**The Essentials of Technical Communication** Mar 22 2020 In today's complex workplace, no one wants to read what you write. The Essentials of Technical Communication, Fifth Edition, was developed with this principle in mind. The respected author team continues to provide students with accessible and comprehensive instructions for planning, drafting, and revising technical documents that are clear and concise. Divided into two flexible parts--Principles and Applications--the text lays a strong foundation in the rhetoric principles before examining the principle types of workplace documents with checklists for use in preparing them.

**Proverbios Morales** Jan 12 2022 This Hebrew poet, known by his Catilian name, Santob de Carrión, lived in the first half of the fourteenth century. In this text, originally published in 1947, Professor Llubera offers a critical edition, giving the text of the work and a full and detailed introduction to Proverbios Morale.

*Alfonso the Magnanimous* Nov 29 2020 This is the first complete biography of one of the most brilliant fifteenth-century monarchs, Alfonso V of Aragon. Ryder traces Alfonso's life from his childhood in the chivalric world of Castile to the newly-acquired states of Aragon and his subsequent accession to the Aragonese throne. In addition to being a shrewd politician, Alfonso is revealed to have been an accomplished diplomat, acutely aware of the power of commerce, and one of the greatest patrons of the early Renaissance. He brought humanism to life in Southern Italy and made his court the most brilliant in Europe. Offering not only an insightful look at Alfonso's life but a vivid portrait of political and cultural life during his reign, this volume will hold special appeal for scholars and students of early modern European history, fifteenth-century Italian and Spanish history, and Renaissance studies.

*Trilogy of Passion* May 24 2020 Trilogy of Passions is a poetry collection by the German author Johann Wolfgang von Goethe. His body of work includes epic and lyric poetry written in a variety of metres and styles; prose and verse dramas; memoirs; an autobiography; literary and aesthetic criticism; treatises on botany, anatomy, and colour; and four novels. In addition, numerous literary and scientific fragments, more than 10,000 letters, and nearly 3,000 drawings by him are extant. A literary celebrity by the age of 25, Goethe was ennobled by the Duke of Saxe-Weimar, Karl August in 1782 after first taking up residence there in November 1775 following the success of his first novel, The Sorrows of Young Werther. He was an early participant in the Sturm und Drang literary movement. During his first ten years in Weimar, Goethe served as a member of the Duke's privy council, sat on the war and highway commissions, oversaw the reopening of silver mines in nearby Ilmenau, and implemented a series of administrative reforms at the University of Jena. He also contributed to the planning of Weimar's botanical park and the rebuilding of its Ducal Palace, which in 1998 were together designated a UNESCO World Heritage Site. Arthur Schopenhauer cited Wilhelm Meister's Apprenticeship as one of the four greatest novels ever written, along with Tristram Shandy, La Nouvelle Heloise, and Don Quixote, and Ralph Waldo Emerson selected Goethe as one of six "representative men" in his work of the same name, along with Plato, Napoleon, and William Shakespeare. Goethe's comments and observations form the basis of several biographical works, most notably Johann Peter Eckermann's Conversations with Goethe. There are frequent references to Goethe's writings throughout the works of G. W. F. Hegel, Arthur Schopenhauer, Friedrich Nietzsche, Hermann Hesse, Thomas Mann, Sigmund Freud, and Carl Jung. Goethe's poems were set to music throughout the eighteenth and nineteenth centuries by a number of composers, including Wolfgang Amadeus Mozart, Ludwig van Beethoven, Franz Schubert, Robert Schumann, Johannes Brahms, Charles Gounod, Richard Wagner, Hugo Wolf, Felix Mendelssohn, and Gustav Mahler.

**Alsos** Apr 03 2021 Near the end of World War II, as Allied armies swept across battle-torn Germany and leading scientists at Los Alamos were racing to assemble the atomic bombs America would drop over Japan later that summer, General Leslie Groves, the military head of the Manhattan Project, established Alsos, a unit of scientists, soldiers, and secret agents to find the Nazi Germany's physicists and technicians working on the development of a German atomic bomb and to determine how far along they were. In this book, Samuel Goudsmit, the Dutch-American physicist who was the scientific leader of the Alsos mission, recounts the mission and its findings. "Alsos is more than a dramatic chronicle of how Goudsmit and his staff accompanied Allied troops in order to ferret out German atomic secrets and round up German scientists who might have been working on a fission bomb. It is also an overview and critique of the German research establishment under Nazi control." — Albert Moyer, American Scientist "Highly readable and informative... [T]he immediacy of Goudsmit's experience makes this memoir of enduring value... inspired story-telling that provides in retrospect a great deal of information on the operations of the postwar intelligence teams... An extraordinary book." — Alan Beyerchen, New Scientist "Samuel Goudsmit... the scientific leader of Alsos... tells the fascinating story of the mission's work... To the extent that the average citizen is permitted to learn how his servants spend his money for the purpose of insuring his safety, it will be useful for every intelligent American to hear Goudsmit's story and ponder his views. In any case, Alsos is highly entertaining... Goudsmit's assessment of Nazi war science is excellent... There are a lot of things in Goudsmit's book that we had better keep in mind." — Paul Ridenour, The New York Times "[Goudsmit's] short memoir is a thrilling combination of detective story and scientific deduction." — Stephen Budiansky, Wall Street Journal "[Alsos] is the compelling story of what the Germans did [to develop an atomic bomb], what went wrong and why." — Lee Dembart, Los Angeles Times "For the history of science this chatty little book is surely one of the most important books to emerge from World War II, since it is the account of one of the most absorbing war assignments to fall to the lot of any scientist." — Henri Guerlac, Isis, A Journal of the History of Science Society

