*Energy Medicine for Animals* Jun 20 2022 A full-color, practical handbook on the bioenergetics of animal healing, with case studies to showcase the effects of vibrational medicine • Reveals how to work with the energy fields, auras, and chakras of horses, cats, and dogs • Demonstrates how to use High Sense Perception (HSP) in relation to an animal, illustrating what happens in the energy fields of a human being and an animal when they connect telepathically • Details how zoopharmacognosy, or animal self-selection of remedies such as essential oils, can assist in promoting emotional release and physical healing Vibrational medicine offers a natural, effective, and hands-on response to animal ailments and disturbances. In the absence of a shared language of "words," energetic healing can connect a human more closely to an animal while at the same time working on the physical body, the chakras, and the different layers of the animal's aura or energy field. In this book, animal communicator and healer Diane Budd shares her intriguing journey, research, and experience of working with animals energetically. She explains how, together with a healer colleague, she set out to document the effects of animal communication and healing on the energy field of the animal and the communicator, which led to further in-depth research. Detailing her findings, she reveals how to work with the energy fields, auras, and chakras of horses, cats, and dogs as well as what benefits energetic healing work can offer to animals. Sharing many case studies from her healing practice, the author explores what High Sense Perception (HSP) reveals about the relationship between an animal and human and how to make sense of what you are receiving on an intuitive level. Full-color illustrations clearly show the energy field, the energy flow between animals' chakras, and what happens in the energy fields of a human being and an animal when they connect telepathically. The illustrations also help guide you, step-by-step, through the use of the healing tools and practices described. The author explains how zoopharmacognosy--animal self-selection of remedies such as essential oils or herbs--can support emotional release and physical healing, not only for animals but for humans too. She details animal personality types and their soul evolvment levels and explores the influence of an animal's past life on present-day issues, whether it be a past-life connection with the current owner or an issue the animal needs to work with in this present lifetime. Full of animal communication stories and ground-breaking research on animal energy fields, this book shows how, just as we humans are all here on this earthly plane to learn and grow, so are our animals.

[What the Animals Taught Me](#) Jul 21 2022 *What the Animals Taught Me* is a collection of stories about rescued farm animals in a shelter in Sonoma County, California, and what these animals can teach us. Each story illuminates how animals can help us see and embrace others as they truly are and reconnect us with the natural world. Wishing to escape the urban rat race, freelance writer and editor Stephanie Marohn moved to rural northern California in 1993. Life was sweet. She was a busy freelancer. In return for reduced rent, she fed and cared for two horses and a donkey. Her life was full. And then, more farm animals started to appear: a miniature white horse, a donkey, sheep, chickens, followed by deer and other wildlife. Each one needed sanctuary either from abuse, physical injury, or neglect. Marohn took each animal in and gradually turned her 10-acre spread into an animal sanctuary. A deeply inspiring collection, *What the Animals Taught Me* awakens our hearts and reminds us that our best life teachers sometimes come covered in fur.

**Transforming Trauma** Apr 25 2020 Have you ever looked deep into the eyes of an animal and felt entirely known? Often, the connections we share with non-human animals represent our safest and most reliable relationships, offering unique and profound opportunities for healing in periods of hardship. This book focuses on research developments, models, and practical applications of human-animal connection and animal-assisted intervention for diverse populations who have experienced trauma. Physiological and psychological trauma are explored across three broad and interconnected domains: 1) child maltreatment and family violence; 2) acute and post-traumatic stress, including military service, war, and developmental trauma; and 3) times of crisis, such as the ever-increasing occurrence of natural disasters, community violence, terrorism, and anticipated or actual grief and loss. Contributing authors, who include international experts in the fields of trauma and human-animal connection, examine how our relationships with animals can help build resiliency and foster healing to transform trauma. A myriad of animal species and roles, including companion, therapy, and service animals are discussed. Authors also consider how animals are included in a variety of formal and informal models of trauma recovery across the human lifespan, with special attention paid to canine- and equine-assisted interventions and psychotherapy. In addition, authors emphasize the potential impacts to animals who provide trauma-informed services, and discuss how we can respect their participation and implement best practices and ethical standards to ensure their well-being. The reader is offered a comprehensive understanding of the history of research in this field, as well as the latest advancements and areas in need of further or refined investigation. Likewise, authors explore, in depth, emerging practices and methodologies for helping people and communities thrive in the face of traumatic events and their long-term impacts. As animals are important in cultures all over the world, cross-cultural and often overlooked animal-assisted and animal welfare applications are also highlighted throughout the text.

Our connections with them run deeply, down to the soul level. Just like us, they are also on a journey to evolve their soul through their relationships and experiences, and each has deeply spiritual messages for us and intentions for our personal growth. In this book, Tammy Billups invites you to explore and deepen this profound relationship, showing how you can co-evolve along with your animal companions, experience unconditional love, and, ultimately, enact healing for both animal and caregiver. Offering a soulful and bioenergetic perspective on decoding our animals' actions, behaviors, and physical issues, Billups explains how our animal companions share our energetic patterns and emotional wounds, revealing issues in our own lives that may be hidden or suppressed. She identifies the five core emotional wounds in animals and the ways in which they manifest, outlining specific behavioral traits and physical issues animals may exhibit as they mirror our emotional states. She explains how to connect with them on a profound level so we can grasp their needs more clearly and learn what they have to teach us. She also provides guidance to help your animals heal the emotional wounds and traumas that create their anxiety, stress behaviors, aggression, and fears. The author details a three-step process to help you through decisions you will make on your pets' behalf and explains how, when a person works on healing a core emotional issue in their life--abandonment for example--it helps the animal release this same issue and the corresponding negative behaviors as well. She also shows how extremely receptive animals are to energy work, holistic healing, and spiritual practices, explaining how these methods unlock emotional barriers and enable both person and animal to heal and reach their highest potential in conscious evolution. **Psychic Communication with Animals for Health and Healing** Jul 29 2020 The transformation and insights of an acclaimed flamenco dancer turned world-renowned animal communicator and healer • Presents powerful case histories of animals with whom she communicated and treated • Offers instruction on how to establish communication with animals When Laila del Monte was a child growing up on the Balearic island of Formentera, she experienced a special bond with the animals that were a part of her life. Later, as she became entirely focused on her career as a flamenco dancer, she resisted those who told her that her true vocation was as a healer. But when her own health challenges jeopardized her dancing career, the healing energies she received from both her human and animal teachers raised her consciousness about the important insights animals have to offer on the state of our physical and emotional well-being. In this book Laila del Monte reveals how the unconditionally loving nature of animals very often leads them to take on the physical pains and negative emotional experiences of the human beings in their lives. The animals absorb negative emotions such as guilt, anger, jealousy, and other issues that stop people from moving forward and reflect these back in their animal behavior. Through her work with countless animals suffering from behavioral disorders or who have been sick or injured, del Monte learned that the physical healing of the animals is directly tied to the emotional healing of the people they are close to. The stories and situations she shares in this book demonstrate that learning what animals have to teach us about our lives does not require any magical formula or laborious training--it is part of our natural birthright. We need only to revive our own deep intuition to restore this connection. The authenticity and loving nature of del Monte's approach is not only testimony to her dedication and amazing abilities but also shows us the way we can follow the same path simply and honestly.
