A captivating look at two centuries of surfing—"the Sport of Queens"—from Native Hawaiian royalty to the breakout style and jaw-dropping feats on the waves today. Few subjects in the world of sports and or the outdoors is more timely or compelling than women's surfing. From smart, strong, fearless women shattering records on 80-foot waves to professional athletes fighting for equal pay and a more fair and just playing field, these amazing, wave-riding warriors provide an inspirational and aspirational cast of powerful role models for women (and men) across all backgrounds and generations. Over the past two-hundred years, and especially the past five decades, the surfing lifestyle have become the envy of people around the world. The perception of sun, sand, surf, strong young women and their inimitable style, has created a booming lifestyle and sports industry—and the sport that is set to make it's Olympic exhibition debut in Tokyo 2021. A massive shift from when colonizers tried to extinguish all traces of Native Hawaiian surfing and its sacred culture. What is it about the

surfing that intrigues people of all ages, from all corners of the world? The beaches and idyllic locations? The unique style and mystique that surfers project? These women, on the beach and riding giant waves, or in the media, have made their mark on not just their sport, but our wider culture. *Women on Waves* is filled with phenomenal athletic performance, breakthrough female achievements, and plenty of inspiration and fun to see us through until the time when we can all hit the surf once more! Spanning a millennia, From Hawaii to Malibu, New York to Australia, South Africa to the South Pacific and beyond, Jim Kempton presents a fascinating new narrative that will captivate anyone who loves sports and the outdoors. A state-of-the-art review on the interaction of waves in ice covered waters is presented in this paper. Both experimental and theoretical aspects of the interaction of linear and nonlinear incident waves on continuous and pack ice are discussed. Wave energy dissipation processes are briefly mentioned. Wave watchers around the world know that no two waves are the same. Yet each and every wave that rises, peaks, and crashes onto the beach is generated by a much larger force originating thousands of miles away. Surf journalist team Evan Slater and Peter Taras capture the essence of waves and the swells that produce them in this breathtaking collection of wave photography. Slater characterizes four distinct swells from different corners of the globe and traces their journeys throughout the year from storm to seashore. His reflective, informative essays amplify these powerful images of hundreds of waves frozen in time, beautiful, simple, universal, yet wholly unique—and the best thing to watch on the planet. Set in a remote fishing village in Japan, *The Sound of Waves* is a timeless story of first love. A young fisherman is entranced at the sight of the beautiful daughter of the wealthiest man in the village. They fall in love, but must then endure the calumny and gossip of the villagers. From a brilliant Brookings Institution expert, an “important” (*The Wall Street Journal*) and “penetrating historical and political study” (*Nature*) of the critical role that oceans play in the daily struggle for global power, in the bestselling tradition of Robert Kaplan’s *The Revenge of Geography*. For centuries, oceans were the chessboard on which empires battled for supremacy. But in the nuclear age, air power and missile systems dominated our worries about security, and for the United States, the economy was largely driven by domestic production, with trucking and railways that crisscrossed the continent serving as the primary modes of commercial transit. All that has changed, as nine-tenths of global commerce and the bulk of energy trade is today linked to sea-based flows. A brightly painted forty-foot steel shipping container loaded in Asia with twenty tons of goods may arrive literally anywhere else in the world; how that really happens and who actually profits from it show that the struggle for power on the seas is a critical issue today. Now, in vivid, closely observed prose, Bruce Jones conducts us on a fascinating voyage through the great modern ports and naval bases—from the vast container ports of Hong Kong and Shanghai to the vital naval base of the American Seventh Fleet in Hawaii to the sophisticated security arrangements in the Port of New York. Along the way, the book illustrates how global commerce works, that we are amidst a global naval arms race, and why the oceans are so crucial to America’s standing going forward. As Jones reveals, the three great geopolitical struggles of our time—for military power, for economic dominance, and over our changing climate—are playing out atop, within, and below the world’s oceans. The essential question, he shows, is this: who will rule the waves and set the terms of the world to come? A riveting and rollicking tour-de-force about the terrifying power of nature’s most deadly phenomena — colossal waves — and the scientists and super surfers who are obsessed with them. The *New York Times* bestselling author of *The Devil’s Teeth* probes the dramatic convergence of baffling gargantuan waves that pummel oil rigs and sink massive ships, the extreme surfers willing to stare down death in order to ride them, and the marine scientists trying to unlock the physics of these waves, the climate changes that are provoking them, and what chaos they might wreak. Susan Casey explores the phenomenon of monster waves and how they have become an obsession for extreme surfers like Laird Hamilton — who serves as the author’s guide as she takes the reader into the intense, white-knuckle world of 100-foot waves. Music is, in one sense, merely a series of fleeting vibrations that arise and subside. How could it be that something so insubstantial fills us, and calms us, and makes us weep? Because, says W. A. Mathieu, music bridges mind and heart, self and other, and affirms our place in the world. Everyone uses the bridge of music, from casual listeners to devoted professionals. Mathieu’s delightful and trenchant prose asks you to question what music is, how it works, and how to understand its value in your life, in the life of your community, and in the evolution of the cosmos. “[A] rollicking narrative . . . Superb” --Ben Wilson, *Times*

