[Traces and Memories of Slavery in the Atlantic World](#) Dec 21 2019 Traces and Memories deals with the foundation, mechanisms and scope of slavery-related memorial processes, interrogating how descendants of enslaved populations reconstruct the history of their ancestors when transatlantic slavery is one of the variables of the memorial process. While memory studies mark a shift from concern with historical knowledge of events to that of memory, the book seeks to bridge the memorial representations of historical events with the production and knowledge of those events. The book offers a methodological and epistemological reflection on the challenges that are raised by archival limitations in relation to slavery and how they can be overcome. It covers topics such as the historical and memorial legacy/ies of slavery, the memorialization of slavery, the canonization and patrimonialization of the memory of slavery, the places and conditions of the production of knowledge on slavery and its circulation, the heritage of slavery and the (re)construction of (collective) identity. By offering fresh perspectives on how slavery-related sites of memory have been retrospectively (re)framed or (re)shaped, the book probes the constraints which determine the inscription of this contentious memory in the public sphere. The volume will serve as a valuable resource in the area of slavery, memory, and Atlantic studies.

Ancestral Memory in Early China Jan 26 2023 Ancestral ritual in early China was an orchestrated dance between what was present (the offerings and the living) and what was absent (the ancestors). The interconnections among the tangible elements of the sacrifice were overt and almost mechanical, but extending those connections to the invisible guests required a medium that was itself invisible. Thus in early China, ancestral sacrifice was associated with focused thinking about the ancestors, with a structured mental effort by the living to reach out to the absent forebears and to give them shape and existence. Thinking about the ancestors—about those who had become distant—required active deliberation and meditation, qualities that had to be nurtured and learned. This study is a history of the early Chinese ancestral cult, particularly its cognitive aspects. Its goals are to excavate the cult's color and vitality and to quell assumptions that it was no more than a simplistic and uninspired exchange of food for longevity, of prayers for prosperity. Ancestor worship was not, the author contends, merely mechanical and thoughtless. Rather, it was an idea system that aroused serious debates

about the nature of postmortem existence, served as the religious backbone to Confucianism, and may even have been the forerunner of Daoist and Buddhist meditation practices.

The Cauldron of Memory Mar 28 2023 Many of us long to walk in the footsteps of our ancestors and take part in the sacred traditions of past generations. As a vitally important lineage bearer of your ancestors, you have the ability to tap into a wealth of hereditary knowledge for spiritual health, personal transformation, and enlightenment. The Cauldron of Memory is a groundbreaking book that teaches you how to retrieve ancestral memory, based on the emerging science of morphogenesis and the theory that ancestral memory is stored within our DNA as energy. Raven Grimassi guides you through an effective and powerful system of creative visualization, magical techniques, meditations, and pathworkings for each of your three inner levels: regeneration, abundance, and enlightenment. Reconstruct pagan rituals and works of magic, relive sacred rites, communicate with otherworldly beings, contact your spirit guides, and unearth long-buried mysteries. Reconstructionists, eclectics, and traditionalists alike will discover empowering techniques for calling forth a treasury of ancestral wisdom. Discover the living ancestral memory at the core of your own spiritual center and reclaim the hidden vessel of your ancestral lineage--the Cauldron of Memory.

A House in the Homeland Oct 31 2020 A powerful examination of soulful journeys made to recover memory and recuperate stolen pasts in the face of unspeakable histories. Survivors of the Armenian Genocide of 1915 took refuge across the globe. Traumatized by unspeakable brutalities, the idea of returning to their homeland was unthinkable. But decades later, some children and grandchildren felt compelled to travel back, having heard stories of family wholeness in beloved homes and of cherished ancestral towns and villages once in Ottoman Armenia, today in the Republic of Turkey. Hoping to satisfy spiritual yearnings, this new generation called themselves pilgrims—and their journeys, pilgrimages. Carel Bertram joined scores of these pilgrims on over a dozen pilgrimages, and amassed accounts from hundreds more who made these journeys. In telling their stories, A House in the Homeland documents how pilgrims encountered the ancestral house, village, or town as both real and metaphorical centerpieces of family history. Bertram recounts the moving, restorative connections pilgrims made, and illuminates how the ancestral house, as a spiritual place, offers an opening to a wellspring of humanity in sites that might otherwise be defined solely by tragic loss. As an exploration of the powerful links between memory and place, house and homeland, rupture and continuity, these Armenian stories reflect the resilience of diaspora in the face of the savage reaches of trauma, separation, and exile in ways that each of us, whatever our history, can recognize.

