The study and reception of Samuel Johnson’s work has long been embedded in Japanese literary culture. The essays in this collection reflect that history and influence, underscoring the richness of Johnson scholarship in Japan, while exploring broader conditions in Japanese academia today. In examining Johnson’s works such as the Rambler (1750-52), Rasselas (1759), Lives of the Most Eminent English Poets (1779-81), and Journey to the Western Islands of Scotland (1775), the contributors—all members of the half-century-old Johnson Society of Japan—also engage with the work of other important English writers, namely Shakespeare, Mary Shelley, Jane Austen, and Matthew Arnold, and later Japanese writers, including Natsume Soseki (1867-1916). If the state of Johnson studies in Japan is unfamiliar to Western academics, this volume offers a unique opportunity to appreciate Johnson’s centrality to Japanese education and intellectual life, and to reassess how he may be perceived in a different cultural context. Published by Bucknell University Press. Distributed worldwide by Rutgers University Press. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM. The book traces the evolution of some of the most notable brands in the Indian marketplace by looking at the interplay of forces that created the environment in which they operated and the strategies they adopted. In a vibrant economy like India-where competition from novel and captivating launches is relentless; where customers’ preferences change rapidly-these winning brands have shown resilience and the ability to identify and seize opportunities. The book proves the point that it is the capacity to adapt to

changes and formulate effective strategies that determines who survives in the hyper-competitive marketplace of today. Cristiano Ronaldo is one of the most exciting footballers of his generation. Starring at youth level on his home island of Maderia, his spirit and natural flair took him into the Sporting Lisbon first team, attracting the interest of Manchester United, who bought him in the summer of 2003. His dazzling footwork, showmanship and eye for goal not only inspired United to two Premiership titles, but he was United's only player to score in normal time in the 2008 Champions League final, which the Reds won to put the finishing touches to a remarkable double-winning season. His incredible top-scoring season was further rewarded by becoming the FIFA World Player of the Year - and the first player based in the UK to win the award. This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development. The rapid takeoff of the continent-sized national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems. This book analyses the emergence of a second automobile revolution through the trajectories of automobile firms since the nineties.