?A brilliant telling of the history of the common seaman in the age of sail, and his role in Britain’s trade, exploration, and warfare British maritime history in the age of sail is full of the deeds of officers like Nelson but has given little voice to plain, “illiterate” seamen. Now Stephen Taylor draws on published and unpublished memoirs, letters, and naval records, including court-martials and petitions, to present these men in their own words. In this exhilarating account, ordinary seamen are far from the hapless sufferers of the press gangs. Proud and spirited, learned in their own fashion, with robust opinions and the courage to challenge overweening authority, they stand out from their less adventurous compatriots. Taylor demonstrates how the sailor was the engine of British prosperity and expansion up to the Industrial Revolution. From exploring the South Seas with Cook to establishing the East India Company as a global corporation, from the sea battles that made Britain a superpower to the crisis of the 1797 mutinies, these “sons of the waves” held the nation’s destiny in their calloused hands. A rigorous self-contained exposition of the mathematical theory for wave propagation and general ray theory in layered viscoelastic media. The haunting story of a family of dreamers and tale-tellers looking for home in an unwelcoming world. This exquisite and unusual magic realist debut, told in intensely lyrical prose by an award winning author, traces one girl’s migration from war to peace, loss to loss, home to home. Firuzeh and her brother Nour are children of fire, born in an Afghanistan fractured by war. When their parents, their Atay and Abay, decide to leave, they spin fairy tales of their destination, the mythical land and opportunities of Australia. As the family journeys from Pakistan to Indonesia to Nauru, heading toward a hope of home, they must rely on fragile and temporary shelters, strangers both mercenary and kind, and friends who vanish as quickly as they’re found. When they arrive in Australia, what seemed like a stable shore

gives way to treacherous currents. Neighbors, classmates, and the government seek their own ends, indifferent to the family's fate. For Firuzeh, her fantasy worlds provide some relief, but as her family and home splinter, she must surface from these imaginings and find a new way. Chased by their pasts and drawn toward a more hopeful future, four sisters embark on the journey of their lives--aboard the "Titanic." Weyn's take on the infamous disaster is wholly original.--"Booklist," starred review.

A biography of a staple grain we often take for granted, exploring how wheat went from wild grass to a world-shaping crop. At breakfast tables and bakeries, we take for granted a grain that has made human civilization possible, a cereal whose humble origins belie its world-shaping power: wheat. Amber Waves tells the story of a group of grass species that first grew in scattered stands in the foothills of the Middle East until our ancestors discovered their value as a source of food. Over thousands of years, we moved their seeds to all but the polar regions of Earth, slowly cultivating what we now know as wheat, and in the process creating a world of cuisines that uses wheat seeds as a staple food. Wheat spread across the globe, but as ecologist Catherine Zabinski shows us, a biography of wheat is not only the story of how plants ensure their own success: from the earliest bread to the most mouthwatering pasta, it is also a story of human ingenuity in producing enough food for ourselves and our communities. Since the first harvest of the ancient grain, we have perfected our farming systems to grow massive quantities of food, producing one of our species' global mega crops—but at a great cost to ecological systems. And despite our vast capacity to grow food, we face problems with undernourishment both close to home and around the world. Weaving together history, evolution, and ecology, Zabinski's tale explores much more than the wild roots and rise of a now-ubiquitous grain: it illuminates our complex relationship with our crops, both how we have transformed the plant species we use as food, and how our society—our culture—has changed in response to the need to secure food sources. From the origins of agriculture to gluten sensitivities, from our first selection of the largest seeds from wheat's wild progenitors to the sequencing of the wheat genome and genetic engineering, Amber Waves sheds new light on how we grow the food that sustains so much human life.