Children, Memory, and Family Identity in Roman Culture Jun 26 2020 Investigations into the daily life of Roman families show that children were key actors in the process of the construction of social memory: they were the pivotal point of the transmission of family tradition and values in both elite and non-elite families. This collection of essays draws together the perspectives of various disciplines to provide a multifaceted picture of the Roman family based on a wide range of evidence drawn from the 1st century BCE to Late Antiquity and the Christian period. The contributors define the notion of memory, discuss the role of children in the transmission of social memory and social identities, and also deal with threats to familial memory, in the cases of children deliberately or accidentally excluded from tradition, long believed to be invisible, such as those born at home to slaves, or outcast because of illness or their unusual status, for example as the offspring of an incestuous relationship.

Spirit Memory Feb 21 2020 How spirit memories affect your life choices This courageous true story takes you on a journey with a woman who leaves her successful business life in Ottawa, and moves to the west coast of Canada to immerse herself in the healing renaissance taking place amongst the Coast Salish First Nations. She marries Wade, a member of a prominent hereditary chieftanship family. In the process of helping him walk his healing path, she starts a spiritual archeological journey into the forgotten wisdom of her own ancient Hungarian past. It is a very personal account of how ancestral issues across two cultures, and past DNA memory, spirit memory, affects decision making and life choices in the present.

Rewriting Saints and Ancestors Apr 29 2023 Thinkers in medieval France constantly reconceptualized what had come before, interpreting past events to give validity to the present and help control the future. The long-dead saints who presided over churches and the ancestors of established dynasties were an especially crucial part of creative memory, Constance Brittain Bouchard contends. In *Rewriting Saints and Ancestors* she examines how such ex post facto accounts are less an impediment to the writing of accurate history than a crucial tool for understanding the Middle Ages. Working backward through time, Bouchard discusses twelfth-century scribes contemplating the ninth-century documents they copied into cartularies or reworked into narratives of disaster and triumph, ninth-century churchmen deliberately forging supposedly late antique documents as weapons against both kings and other churchmen, and sixth- and seventh-century Gallic writers coming to terms with an early Christianity that had neither the saints nor the monasteries that would become fundamental to religious practice. As they met with political change and social upheaval, each generation decided which events of the past were worth remembering and which were to be reinterpreted or quietly forgotten. By considering memory as an analytic tool, Bouchard not only reveals the ways early medieval writers constructed a useful past but also provides new insights into the nature of record keeping, the changing ways dynasties were conceptualized, the relationships of the Merovingian and Carolingian kings to the church, and the discovery (or invention) of Gaul's earliest martyrs.

Heaven on Earth Dec 01 2020 Spiritual healing in ancestral genetic memory reconciles the hurt emotions of ancestral spirits who wish to be released from their emotional trauma. This compassionate process in the presence of a living relative and a highly skilled spiritual healer, enables the healed ancestor to continue their journey to their spiritual home. This collection of stories is shared by Angel Manu, a m?ori matakite. She has been gifted with the "Tohu" of reconciling the fiery amber of a soul's past hurts with the milky veil of human transgressions. This divine process has been shared to help us understand the healing of the heart in our earthbound ancestors so that we can become happier souls on earth.

[The Archaeology of Ancestors](#) Dec 25 2022 Contributors to this landmark volume demonstrate that ancestor veneration was about much more than claiming property rights: the spirits of the dead were central to domestic disputes, displays of wealth, and power and status relationships. Case studies from China, Africa, Europe, and Mesoamerica use the evidence of art, architecture, ritual, and burial practices to explore the complex roles of ancestors in the past. Including a comprehensive overview of nearly two hundred years of anthropological research, *The Archaeology of Ancestors* reveals how and why societies remember and revere the dead. Through analyses of human remains, ritual deposits, and historical documents, contributors explain how ancestors were woven into the social fabric of the living.

