Electronic Government Mar 04 2021 Smart cards (SC) -- credit-card-like devices that use integrated circuit chips to store and process data -- offer a range of potential uses for the federal government, particularly in increasing security for its many physical and information assets. This report reviews the use of SC across the federal government (including identifying potential challenges), as well as the effectiveness of the GSA in promoting government adoption of SC technologies. Recommends, among other things, that GSA establish guidelines for federal building security that address SC technology; that the OMB establish a policy on adoption of SC for physical and logical security; and that NIST continue to improve and update the government SC interoperability specification.

Insiders' Guide® to Hampton Roads Sep 22 2022 A first edition, *Insiders' Guide to Hampton Roads* is the essential source for in-depth travel and relocation information to this storied Virginia metropolitan area. Tests of Character Apr 29 2023 Test pilots are a notoriously

modest and reticent breed and their work has generally been undervalued because of their dislike of publicity. Much of their work has been of a secret nature, so this also inhibits discussion. *Tests of Character* is written to reveal the problems which have faced test pilots from the earliest years of aviation through the 1960s. Author Don Middleton has selected a number of test sorties and programs which were, indeed, tests of character. These tell the story of the difficulties faced by test pilots in turning the new machines into efficient aircraft capable of being flown by ordinary military and commercial pilots.

The Aviators Aug 29 2020 Written by gifted storyteller Winston Groom (author of *Forrest Gump*), *The Aviators* tells the saga of three extraordinary aviators--Charles Lindbergh, Eddie Rickenbacker, and Jimmy Doolittle--and how they redefine heroism through their genius, daring, and uncommon courage. This is the fascinating story of three extraordinary heroes who defined aviation during the great age of flight. These cleverly interwoven tales of their heart-stopping adventures take us from the feats of World War I through the heroism of World War II and beyond, including daring military raids and survival-at-sea, and will appeal to fans of *Unbroken*, *The Greatest Generation*, and *Flyboys*. With the world in peril in World War II, each man set aside great success and comfort to return to the skies for his most daring mission yet. Doolittle, a brilliant aviation innovator, would lead the daring Tokyo Raid to retaliate for Pearl Harbor; Lindbergh, hero of the first solo flight across the Atlantic, would fly combat missions in the South Pacific; and Rickenbacker, World War I flying ace, would bravely hold his crew together while facing near-starvation and circling sharks after his plane went down in a remote part of the Pacific. Groom's rich narrative tells their intertwined stories--from broken homes to Medals of Honor (all three would receive it); barnstorming to the greatest raid of World War II; front-page triumph to anguished tragedy; and near-death to ultimate survival--as all took to the sky, time and again, to become exemplars of the spirit of the "greatest generation."

Freddy the Pilot Jan 26 2023 When the circus is threatened Freddy takes to the air to save it.

Devotion Oct 23 2022 NEW YORK TIMES BESTSELLER • NOW A MAJOR MOTION PICTURE • From America's "forgotten war" in Korea comes an unforgettable tale of courage by the author of *A Higher Call*. "In the spirit of *Unbroken* and *The Boys in the Boat* comes *Devotion*."—Associated Press • "Aerial drama at its best—fast, powerful, and moving."—Erik Larson *Devotion* tells the inspirational story of the U.S. Navy's most famous aviation duo, Lieutenant Tom Hudner and Ensign Jesse Brown, and the Marines they fought to defend. A white New Englander from the country-club scene, Tom passed up Harvard to fly fighters for his country. An African American sharecropper's son from Mississippi, Jesse became the navy's first Black carrier pilot, defending a nation that wouldn't even serve him in a bar. While much of America remained divided by segregation, Jesse and Tom joined forces as wingmen in Fighter Squadron 32. Adam Makos takes us into the cockpit as these bold young aviators cut their teeth at the world's most dangerous job—landing on the deck of an aircraft carrier—a line of work that Jesse's young wife, Daisy, struggles to accept. Deployed to the Mediterranean, Tom and Jesse meet the Fleet Marines, boys like PFC "Red" Parkinson, a farm kid from the Catskills. In between war games in the sun, the young men revel on the Riviera, partying with millionaires and even befriending the Hollywood starlet Elizabeth Taylor. Then comes the conflict that no one expected: the Korean War. *Devotion* takes us soaring overhead with Tom and Jesse, and into the foxholes with Red and the Marines as they battle a North Korean invasion. As the fury of the fighting escalates and the Marines are cornered at the Chosin Reservoir, Tom and Jesse fly, guns blazing, to try and save them. When one of the duo is shot down behind enemy lines and pinned