Waves in Oceanic and Coastal Waters describes the observation, analysis and prediction of wind-generated waves in the open ocean, in shelf seas, and in coastal regions with islands, channels, tidal flats and inlets, estuaries, fjords and lagoons. Most of this richly illustrated book is devoted to the physical aspects of waves. After introducing observation techniques for waves, both at sea and from space, the book defines the parameters that characterise waves. Using basic statistical and physical concepts, the author discusses the prediction of waves in oceanic and coastal waters, first in terms of generalised observations, and then in terms of the more theoretical framework of the spectral energy balance. He gives the results of established theories and also the direction in which research is developing. The book ends with a description of SWAN (Simulating Waves Nearshore), the preferred computer model of the engineering community for predicting waves in coastal waters.

After years of difficulty trying to have children, a young couple finally announce their pregnancy, only to have the most joyous day of their lives replaced with one of unexpected heartbreak. Their relationship is put to the test as they forge ahead, working together to rebuild themselves amidst the churning tumult of devastating loss, and ultimately facing the soul-crushing reality that they may never conceive a child of their own. Based on author Ingrid Chabbert's own experience, coupled with soft, sometimes dreamlike illustrations by Carole Maurel (Luisa: Now and Then), Waves is a deeply moving story that poignantly captures a woman's exploration of her pain in order to rediscover hope. Ideal as a classroom text or for individual study, this unique one-volume overview of classical wave theory covers wave phenomena of acoustics, optics, electromagnetic radiations, and more. There was a beautiful queen who was slender, with a long neck and brown hair falling on her back in silken tenuity. When she walks with an upright stature she is regarded with respect and esteem. Although pregnant, she was very active and did everything quickly and very skillfully. This text considers waves the great unifying concept of physics. With minimal mathematics, it emphasizes the behavior common to phenomena such as earthquake waves, ocean waves, sound waves, and mechanical waves. Topics include velocity, vector and complex representation, energy and momentum, coupled modes, polarization, diffraction, and radiation. 1974 edition. One of "The Most Fascinating Books WIRED Read in 2020" "One part science book, one part historical narrative, one part memoir . . . harrowing and inspiring."—The Wall Street Journal