*Florentine Families in Hungary in the First Half of the Fifteenth Century* May 16 2022 The study of Florentine-Hungarian economic relations in the first half of the fifteenth century provides a challenging opportunity to survey late medieval social and economic strategies and their adjustment to a specific regional situation. Florentine merchants were actively present with their trading and banking activity in medieval Europe whereas medieval Hungary played a notable role in the political and economic landscape of East-Central Europe during the reign of King Sigismund of Luxemburg (1387-1437). Based on a prosopographic database the study investigates these businessmen's economic and social background in Florence via in-depth case studies and quantitative research. Concentrating further on the community of foreign traders in Buda as a royal seat in formation, the study reviews also the competition between South German and Florentine traders. An appendix includes the complete prosopographic database compiled for this research, being a collective biography of Florentine merchants and investors working in Hungary in the first half of the fifteenth century. Secondly it includes a list of business partners and transactions in Hungary in the debtors lists of the Florentine Catasto Records.

**Elements of Indigenous Style** Jun 05 2021 Elements of Indigenous Style offers Indigenous writers and editors—and everyone creating works about Indigenous Peoples—the first published guide to common questions and issues of style and process. Everyone working in words or other media needs to read this important new reference, and to keep it nearby while they're working. This guide features: - Twenty-two succinct style principles. - Advice on culturally appropriate publishing practices, including how to collaborate with Indigenous Peoples, when and how to seek the advice of Elders, and how to respect Indigenous Oral Traditions and Traditional Knowledge. - Terminology to use and to avoid. - Advice on specific editing issues, such as biased language, capitalization, and quoting from historical sources and archives. - Case studies of projects that illustrate best practices.

**Play, Pain and Religion** Feb 19 2020 Play, Pain and Religion is the first consideration of the practices associated with BDSM (bondage, domination, sadism and masochism) in the context of religious studies scholarship. The focus is an exploration of BDSM experience as it emerges from the complex interactions of kink activities and relationship. Experiences categorised by BDSM practitioners as 'religious' and 'spiritual' are commonly described in the same terms, and given the same value, as descriptions of experiences which are not so categorised. Play, Pain and Religion examines practitioner accounts of BDSM experience alongside those practitioners' personal identification with these terms. This book argues that the significance of a given experience is not located solely within any intrinsic quality ascribed to it but in subsequent constructions around the nature and meaning of the event. It examines some such constructions, moving away from absolute definitions of religion or religions to consider the religious as an active process of meaning-, world- and story-making. By using this 'religioning' framework, this book examines ways in which BDSM can potentially be used in such processes. Play, Pain and Religion is a valuable resource for scholars of religion and of kink, for people interested in the complexities of ascribing meaning and value to human behaviour, and for kinksters interested in their own kink and why it is they do what they do.

**Rūmī and the Hermeneutics of Eroticism** Nov 22 2022 Drawing on relevant postmodern theories, and exploring the link between the dynamics of eroticism and esotericism, this book establishes the esoteric significance of the bawdy tales in Rūmī's (d. 1273) *Mathnawī*, a masterpiece of medieval Perso-Islamic mystical literature.

**An Introduction to Mathematical Taxonomy** Dec 23 2022 Students of mathematical biology discover modern methods of taxonomy with this text, which introduces taxonomic characters, the measurement of similarity, and the analysis of principal components. Other topics include multidimensional scaling, cluster analysis, identification and assignment techniques, more. A familiarity with matrix algebra and elementary statistics are the sole prerequisites.

