. At the end of Divided We Fall, Danny Wright's beloved Idaho had been invaded by the federal government, their electricity shut off, their rights suspended. Danny goes into hiding with his friends in order to remain free. But after the state declares itself a Republic, Idaho rises to fight in a second American Civil War, and Danny is right in the center of the action, running guerrilla missions with his fellow soldiers to break the Federal occupation. Yet what at first seems like a straightforward battle against governmental repression quickly grows more complicated, as more states secede, more people die, and Danny discovers the true nature of some of his new allies. Chilling, powerful, and all too plausible, Burning Nation further establishes Trent Reedy as a provocative new voice in YA fiction. Hansen/Mowen's CORNERSTONES OF COST MANAGEMENT, 4E demonstrates the dynamic nature of cost accounting in today's changing business environment. The book covers functional-based cost and control, and then activity-based cost systems, giving students the skills to manage any cost management system. Developed using extensive research on student learning behavior, this book presents concepts in a unique format that speaks to how students learn. Cornerstones examples in each chapter emphasize the How, Why, and What-Ifs of basic cost management concepts, while delving into the conceptual nature of each equation or topic.