How a determined scientist cracked the case of the first successful—and disastrous—submarine attack On the night of February 17, 1864, the tiny Confederate submarine HL Hunley made its way toward the USS Housatonic just outside Charleston harbor. Within a matter of hours, the Union ship's stern was blown open in a spray of wood planks. The explosion sank the ship, killing many of its crew. And the submarine, the first ever to be successful in combat, disappeared without a trace. For 131 years the eight-man crew of the HL Hunley lay in their watery graves, undiscovered. When finally raised, the narrow metal vessel revealed a puzzling sight. There was no indication the blast had breached the hull, and all eight men were still seated at their stations—frozen in time after more than a century. Why did it sink? Why did the men die? Archaeologists and conservationists have been studying the boat and the remains for years, and now one woman has the answers. In the Waves is much more than just a military perspective or a technical account. It's also the story of Rachel Lance's single-minded obsession spanning three years, the story of the extreme highs and lows in her quest to find all the puzzle pieces of the Hunley. Balancing a gripping historical tale and original research with a personal story of professional and private obstacles, In the Waves is an enthralling look at a unique part of the Civil War and the lengths one scientist will go to uncover its secrets. From legendary writer Paul Theroux comes an atmospheric novel following a big-wave surfer as he confronts aging, privilege, mortality, and whose lives we choose to remember. Mickey Muñoz has been called the "surfer's surfer," and is loved and respected among the cognoscenti for his contributions to surfing and the surfing life for the past 60 years as a surfer, a pioneer of Waimea Bay, a stuntman (stand-in for Gidget), a board shaper and designer, and as a sailor and boatbuilder (America's Cup). Mentored by the Malibu greats of the '40s, and an influence on generations of surfers since, Mickey weaves the story of a California waterman using his own life and that of his friends. Amimoto Ingersoll marks a critical turn away from land-based geographies to center the ocean as place. Developing the concept of seascape epistemology, she articulates an indigenous Hawaiian way of knowing founded on a sensorial, intellectual, and embodied literacy of the ocean. As the source from which Kʻnaka Maoli (Native Hawaiians) draw their essence and identity, the sea is foundational to Kanaka epistemology and ontology. Analyzing oral histories, chants, artwork, poetry, and her experience as a surfer, Ingersoll shows how this connection to the sea has been crucial to resisting two centuries of colonialism, militarism, and tourism. In today's neocolonial context—where continued occupation and surf tourism marginalize indigenous Hawaiians—seascape epistemology as expressed by traditional cultural practices such as surfing, fishing, and navigating provides the tools for generating an alternative indigenous politics and ethics. In relocating Hawaiian identity back to the waves, currents, winds, and clouds, Ingersoll presents a theoretical alternative to land-centric viewpoints that still dominate studies of place-making and indigenous epistemology. \*\*Winner of the 2016 Pulitzer Prize for Autobiography\*\* Included in President Obama's 2016 Summer Reading List "Without a doubt, the finest surf book I've ever read . . ." —The New York Times Magazine

Barbarian Days is William Finnegan's memoir of an obsession, a complex enchantment. Surfing only looks like a sport. To initiate, it is something else: a beautiful addiction, a demanding course of study, a morally dangerous pastime, a way of life. Raised in California and Hawaii, Finnegan started surfing as a child. He has chased waves all over the world, wandering for years through the South Pacific, Australia, Asia, Africa. A bookish boy, and then an excessively adventurous young man, he went on to become a distinguished writer and war reporter. Barbarian Days takes us deep into unfamiliar worlds, some of them right under our noses—off the coasts of New York and San Francisco. It immerses the reader in the edgy camaraderie of close male friendships forged in challenging waves. Finnegan shares stories of life in a whites-only gang in a tough school in Honolulu. He shows us a world turned upside down for kids and adults alike by the social upheavals of the 1960s. He details the intricacies of famous waves and his own apprenticeships to them. Youthful folly—he drops LSD while riding huge Honolua Bay, on Maui—is served up with rueful humor. As Finnegan's travels take him ever farther afield, he discovers the picturesque simplicity of a Samoan fishing village, dissects the sexual politics of Tongan interactions with Americans and Japanese, and navigates the Indonesian black market while nearly succumbing to malaria. Throughout, he surfs, carrying readers with him on rides of harrowing, unprecedented lucidity. Barbarian Days is an old-school adventure story, an intellectual autobiography, a social history, a literary road movie, and an extraordinary exploration of the gradual mastering of an exacting, little-understood art. The Bestselling Classic Updated for Surfers, Sailors, Oceanographers, Climate Activists, and Those Who Love the Sea First published in 1963 and updated in 1979, this classic was an essential handbook for anyone who studies, surfs, protects, or is fascinated by the ocean. The original author, Willard Bascom, was a master of the subject and included a wealth of information, based on theory and statistics, but also anecdotal observation and personal experience. It brought to the general public understanding of the awesome and complex power of the waves. This revision from Kim McCoy adds recent facts and anecdotes to update the book's relevance in the time of climate change. One of the most significant effects of global warming will be sea-level rise. What will this mean to waves and beaches, and what effects are we already seeing? New text and photos cover events such as the Indian Ocean tsunami of 2004, Hurricane Katrina flooding of 2005, and the 2011 earthquake and resulting devastation in Fukushima. As well as students, surfers, and the general public, this updated edition of a beloved classic is an essential handbook for climate scientists and ocean activists, providing clear explanations and detailed resources for the constant battle to preserve the shore. Balancing concise mathematical analysis with real-world examples and practical applications, to provide a clear and approachable introduction to wave phenomena. A wry and poignant debut novel about a man's search for true connection that is "both knowing and cutting, a satire of internet culture that is also a moving portrait of a lost human being" (Los Angeles Times). "A knowing and thought-provoking exploration of love, modern isolation, and what it means to exist—especially as a person of color—in our increasingly digital age."—Celeste Ng, bestselling author of Everything I Never Told You and Little Fires Everywhere

