Poetry. WINTER, THE UNWELCOME VISITOR is a five-section poetic cycle amending the ordinary with the extraordinary. The work shows versatility in style and form and yet maintains poetic excellence: a careful balance of metaphor, imagery and thought. Always experimental, there is no one style that characterizes the book. From brief and academic, to wordy and effusive, the style shifts according to the subject. Unstintingly political, unforgivingly critical of commonly held ideas about the relationship of humans to the natural world and to each other, the relevance of this work to both a Canadian and an international audience is undeniable. Going beyond both traditional liberal theories of democracy and Marxist theories of civil society, leading international scholars rethink the relations between the individual and the state, community and family. They assess how social and political participation is changing in the modern world, investigate the historical roots of citizenship and its development alongside the nation state and urban society, and relate it to

issues of welfare and the market. The final chapter asks whether the subordination of nation states to supranational institutions will replace state citizenship with a global conception of human rights. InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects. In this collection of essays, Michael Walzer discusses how obligations are incurred, sustained, and (sometimes) abandoned by citizens of the modern state and members of political parties and movements as they respond to and participate in the most crucial and controversial aspects of citizenship: resistance, dissent, civil disobedience, war, and revolution. Walzer approaches these issues with insight and historical perspective, exhibiting an extraordinary understanding for rebels, radicals, and rational revolutionaries. The reader will not always agree with Walzer but he cannot help being stimulated, excited, challenged, and moved to thoughtful analysis. A hands-on

Mashiro, a hermaphrodite high school student, joins a "special" dream class to become completely male but faces obstacles from other students along the way. A guide to the information services and sources provided to 100 types of small business by associations, consultants, educational programs, franchisers, government agencies, reference works, statisticians, suppliers, trade shows, and venture capital firms. The question of globalisation - how it should be defined and what are its implications for the developing countries - is a recurring theme in policy discussions at the national, regional and international

levels, given the importance of the phenomenon and its role in shaping contemporary international economic relations. Drawing on papers presented at, and written specifically for, the international symposium on 'Globalisation - A Strategic Response from the South', organized by the University of the West Indies, this offering adds to that body literature which examines, among other things, the significance of the loss of preferential trading arrangements for developing countries, including the small-island economies of the Caribbean. In addition it identifies strategies that could be adopted by these countries in responding to the challenges presented by the emergence of an increasingly liberalized and competitive global economy. *Globalisation: A Calculus of Inequality* essentially reflects perspectives from the South on the merits and demerits of globalisation and economic liberalization at a time when North and South are engaged in a number of critical negotiations that will inevitably determine the future

distribution of economic benefits among the world's people. The contributors to this volume, drawn from the academic community, international organisations and the private sector, are: Denis Benn, Richard Bernal, Byron Blake, Jessica Byron, Norman Girvan, Branislav Gosovic, John Ohiorhenuan, Charles Ross, Clive Thomas and Manuela Tortora. For most of the twentieth century, modernity has been characterised by the formalisation of social relations as face to face interactions are replaced by impersonal bureaucracy and finance. As we enter the new millennium, however, it becomes increasingly clear that it is only by stepping outside these formal structures that trust and co-operation can be created and social change achieved. In a brilliant theoretical tour de force, illustrated with sustained case studies of changing societies in the former eastern Europe and of changing forms of interaction within so-called virtual communities, Barbara Misztal, argues that only the society that achieves an appropriate balance between the

informality and formality of interaction will find itself in a position to move forward to further democratisation and an improved quality of life. This text examines regionalism from the perspective of developing countries. It presents a comprehensive account of existing theory and empirical results and incorporates the findings of formal analyses of the politics and dynamics of regionalism. This broad-ranging text offers an analysis of the idea of citizenship and its relevance to social problems and social policies in advanced industrial societies. Twine demonstrates that two concepts are essential to an understanding of the issue of citizenship: the socially embedded nature

of human agents, and their interdependence both with each other and with the natural and social worlds they inhabit. Twine emphasizes the social nature of individual needs and individual rights. He shows that interdependence is not limited to the mutual linkages within advanced industrial societies, but extends both to the relations between advanced and developing nations and to the environmental contexts of human existence. There's no question . . . Divorce Sucks. And perhaps no one knows that better than author Mary Jo Eustace, whose ex-husband Dean McDermott married Tori Spelling a mere thirty days after their divorce was finalized. One part tell-all and one part guide to get readers on their feet after a bitter breakup, this hilarious addition to the bestselling Sucks series tells everything readers don't want to know

about divorce - from what a phone call with a lawyer will cost; to how to handle your newer, younger replacement; to what Hollywood divorcees are actually thinking when they watch their ex walk the red carpet with a millionairess. Sometimes horrifying, sometimes gratifying, and never merciful, this book will give readers an inside look at one of today's most public divorces while reminding them - hey, it could always be worse. This book shows how legal, political, social, and participation rights are systematically related to liberties, claims and immunities. Providing a timely contribution to the ongoing questions surrounding topics which are by definition subject to varying stakeholder interpretations, this book addresses "the missing link" between theoretical CSR concepts and everyday management practice. It acts as a guide to awaken managers to the advantages of adopting a CSR "mindset" when developing sustainable business strategies. The book consists of three parts: 1) A theoretical realm which establishes the key concepts and

rationale for the adoption of a sustainable CSR approach, 2) A practical realm which addresses putting CSR and sustainability into business practice, 3) An educational realm which proposes how to incorporate the concepts into teaching and training.

Mount Kilimanjaro is the tallest peak in Africa, rising 19,340 feet above the surrounding plains. For hundreds of years it has been called the “shining mountain” by local people. They gave it this name because the top is covered with glittering glacier ice and snow. It is one of the most beautiful mountains in the world. In recent decades local people and tourists have noticed that there is less and less ice and snow on the mountain each year. Most scientists believe that the glaciers are disappearing because of changes in the weather of eastern Africa, and because of human actions. How is the ice disappearing? Who will be affected by the loss of the glaciers? What can you do to help? These questions are answered in the pages of this book. This volume offers an incisive overview of central issues and

controversies in political thought and analysis. It includes major discussions of the idea of the modern state, contemporary theories of the state, problems of power and legitimation, new forms of democratic ideal, citizenship and social movements, the direction of public policy and the fate of sovereignty in the modern global system. While analysing these topics, the author critically assesses the thought of many of those who have contributed decisively to political discussion. Among those whose works are discussed are classic figures such as Hobbes, Locke, Mill and Marx, as well as contemporary writers such as Habermas, Offe and Giddens. Political Theory and the Modern State is an ideal resource for students seeking an introduction to modern politics and political sociology. It is also an original statement about the many competing perspectives in political thought today.