Mesoamerican Memory Jun 07 2021 Euro-Americans see the Spanish conquest as the main event in the five-century history of Mesoamerica, but the people who lived there before contact never gave up their own cultures. Both before and after conquest, indigenous scribes recorded their communities' histories and belief systems, as well as the events of conquest and its effects and aftermath. Today, the descendants of those native historians in modern-day Mexico and Guatemala still remember their ancestors' stories. In Mesoamerican Memory, volume editors Amos Megged and Stephanie Wood have gathered the latest scholarship from contributors around the world to compare these various memories and explore how they were preserved and altered over time. Rather than dividing Mesoamerica's past into pre-contact, colonial, and modern periods, the essays in this volume emphasize continuity from the pre-conquest era to the present, underscoring the ongoing importance of indigenous texts in creating and preserving community identity, history, and memory. In addition to Nahua and Maya recollections, contributors examine the indigenous traditions of Mixtec, Zapotec, Tarascan, and Totonac peoples. Close analysis of pictorial and alphabetic manuscripts, and of social and religious rituals, yields insight into community history and memory, political relations, genealogy, ethnic identity, and portrayals of the Spanish invaders. Drawing on archaeology, art history, ethnology, ethnohistory, and linguistics, the essays consider the function of manuscripts and ritual in local, regional, and, now, national settings. Several scholars highlight direct connections between the collective memory of indigenous communities and the struggles of contemporary groups. Such modern documents as land titles, for example, gain legitimacy by referring to ancestral memory. Crossing disciplinary,

methodological, and temporal boundaries, *Mesoamerican Memory* advances our understanding of collective memory in Mexico and Guatemala. Through diverse sources—pictorial and alphabetic, archaeological, archival, and ethnographic—readers gain a glimpse into indigenous remembrances that, without the research exhibited here, might have remained unknown to the outside world.

The Evolution of Memory Systems Feb 27 2023 Current theories about human memory have been shaped by clinical observations and animal experiments. This doctrine holds that the medial temporal lobe subserves one memory system for explicit or declarative memories, while the basal ganglia subserves a separate memory system for implicit or procedural memories, including habits. Cortical areas outside the medial temporal lobe are said to function in perception, motor control, attention, or other aspects of executive function, but not in memory. 'The Evolution of Memory Systems' advances dramatically different ideas on all counts. It proposes that several memory systems arose during evolution and that they did so for the same general reason: to transcend problems and exploit opportunities encountered by specific ancestors at particular times and places in the distant past. Instead of classifying cortical areas in terms of mutually exclusive perception, executive, or memory functions, the authors show that all cortical areas contribute to memory and that they do so in their own ways—using specialized neural representations. The book also presents a proposal on the evolution of explicit memory. According to this idea, explicit (declarative) memory depends on interactions between a phylogenetically ancient navigation system and a representational system that evolved in humans to represent one's self and others. As a result, people embed representations of themselves into the events they experience and the facts they learn, which leads to the perception of participating in events and knowing facts. 'The Evolution of Memory Systems' is an important new work for students and researchers in neuroscience, psychology, and biology.

Pell Mellers Jan 02 2021 "This fascinating memoir about the Pell Meller community of northeastern North Carolina reads like a murder mystery. What has been murdered is the truth about their ancestry, and Johnson sets out bravely to discover the corpse, the murderer, and the motives."--Lisa Alther, author of "Kinfolks: Falling Off the Family Tree."

Ancestral Impressions Mar 24 2020 Life is like a book still being written—the future is nothing but blank pages, but the past exists in rich volumes written through time. Although they may depart physically, ancestors etch an indelible mark with a powerful influence over an individual's life. This influence holds insight into many of life's puzzling aspects. Are the secrets, fears, and superstitions of ancestors responsible for modern beliefs? Have long-lived family patterns emerged into daily life? Perhaps most importantly, how does it all make an impact today, and how can it affect the future? Tapping into this knowledge is the key to personal growth and discovery. *Ancestral Impressions* is an interactive guide to a journey into the four realms of ancestral memory through the creative process. With narrative, personal reflection, and activities such as collage, writing, drawing, and painting, readers will explore the personalities, culture, and impact of genealogy on life today. Every individual owes existence to someone from the past. The tales of those ancestors are still waiting to be told to all who are willing to learn how to listen.