Lucas and Margo are fed up. Margo is a brilliant programmer tired of being talked over as the company's sole black employee, and while Lucas is one of many Asians at the firm, he's nearly invisible as a low-paid customer service rep. Together, they decide to steal their tech startup's user database in an attempt at revenge. The heist takes a sudden turn when Margo dies in a car accident, and Lucas is left reeling, wondering what to do with their secret—and wondering whether her death really was an accident. When Lucas hacks into Margo's computer looking for answers, he is drawn into her private online life and realizes just how little he knew about his best friend. With a fresh voice, biting humor, and piercing observations about human nature, Kevin Nguyen brings an insider's knowledge of the tech industry to this imaginative novel. A pitch-perfect exploration of race and startup culture, secrecy and surveillance, social media and friendship, New Waves asks: How well do we really know one another? And how do we form true intimacy and connection in a tech-obsessed world? Praise for New Waves "Nguyen's stellar debut is a piercing assessment of young adulthood, the tech industry, and racism. . . . Nguyen impressively holds together his overlapping plot threads while providing incisive criticism of privilege and a dose of sharp humor. The story is fast-paced and fascinating, but also deeply felt; the effect is a page-turner with some serious bite."—Publishers Weekly (starred review) "A blistering sendup of startup culture and a sprawling, ambitious, tender debut."—Kirkus Reviews (starred review)

A companion to "The Forest of Hands and Teeth." Gabry lives a quiet life—as safe as is possible in a world teeming with the dead. During one reckless moment, half of Gabry's generation is dead, the other half imprisoned, and Gabry must save herself and the one she loves. This beautiful—and educational—book taps into the endless fascination that ocean waves hold for people worldwide, even those who don't live near a coastline. With page after page of stunning photos, it is a one-of-a-kind collection of wave phenomena, together with scientific background on the interaction between land and sea. 143 color photos. world of sound from musician and sonic healer Lavender Suarez. This is a story of tides and coastlines, winds and waves, islands and beaches. It is also a retelling of indigenous creativity, agency, and resistance in the face of unprecedented globalization and violence. *Waves Across the South* shifts the narrative of the Age of Revolutions and the origins of the British Empire; it foregrounds a vast southern zone that ranges from the Arabian Sea and southwest Indian Ocean across to the Bay of Bengal, and onward to the South Pacific and the Tasman Sea. As the empires of the Dutch, French, and especially the British reached across these regions, they faced a surge of revolutionary sentiment. Long-standing venerable Eurasian empires, established patterns of trade and commerce, and indigenous practice also served as a context for this transformative era. In addition to bringing long-ignored people and events to the fore, Sujit Sivasundaram opens the door to new and necessary conversations about environmental history, the consequences of historical violence, the legacies of empire, the extraction of resources, and the indigenous futures that Western imperialism cut short. The result is nothing less than a bold new way of understanding our global past, one that also helps us think afresh about our shared future. New York : Wiley, c1985.

In the wake of WWII, a grieving fisherman submits a poem to a local newspaper: a rallying cry for hope, purpose . . . and rocks. Send me a rock for the person you lost, and I will build something life-giving. When the poem spreads farther than he ever intended, Robert Bliss's humble words change the tide of a nation. Boxes of rocks inundate the tiny, coastal Maine town, and he sets his calloused hands to work, but the building halts when tragedy strikes. Decades later, Annie Bliss is summoned back to Ansel-by-the-Sea when she learns her Great-Uncle Robert, the man who became her refuge during the hardest summer of her youth, is now the one in need of help. What she didn't anticipate was finding a wall of heavy boxes hiding in his home. Long-ago memories of stone ruins on a nearby island trigger her curiosity, igniting a fire in her anthropologist soul to uncover answers. She joins forces with the handsome and mysterious harbor postman, and all her hopes of mending the decades-old chasm in her family seem to point back to the ruins. But with Robert failing fast, her search for answers battles against time, a foe as relentless as the ever-crashing waves upon the sea. A brave, intimate, beautifully crafted memoir by a survivor of the tsunami that struck the Sri Lankan coast in 2004 and took her entire family.

