Método para aprender inglés 1o Bachillerato Método comunicativo de inglés para 1o de bachillerato Why does the interaction between Latin American students and the Latin American university-- typically an archaic, socially insulated institution--regularly produce a significant number of students opposed to their governments and to the existing social structure? To answer this question, the authors of this comparative study of student political attitudes and behavior questioned students at eleven universities in six culturally similar but economically and governmentally different Latin American countries: Colombia, Mexico, Panama, Paraguay, Puerto Rico, and Uruguay. It has become increasingly clear that metaphor needs to be explored in terms of the social and discourse context in which it is used, especially where the aim is to address real-world problems. The notion of 'real world' metaphor research has been developed to describe this important area of investigation. This book starts by describing the nature and scope of real world metaphor research and then illustrates, through 17 detailed, mainly empirically-based studies, the different areas it can apply to, and different methodologies that can be employed. Research problems are explored in areas such as artificial intelligence, language teaching and learning, reconciliation dialogue, university lecture discourse, poetry and wine description. Methods include corpus analysis, experimentation, discourse analysis, cross-cultural analysis and genre analysis. In each case the empirical studies refer back to Gibbs's opening overview of real-world research. The result is an invaluable and cross-referenced collection of papers addressing real-world problems. This volume provides a state-of-the-art overview of current research and developments on the use of learner corpora perceived from developmental and crosslinguistic perspectives. The book is divided into two parts. The eleven contributions of Part I investigate the development of English language skills of young learners across seven countries/regions on the basis of a new corpus resource called the International Corpus of Crosslinguistic Interlanguage (ICCI). Part II contains seven papers devoted to other varieties of learner corpora, especially spoken learner corpora and learner corpora of languages other than English. Presenting original research in corpus linguistics, this book will be of interest to researchers and postgraduates in the fields of learner corpus research and second language acquisition and those who wish to apply corpus methodology in teaching and learning. Américas - the Languages of the Americas takes the reader on a journey through twenty chapters addressing the languages of the Americas all the way from Canada and the USA to Argentina and Brazil. The authors are international experts who have written mainly in Spanish and English, but in a few cases also in French, Portuguese and German. The book deals with the languages of the descendants of the first Americans; it gives an insight into the American varieties of English, French, Portuguese and Spanish; it explores the outcome of the long-lasting coexistence of various autochthonous and European languages; it also looks into some very specific hybrid forms of locally or regionally unique varieties in the Americas, focusing on creolization, code-switching and translanguaging resulting from language contact. The languages and linguistic varieties dealt with in this book are numerous and so are the approaches and methods applied; most are mainly synchronic, but some are also diachronic. All in all, the book has managed to draw a succinct and representative portrait of the multifaceted linguistic landscapes of the Americas.
