Having money at the ready from a committed pool of capital gives you a competitive advantage. While your competitors may have to "pass the hat" on a deal-by-deal basis, your investors are already committed and are just waiting for a capital call. By having a pool of capital ready, your offer will be free of any financing contingencies. And a no-financing-contingency offer means a higher confidence of closing, which translates into your competitive advantage and winning more deals. Written specifically for real estate investment professionals who want to raise a real estate fund, this book will help you write your own Private Placement Memorandum ("PPM") so you can remain Reg D compliant. ABC's of FT-NMR Aug 30 2020 The primary purpose of this book is to help you understand what is going on in Fourier

Transform (FT) Nuclear Magnetic Resonance (NMR) spectroscopy. Modern life is now very largely life with 'black boxes' that carry warning labels: 'No user-serviceable parts inside.' Many find black boxes to be quite acceptable, at least as long as they work. But how willing should we be to accept black-box analyses without some understanding of how those analyses were obtained? NMR spectrometers are like 'black boxes' in that they offer many standardised procedures, but it can be dangerous to the quality of your data if you rely slavishly on such procedures without understanding how and why the proper parameter choices are critical. The scope of this book is broad rather than deep with the intention of providing helpful insight. Much can be understood in a more qualitative way and that is the approach taken here. For those few areas where a quantitative approach is needed, simple mathematics will usually suffice.

Need and Greed Apr 25 2020 More than just a tale of manipulated financial statements, counterfeit securities, sham transactions, and cyber fraud, this story is intertwined with personalities from among the rich and famous who were involved, in some fashion, such as Governor George Pataki, actress Debbie Reynolds, attorney F. Lee Bailey, and the former chairman of the SEC. In the largest pyramid scheme in American history, the Bennett Companies which even looted their own employee's pension fund, fleeced more than 12,000 investors, 10,000 trade creditors, and 245 banks and financial institutions, of more than \$1 billion. A Ponzi scheme-named for Charles Ponzi, who enticed investors with promises of high returns to purchase worthless coupons in the 1920s- was taken to new heights in the 1990s by the Bennett Companies. Extensively documented, Need and Greed follows the human drama as a small-time scam grows exponentially into nationwide holdings of hotels, floating and fixed casinos,

office buildings, shopping malls, and other investments. It also allows the reader a rare view into the inner workings of big-time crime, its prosecution, and subsequent civil litigation. Throughout the book, Weisman includes vignettes about hapless investors, portraits of the Bennetts and other key players, the corporate culture at Bennett Funding, and the trappings of the lush Bennett lifestyle.

Environmental Process and Production Methods (PPMs) in WTO Law Sep 11 2021 This book examines the conditions under which PPM measures may be adopted under WTO law de lege lata and de lege ferenda. It analyses in detail the complex case law in this field and its evolution in the last 25 years, as well as the many doctrinal debates around PPM measures and their relevance in the light of the evolution of case law, both under the GATT and the TBT Agreement. Further, it also suggests an original approach to the interpretation of the relevant provisions of the GATT and the TBT Agreement in the context of PPM measures. The PPM issue has been one of the most debated topics in the trade and environment debate. Even though the US-Shrimp case showed that PPM measures are not prohibited per se under the GATT, many questions remain unanswered when it comes to the precise conditions under which environmental PPM measures are justifiable under WTO law, for example in the field of trade measures relating to climate change mitigation efforts, natural resources management policies and biodiversity conservation measures.
