Its memory serves as a beacon, a reminder of the power of solidarity, the resilience of the human spirit, and the price of freedom. As you turn these pages, may you find not only an understanding of the historical facts but also a deeper appreciation for the spirit of Gwangju - a spirit of resilience, of democratic values, and of the enduring belief in the power of the people. The May 18 Gwangju Democratization Movement is a testament to humanity's unyielding quest for freedom and justice, and it is a story that deserves to be remembered, understood, and passed on. Our National Park System Jan 14 2022 This is the first comprehensive look at America's national park system, an insider's tour covering the system and the National Park Service, the agency responsible for its care. Dwight F. Rettie, former chief of the NPS policy development office, is uniquely qualified to address the state--the problems and the possibilities--of the system, which is comprised of millions of acres of land in more than 350 areas around the nation, including historic sites, battlefields, and recreation areas. Rettie agrees, as many critics have claimed, that the system is in disarray; he proposes in detail stronger management operations, clearer and more stringent measures of personnel performance, and training of park rangers to help them become professionals knowledgeable about the scientific management and protection of resources. For a concerned public as well as for policy-makers and students of government, this comprehensive analysis and outline may provide hope--and a future--for the invaluable legacy that is our national park system.

How Music Grew in Brooklyn Jun 19 2022 The Brooklyn Philharmonic is one of the most innovative and respected symphony orchestras of modern times. It is well known for its community outreach and children's concerts, innovative Meet the Moderns, and its famous and unparalleled Marathon programs. While it can trace its roots back to the 19th century, the modern Brooklyn Philharmonic had its start in 1954. In *How Music Grew in Brooklyn*, author Maurice Edwards provides a fascinating, personal, and comprehensive history of this great institution. While this biography centers on the Brooklyn Philharmonic, it also encompasses the greater subject of the vibrant world of music and culture in New York during the second half of the 20th century and the opening decade of the 21st. Edwards begins with a look at the orchestra's 19th-century forerunner and traces the current orchestra's beginnings under its founder and first music director Siegfried Landau. The eras of succeeding music directors Lukas Foss, Dennis Russell Davies, and Robert Spano are examined in detail, as is the evolution of the Brooklyn Philharmonic into the official house orchestra of the equally innovative and influential Brooklyn Academy of Music (BAM). More than two dozen historical photographs and illustrations are included and an 80-page appendix provides a detailed listing of the orchestra's extraordinary programs, including the famous Marathons.

Development of F/A-18 Spin Departure Demonstration Procedure with Departure Resistant Flight Control Computer Version 10.7 Sep 10 2021 The purpose of this study was to evaluate the capability to demonstrate F/A-18 Hornet departure characteristics, mainly the spin, with Flight Control Computer (FCC) Operation Flight Program (OFP) Version 10.7 (v10.7). Version 10.7 was released to the Navy and Marine Corps F/A-18A/B/C/D fleet in 2003. Version 10.7 was developed based on the existing FCC OFP (v10.5.1) to minimize out-of-control flight or departure related mishaps. Version 10.7 was only a software upgrade and no hardware change to the existing F/A-18 was made. Version 10.7 was remarkable since most of the known F/A-18 departure prone flight envelopes were rendered departure free by software change alone. Although v10.7 eliminated most of the F/A-18 departure prone areas, it did not eliminate F/A-18 departures completely. Therefore, there still exists a need to train pilots in F/A-18 departures and a need for Departure Demonstration Syllabus. As a result of departure resistant features of the new FCC OFP, significant portion of the F/A-18 Departure Demonstration Syllabus had to be changed. Several test flights were conducted to re-develop the syllabus. These flight test results revealed that existing spin entry procedure would not be sufficient to enter and sustain the spin. Most of the flight tests to re-develop the syllabus were spent on fine tuning the repeatable spin entry procedure and sustaining the spin long enough for instructional purposes. Recommended procedure proved to be the best repeatable spin entry procedure. This procedure allowed sustained spin for one turn after the pro-spin flight control inputs were removed. This one turn was necessary for pilots to evaluate the spin characteristics of the F/A-18 and train them to use proper procedures to recover from sustained spins.
