Grow Your Own Spices Jul 28 2020 In *Grow Your Own Spices*, author and spice-growing gardener Tasha Greer hands you everything you need to know to grow a thriving spice garden, with practical tips and in-depth advice on cultivating over 30 different spices. Unlike herbs, which consist of the green leaves of certain plants, spices come from the seeds, roots, bark, or berries of plants, which means

growing, harvesting, and preparing spices is a lot more nuanced than growing leafy herbs. Start with easy-to-grow seed spices first, such as sesame seeds, fennel, and cumin, then graduate to more challenging spice varieties, such as star anise, cinnamon, and nutmeg. Spices not only offer culinary flare, there's also increasing evidence of their ability to fight inflammation and reduce various health risks. Medical usage tips from expert herbalist Lindsey Feldpausch are found throughout the book and offer well-researched advice on how to use homegrown spices to improve your well-being. Regardless of whether you're

using spices as a health-boosting supplement or simply to power-up the flavor of your meals, purchasing spices is an expensive proposition. For those who already have experience getting their hands dirty in the garden, this handbook will help them refine their gardening skills and cultivate gourmet quality food. The book also fills in the blanks that exist between growing food in the garden and using it in the kitchen with guides to 50 of the best-loved, tastiest vegetables, herbs, and small fruits. The guides give readers easy-to-follow planting and growing information, specific instructions for harvesting all the edible parts of the plant, advice on storing food in a way

that maximizes flavor, basic preparation techniques, and recipes. The recipes at the end of each guide help readers explore the foods they grow and demonstrate how to use unusual foods, like radish greens, garlic scapes, and green coriander seeds.