in his burning plane, the other faces an unthinkable choice: watch his friend die or attempt history's most audacious one-man rescue mission. A tug-at-the-heartstrings tale of bravery and selflessness, *Devotion* asks: How far would you go to save a friend?

Evaluation Report Feb 15 2022 New Leaders created the Effective Practice Incentive Community (EPIC) initiative in 2006 to learn from educators driving achievement gains in high-need urban schools. EPIC identifies school leaders and teachers whose students are making significant achievement gains and financially rewards these educators in exchange for sharing and documenting the practices that have contributed to the gains.

Since 2006, New Leaders has awarded over \$15.5 million to EPIC partner districts and charter schools and led them in a rigorous examination of their practices, culminating in the publication of video cases and practice profiles on the online EPIC Knowledge System. During the 2010-11 school year, New Leaders contracted with Rockman et al, an independent research firm, to evaluate pilots of the EPIC Leadership Development Model in one charter management organization and two urban school districts:

Friendship Public Charter Schools in Washington, DC (Friendship), Memphis City Schools (MCS), and District of Columbia Public Schools (DCPS). Each pilot program featured the model's core components--in-person sessions led by highly skilled facilitators who guide participants through a curriculum built on Knowledge System content; action-planning and applied learning assignments that help participants put EPIC tools and strategies to work in their own schools; videotaping of participants' practice; and consulting calls that support learning between sessions. The pilots allowed EPIC to design and test a set of technology-enriched components, including personal practice videos and online forums and consultancies, which gave

participants further opportunities to examine, share, and strengthen their leadership practices. This report summarizes the findings from the evaluation, which examined the EPIC Model's effectiveness and evolution over three iterations based on emerging local needs, and its impact on leadership practice. Evaluators collaborated with EPIC to design uniform instruments for use across sites, including session feedback forms, self-assessment surveys, and postsession and site-visit interview protocols. As part of the formative study, evaluators gathered feedback from participants on the effectiveness of EPIC's core components and factors that affected implementation. Evaluation findings show that the EPIC Leadership Development Model, piloted in three very different settings, had a positive impact on leadership practice and set in motion changes related to improved teaching and learning. Participants gained new skills, strategies, and resources to strengthen their own leadership practice and the practice of their teams and teachers. In addition to valuable and often immediate opportunities to implement new practices, participants had the benefit of being able to reflect on their experiences with colleagues and program facilitators. This cycle of learning, doing, and reflecting helped participants refine skills and strategies that proved successful. By considering less well-suited strategies, they also learned more about their own skills and styles and those of their leadership teams. (Contains 26 footnotes.).

Early Mapping of Southeast Asia Jan 02 2021 With dozens of rare color maps and other documents, *Early Mapping of Southeast Asia* follows the story of map-making, exploration and colonization in Asia from the 16th to the 19th centuries. It documents the idea of Southeast Asia as a geographical and cosmological construct, from the earliest of times up until the dawn of the modern era. Using maps, itineraries, sailing instructions, traveler's tales, religious texts and other contemporary sources, it examines the representation of Southeast Asia, both from the historical perspective of Western exploration and cartography, and also through the eyes of Asian neighbors. Southeast Asia has always occupied a special place in the imaginations of East and West. This book recounts the fascinating story of how Southeast Asia was, quite literally, put on the map, both in cartographic terms and as a literary and imaginative concept.

