the history of the electrostatic transducer, and describes each step in building a loudspeaker A New Statesman best book of the year | New York Times Editors' Choice pick A Financial Times best economics book of 2019 An accessible, story-driven look at the future of the global economy, written by a leading expert To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond in his globe-trotting book. From a prison in rural Louisiana where inmates purchase drugs with prepaid cash cards to the poorest major city on earth, where residents buy clean water in plastic bags, from the world's first digital state to a prefecture in Japan whose population is the oldest in the world, how these extreme economies function—most often well outside any official oversight—offers a glimpse of the forces that underlie human resilience, drive societies to failure, and will come to shape our collective future. While the people who inhabit these places have long been dismissed or ignored, Extreme Economies revives a foundational idea from medical science to turn the logic of modern economics on its head, arguing that the outlier economies are the place to learn about our own future. Whether following Punjabi migrants through the lawless Panamanian jungle or visiting a day-care for the elderly modeled after a casino, Davies brings a storyteller's eye to places where the economy has been destroyed, distorted, and even turbocharged. In adapting to circumstances that would be unimaginable to most of us, the people he encounters along the way have helped to pioneer the economic infrastructure of the future. At once personal and keenly analytical, Extreme Economies is an epic travelogue for the age of global turbulence, shedding light on today's most pressing economic questions. a spell that covers the race track in sticky, pink goo! Can Cressida and the unicorn princesses find a way to save the race? In 1978 Julian Richer, then aged just nineteen, opened his first shop near London Bridge. For over twenty years this shop has been listed in the Guinness Book of Records as having the highest sales per square foot of any retail outlet in the world, and the company as a whole, with its fifty-three stores nationwide and huge online presence, has become Britain's favourite retailer of TV and hi-fi equipment. What lies behind this extraordinary success? For Julian, the answer is simple: throughout his career he has focussed relentlessly on putting people – both staff and customers – right at the centre of his business. And in The Richer Way, he offers a supremely practical guide to how others can follow suit. He explains how to motivate employees and measure their progress. He establishes how to balance company discipline with individual autonomy. He explores what 'customer service' should really involve. Above all, he points the way to creating an open, friendly and flexible culture that will not only attract the best people but also offer the greatest chance of business success. Packed with straightforward, common-sense advice, The Richer Way will prove essential reading for all organisations, whatever their nature and size.
