Discovery and Development of Anti-Breast Cancer Agents from Natural Products presents cutting-edge research advances in the field of bioactive natural products and natural drug formulations. This volume in the Natural Products Drug Discovery series focuses on molecules of natural origin and their synthetic analogs that show promising potential to act as anti-breast cancer and chemotherapeutic agents. Combining foundational background information on cancer mechanisms with details of medicinal structures from natural products, this volume compiles the latest developments from across interdisciplinary fields. Discovery and Development of Anti-Breast Cancer Agents from Natural Products will serve as a valuable resource for researchers working to discover promising leads for the development of novel pharmaceuticals for breast cancer, highlighting a number of key structures from natural products and exploring possible future developments in the area. Highlights active agents from natural sources for development as novel anti-cancer agents Features contributions from active researchers and leading experts working in the field Includes foundational background information on both breast cancer mechanisms and natural product structures to support researchers from different disciplines Between 1990 and 1993, breast cancer activism became a significant political movement. The issue began to receive extensive media attention, and federal funding for breast cancer research jumped dramatically. Describing the origins of this surge in interest, Maureen Hogan Casamayou attributes it to the emergence of politically potent activism among breast cancer survivors and their supporters. Exploring the creation and development of the National Breast Cancer Coalition (NBCC), she shows how many of its key leaders were mobilized by their own traumatic experiences with the disease and its treatments. Casamayou details the NBCC's meteoric rise and impressive lobbying efforts, explaining how—in contrast to grassroots movements founded by dedicated individuals—the coalition grew from the simultaneous efforts of a network of women who invested their time, energy, money, and professional skills in the fight for increased funding for breast cancer research. This multiple leadership—or collective entrepreneurialism, says Casamayou—was crucial to the NBCC's success framing the issue in the minds of the public and policymakers alike. A series of booklets providing information about Aboriginal women and breast cancer. This open access book focuses on diagnostic and interventional imaging of the chest, breast, heart, and vessels.