Our Ancestors, Our Stories Jan 22 2020 Our Ancestors, Our Stories offers insights into the African American experience in Edgefield County, South Carolina through the eyes of five very different authors. These family historians and storytellers have come together to share their family stories to inspire and encourage others, and to keep alive the memories of their ancestors.

A Family History of Illness Sep 29 2020 While in the ICU with a near-fatal case of pneumonia, Brett Walker was asked, Do you have a family history of illness? a standard and deceptively simple question that for Walker, a professional historian, took on additional meaning and spurred him to investigate his family's medical past. In this deeply personal narrative, he constructs a history of his body to understand his diagnosis with a serious immunological disorder, weaving together his dying grandfathers sneaking a cigarette in a shed on the family's Montana farm, blood fractionation experiments in Europe during World War II, and nineteenth-century cholera outbreaks that ravaged small American towns as his ancestors were making their way west. A Family History of Illness is a gritty historical memoir that examines the body's immune system and microbial composition as well as the biological and cultural origins of memory and history, offering a startling, fresh way to view the role of history in understanding our physical selves. In his own search, Walker soon realizes that this broader scope is more valuable than a strictly medical family history. He finds that family legacies shape

us both physically and symbolically, forming the root of our identity and values, and he urges us to renew our interest in the past or risk misunderstanding ourselves and the world around us.

Stories from My Family Tree May 06 2021 Why did so many of great-great grandmother's children die young? Were those great aunts really on speaking terms with Mr Marks and Mr Spencer? Did great grandfather actually run away to live with Native Americans? And what was 'the piece of gold' that grandfather once owned? Every family is packed with stories like these about ancestors: some shocking, some humorous, some sad. Stories from Your Family Tree will inspire readers to pursue and explore the stories in their own family trees. Starting with snippets of gossip, anecdotes, hunches, sayings, heirlooms and documents, Ruth A. Symes sets out to investigate twelve of the tantalising family tales with which she grew up. This book uncovers the secrets of lives that were lived in Britain and its Empire from the reign of Queen Victoria, through the early years of the twentieth century and up to the Blitz. Through careful use of a range of sources, from cookery books and ornaments, to more formal certificates and census returns, the stories are confirmed, disproved, shown to be exaggerations and - in some cases - revealed to be less odd than the truth. These stories will shed light on many aspects of the social history of the last 150 years, including matters which may well have affected your family such as disease and childhood mortality, emigration, women's work and funerary customs. Brimming with useful research tips, this book will enable as well as entertain.

Promise on a Parchment Aug 29 2020 Following on from Tale on a Parchment (Book I of the trilogy) Promise on a Parchment finds archaeologists Tara and Alex delving further into the story of Macha, the remarkable seventh century Irish "old-soul" young woman. With the life of Macha told through the writings of her tutor-monk Suibhne, Alex, finds outside evidence that Suibhne's account is not an invented story and that Macha was very real indeed. Alex's wife Tara continues to be pushed and pulled by the ancestors or ancestral memory, and the enigmatic recluse Christopher Woodbean only complicates matters more. We also witness Macha's new life in the small Welsh kingdom of Brycheiniog, as wife and partner to Dewi, the youngest son of King Rhiwallon. When a tragedy compels Dewi to visit the Holy Land, Macha must learn to cope without him as she waits for his return. Dewi is not to return soon, however, as he has been badly injured, losing much of his memory and now taken in by a Muslim bedouin tribe. What transpires while he is away, how he ends up returning home and Macha's role in it all makes for a carefully crafted account of an unshakable, abiding love, tenacious courage, an unquestioning belief in things unseen...and a little bit of help from the ancestors. The story of Macha and Dewi is woven into historical accounts of real people, places and events in mid-seventh century Wales and beyond. The experiences she shares with other people and other places, and even Tara in the twenty-first century, underscores a common thread that runs through us all...something the ancestors won't let us forget.
