Go beyond the
regular curriculum
with these units to
challenge your
more able
intermediate grade
math students. With
their ease of use,
clear instructions,
and motivating
topics, these are
the perfect

enrichment
activities for the
regular math
curriculum. This
book contains four
units that are
structured so that
students can easily
develop an
understanding of
the topics on their
own. The four
topics are:
permutations and
combinations,
tessellations, line
drawings, and
graphing. Each unit
provides sequential
activities that allow
students to work
through these
motivating topics,
whether they are
working by

themselves, in a
small group, or in a
whole-class setting.
The units lend
themselves easily to
a math center
arrangement with
each student having
an individual folder
and checklist to
record his or her
progress. While
they were designed
to provide added
challenge for
students who have
mastered the
regular curriculum,
some of the units
can be used as
supplements for
whole-class
instruction. The
emphasis in these
units is on

promoting thinking, developing perseverance, expanding students' view of mathematics, enjoying a challenge, and keeping math students actively involved and enthused about math. This book will help you provide students with opportunities to explore mathematical ideas in ways that promote their intellectual growth and expand their views of mathematics.

Eureka helps students to truly understand math, connect it to the real world, and prepare them to

solve problems they haven't encountered before. The team of teachers and mathematicians who created Eureka Math believe that it is not enough for students to know the process for solving a problem; they need to know why that process works. Eureka presents math as a story, one that develops from grades PK through 12. In A Story of Units, our elementary curriculum, this sequencing has joined with the methods of instruction that have been proven to work, in this nation and abroad.