*Recycled Pulsars* Jun 24 2020 We present the results of a large-area survey for millisecond pulsars (MSPs) at moderately high galactic latitudes with the 64 m Parkes radio telescope, along with follow-up timing and optical studies of the newly-discovered pulsars and several others. Major results include the first precise measurement of the mass of a fully recycled pulsar and measurement of orbital period decay in a double neutron star binary system allowing a test of general relativity along with improved measurements of the neutron star masses. In a survey of approx. 4,150 square degrees, we discovered 26 previously unknown pulsars, including 7 "recycled" millisecond or binary pulsars. Several of these recycled pulsars are particularly interesting: PSR J1528-3146 is in a circular orbit with a companion of at least 0.94 solar masses; it is a member of the recently recognized class of intermediate mass binary pulsar (IMBP) systems with massive white dwarf companions. We have detected optical counterparts for this and one other IMBP system; taken together with optical detections and non-detections of several similar systems, our results indicate that the characteristic age consistently overestimates the time since the end of mass accretion in these recycled systems. This result implies that the pulsar spin period at the end of the accretion phase is not dramatically shorter than the observed period as is generally assumed. PSR J1600-3053 is among the best high-precision timing pulsars known and should be very useful as part of an ensemble of pulsars used to detect very low frequency gravitational waves. PSR J1738+0333 has an optical counterpart which, although not yet well-studied, has already allowed a preliminary measurement of the system's mass ratio. The most significant discovery of this survey is PSR J1909-3744, a 2.95 ms pulsar in an extremely circular 1.5 d orbit with a low-mass white dwarf companion. Though this system is a fairly typical low-mass binary pulsar (LMBP) system, it has several exceptional qualities: an extremely narrow pulse profile and stable rotation have enabled the most precise long-term timing ever reported, and a nearly edge-on orbit gives rise to a strong Shapiro delay signature in the pulse timing data which has allowed the most precise measurement of the mass of a millisecond pulsar:  $1.438 \pm 0.024$  solar masses. Our accurate parallax distance measurement,  $d = 1.14 \pm 0.08 / -0.07$  kpc, combined with the mass of the optically-detected companion,  $0.2038 \pm 0.022$  solar masses, will provide an important calibration for white dwarf models relevant to other LMBP companions. We have measured the decay of the binary period of the double neutron star system B2127+11C in the globular cluster M15. This has allowed an improved measurement of the mass of the pulsar,  $1.3584 \pm 0.0097$  solar masses, and companion,  $1.3544 \pm 0.0097$  solar masses, as well as a test of general relativity at the 3% level. We find that the proper motions of this pulsar

as well as B2127+11A and B2127+11B are consistent with each other and with one published measurement of the cluster proper motion. We have discovered three binary millisecond pulsars in the globular cluster M62 using the 100-m Green Bank Telescope (GBT). These pulsars are the first objects discovered with the GBT. We briefly describe a wide-bandwidth coherent dedispersion backend used for some of the high precision pulsar timing observations presented here.

**Common Women** Dec 31 2020 "Common women" in medieval England were prostitutes, whose distinguishing feature was not that they took money for sex but that they belonged to all men in common. Common Women: Prostitution and Sexuality in Medieval England tells the stories of these women's lives: their entrance into the trade because of poor job and marriage prospects or because of seduction or rape; their experiences as streetwalkers, brothel workers or the medieval equivalent of call girls; their customers, from poor apprentices to priests to wealthy foreign merchants; and their relations with those among whom they lived. Common Women crosses the boundary from social to cultural history by asking not only about the experiences of prostitutes but also about the meaning of prostitution in medieval culture. The teachings of the church attributed both lust and greed, in generous measure, to women as a group. Stories of repentant whores were popular among medieval preachers and writers because prostitutes were the epitome of feminine sin. Through a sensitive use of a wide variety of imaginative and didactic texts, Ruth Karras shows that while prostitutes as individuals were marginalized within medieval culture, prostitution as an institution was central to the medieval understanding of what it meant to be a woman. This important work will be of interest to scholars and students of history, women's studies, and the history of sexuality.

*A genealogical history of the Rehoboth branch of the Carpenter family in America, brought down from their English ancestor, John Carpenter, 1303, with many biographical notes of descendants and allied families* Mar 14 2022 William Carpenter (1605-1659) and his family emigrated from England and settled first at Weymouth, Massachusetts in 1638. He and his wife, Abigail, had seven children, ca. 1628-1644. The family moved to Rehoboth, Massachusetts, ca. 1644. Descendants lived in Massachusetts, Connecticut, Vermont, New Hampshire, New York, Ohio, Rhode Island, Pennsylvania, Wisconsin, Illinois, Indiana, Michigan and elsewhere. Record chiefly follows male lines. Includes Bliss, Brown, Clark, Howard, Perry, Read, Walker and related families.
