Mobile Crane Operator Mar 05 2021 This analysis is directed at the mobile crane operator. It identifies tasks and sub-tasks performed, arranged in blocks of distinct operations relevant to that occupation. These blocks include workplace safety, communication, equipment inspection and maintenance, rigging, pre-lift planning, site preparation and crane set-up, crane assembly and transport, and operation of different types of cranes. For each task, the document outlines the element of skill and knowledge needed to perform the task adequately, identifies any shifts or changes in technology that affect the task, lists tools and equipment required for the task, and provides an indication of whether the task has been validated by each province and territory. The appendix includes a list of tools and equipment used in the occupation, and a tabulation of the percentage of

time a worker spends performing each block and task in a given year (by province/territory and for Canada as a whole).
