While these are entertaining and do sometimes contain some good hints and tips, it is important to remember that these are just television programs with editing and careful selection.The producers purposely pick the people who would be deemed the most extreme or perhaps the “nuttiest” because they are the ones that make good television.The real preppers are the ones that are not doing stunts for TV. They are the ones with the right mindset and mental attitude and they are doing these things quietly for their families, not parading their choices for everyone to see. You have heard a lot about prepping and emergency food storage, but what is it really? How do you know what you need or how much you need? When you see images on television or on the internet of these well-stocked prepper food pantries, it can be a little overwhelming. Hundreds of cans of food, boxes and boxes of pasta and gallons of water lined up on a shelf seems like a lot of work. To be perfectly honest, it is, but it can be done with a little guidance and due diligence. This book will help walk you through what it takes to build up an emergency food storage supply that will carry your family through the aftermath of a disaster. When store shelves are empty and there is no hope of the shelves being stocked in the immediate future, you have to rely on yourself and what you have put into your own prepper pantry. Building up a supply of food that will last your family for a few months is great, but your long term food pantry goal is one year. One year's worth of food on hand to take care of your family. You are also going to need some help when it comes to storing water. Water is a necessity, but it is cumbersome. You will find some ideas to help you meet your water needs. What will you do when your food supply runs low? Don't worry, this guide has you covered and will explain scavenging and why you need to be prepared to do it. Prepper PLUS free book inside> Survival Pantry Ever thought about what would happen if a major disaster occurred and you weren't prepared? Do you know how to prepare for a catastrophe Have you got the survival skills you need? Well you're about to discover how to PREP for any situation!... Disasters can come in any form and at any time. Worse still, they are quite likely to strike you when you are least prepared to welcome them. And when a disaster does hit you, especially if it's a strong, devastating one, you are likely to succumb to its fierce blow. Even if you do manage to survive the initial attack, you won't be able to last for a long time if you haven't prepared beforehand for it. The extreme weather conditions, lack of the 'normal' food supply, lack of proper shelter, inability to make a fire, attacks from other people and animals and a lot more can cause slow and painful death such that you wish you could just have died when the disaster first hit. Keep in mind that you can only survive for about 3 minutes without air, 3 hours without a synchronized body temperature, 3 days without water, and about 3 weeks without food. This means that if you are to survive post disaster, you must ensure that you get all these items in their order of importance otherwise you won't live long enough until help comes your way.
