The Technology Manual compiles the appendices found in the previous edition of A Problem Solving Approach to Mathematics for Elementary School Teachers into a convenient supplement for those who integrate technology into their course. Chapters offer tutorials for using spreadsheets, graphing calculator and geometry drawing utility software in the course. Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - June) Established in 1911, The Rotarian is the official magazine of Rotary International and is circulated worldwide. Each issue contains feature articles, columns, and departments about, or of interest to, Rotarians. Seventeen Nobel Prize winners and 19 Pulitzer Prize winners - from Mahatma Ghandi to Kurt Vonnegut Jr. - have written for the magazine. Many problems of numerical analysis can be solved with the aid of modern electronic desk calculating machines in a competitive time, with minimum effort and high reliability, provided that the work to be performed is well organized. For the particular use of the Friden 132 Electronic Calculator, this paper presents Programs for the manual machine operation and Forms to be used for the written record of the computations. A series of problems, mainly concerned with polynomial operations, has been selected. The paper consists of two separately bound parts. Part I contains the theoretical background, references, and 27 completed examples. Part II contains the Programs for the manual machine operations and record forms.