Mackinac Bridge Apr 05 2021 Although it will mean that their father can no longer make a living running a ferry boat, thirteen-year-old Mark and his brother Luke are excited about the building of a five-mile bridge across the Straits of Mackinac in Michigan in 1957.

Guide to Big Data Applications May 26 2020 This handbook brings together a variety of approaches to the uses of big data in multiple fields, primarily science, medicine, and business. This single resource features contributions from researchers around the world from a variety of fields, where they share their findings and experience. This book is intended to help spur further innovation in big data. The research is presented in a way that allows readers, regardless of their field of study, to learn from how applications have proven successful and how similar applications could be used in their own field. Contributions stem

from researchers in fields such as physics, biology, energy, healthcare, and business. The contributors also discuss important topics such as fraud detection, privacy implications, legal perspectives, and ethical handling of big data.

An Introduction to the Blue Humanities Jun 19 2022 An *Introduction to the Blue Humanities* is the first textbook to explore the many ways humans engage with water, utilizing literary, cultural, historical, and theoretical connections and ecologies to introduce students to the history and theory of water-centric thinking. Comprised of multinational texts and materials, each chapter will provide readers with a range of primary and secondary sources, offering a fresh look at the major oceanic regions, saltwater and freshwater geographies, and the physical properties of water that characterize the Blue Humanities. Each chapter engages with carefully chosen primary texts, including frequently taught works such as Herman Melville's *Moby-Dick*, Samuel Taylor Coleridge's "Rime of the Ancient Mariner," Homer's *Odyssey*, and Luis Vaz de Camões's *Lusíads*, to provide the perfect pedagogy for students to develop an understanding of the Blue Humanities chapter by chapter. Readers will gain insight into new trends in intellectual culture and the enduring history of humans thinking with and about water, ranging across the many coastlines of the World Ocean to Pacific clouds, Mediterranean lakes, Caribbean swamps, Arctic glaciers, Southern Ocean rainstorms, Atlantic groundwater, and Indian Ocean rivers. Providing new avenues for future thinking and investigation of the Blue Humanities, this volume will be ideal for both undergraduate and graduate courses engaging with the environmental humanities and oceanic literature.

Apollo Aug 09 2021 See:

The Inner Sea Jun 26 2020 "This book is about how the sea and seafaring shaped literary creativity in early modern Portugal during the most active, consequential decades of European overseas expansion. Josiah Blackmore understands "literary" in a broad sense, including a diverse archive spanning genres and disciplines: epic and lyric poetry, historical chronicles, nautical documents, ship logs and diaries, shipwreck narratives, geographic descriptions, and reference to texts of other seafaring powers and literatures of the period (including works from Spain,

Italy, Galician-Portugal, and Catalan). The centerpiece of the book, the great Luís de Camões, is arguably the sea poet par excellence of early modernity, not only of Portugal and Iberia, but of Europe more generally. Blackmore shows that the sea and nautical travel for Camões and his contemporaries were not merely historical realities in early modern Iberia during the age of discovery; they were also principles of cultural creativity that connect to larger critical debates in the widening field of the maritime humanities. For Blackmore, the sea, ships, and nautical travel unfold into a variety of empirical, metaphoric, and symbolic dimensions, and the oceans across the globe that were traversed in the fifteenth and sixteenth centuries correspond to oceans within the literary self, vast reaches and depths of emotion, consciousness, memory, and identity. Thus the sea and seafaring were not merely themes in textual culture but were also principles that created individual and collective subjects according to oceanic modes of perception, nautical modes of thought: a "maritime subject" that was one of the consequences of the sustained practice of navigation and imaginative engagements with the sea throughout the period. Blackmore concludes with a discussion of depth and sinking in shipwreck narratives as metaphoric and discursive dimensions of the maritime subject, foreshadowing empire's decline. The book will be welcomed by students of Iberian literature and culture, the maritime humanities, and those interested in maritime poetics beyond early modernity"--