On December 26, Boxing Day, Sonali Deraniyagala, her English husband, her parents, her two young sons, and a close friend were ending Christmas vacation at the seaside resort of Yala on the south coast of Sri Lanka when a wave suddenly overtook them. She was only to learn later that this was a tsunami that devastated coastlines through Southeast Asia. When the water began to encroach closer to their hotel, they began to run, but in an instant, water engulfed them, Sonali was separated from her family, and all was lost. Sonali Deraniyagala has written an extraordinarily honest, utterly engrossing account of the surreal tragedy of a devastating event that all at once ended her life as she knew it and her journey since in search of understanding and redemption. It is also a remarkable portrait of a young family's life and what came before, with all the small moments and larger dreams that suddenly and irrevocably ended. A visually stunning journey across the world's oceans, featuring soulful surfers living with purpose "The women in this book are my sea sisters and I believe that by sharing these remarkable stories, we inspire other women to make wiser and more empowered choices in their own lives."—Kassia Meador, former pro-longboarder and founder of Kassia+Surf Women Making Waves is a celebration of the sisterhood of surfing, featuring extraordinary women from the United States, Philippines, Mexico, Australia, Senegal, Japan, France, and beyond. Author Lara Einzig profiles more than two dozen inspiring female surfers from around the globe—from activists to artists—who are breaking new ground on land and finding healing, joy, and community in the water. There is Maya Gabeira, a Brazilian woman who surfed the biggest wave of anyone in 2020; Bonnie Wright, the British actress, activist, and author; Risa Mara Machuca, who runs a free surfing camp in Mexico for local children; and Zara Noruzi, an Iranian exile who found peace on the water in Australia. Through candid interviews on the transformational power of surfing, and with immersive photography of beautiful beaches, surf shacks, and favorite breaks, Einzig captures the life-altering strength and resilience that these women discover in their connection to the waves. *Women Making Waves* captures the innate, spiritual essence of our connection to the ocean, inviting us all to paddle out. Instagram sensation Clark Little shares his most remarkable photographs from inside the breaking wave, with a foreword by world surfing champion Kelly Slater. "One of the world's most amazing water photographers . . . Now we get to experience up-close these moments of bliss."—Jack Johnson, musician and environmentalist Surfer and photographer Clark Little creates deceptively peaceful pictures of waves by placing himself under the deadly lip as it is about to hit the sand. "Clark's view" is a rare and dangerous perspective of waves from the inside out. Thanks to his uncanny ability to get the perfect shot--and live to share it--Little has garnered a devout audience, been the subject of award-winning documentaries, and become one of the world's most recognizable wave photographers. *Clark Little: The Art of Waves* compiles over 150 of his images, including crystalline breaking waves, the diverse marine life of Hawaii, and mind-blowing aerial photography. This collection features his most beloved pictures, as well as work that has never been published in book form, with Little's stories and insights throughout. Journalist Jamie Brisick contributes essays on how Clark gets the shot, how waves are

After the 1st wave, only darkness remains. After the 2nd, only the lucky escape. And after the 3rd, only the unlucky survive. After the 4th wave, only one rule applies: trust no one. Now, it's the dawn of the 5th wave, and on a lonely stretch of highway, Cassie runs from Them. The beings who only look human, who roam the countryside killing anyone they see. Who have scattered Earth's last survivors. To stay alone is to stay alive, Cassie believes, until she meets Evan Walker. Beguiling and mysterious, Evan Walker may be Cassie's only hope for rescuing her brother--or even saving herself. But Cassie must choose: between trust and despair, between defiance and surrender, between life and death. To give up or to get up. "Wildly entertaining . . .
