The Living Age Oct 09 2021

The Knowledge Dec 11 2021 How would you go about rebuilding a technological society from scratch? If our technological society collapsed tomorrow what would be the one book you would want to press into the hands of the postapocalyptic survivors? What crucial

knowledge would they need to survive in the immediate aftermath and to rebuild civilization as quickly as possible? Human knowledge is collective, distributed across the population. It has built on itself for centuries, becoming vast and increasingly specialized. Most of us are ignorant about the fundamental principles of the civilization that supports us, happily utilizing the latest—or even the most basic—technology without having the slightest idea of why it works or how it came to be. If you had to go back to absolute basics, like some sort of postcataclysmic Robinson Crusoe, would you know how to re-create an internal combustion engine, put together a microscope, get metals out of rock, or even how to produce food for yourself? Lewis Dartnell proposes that the key to preserving civilization in an apocalyptic scenario is to provide a quickstart guide, adapted to cataclysmic circumstances. The Knowledge describes many of the modern technologies we employ, but first it explains the fundamentals

upon which they are built. Every piece of technology rests on an enormous support network of other technologies, all interlinked and mutually dependent. You can't hope to build a radio, for example, without understanding how to acquire the raw materials it requires, as well as generate the electricity needed to run it. But Dartnell doesn't just provide specific information for starting over; he also reveals the greatest invention of them all—the phenomenal knowledge-generating machine that is the scientific method itself. The Knowledge is a brilliantly original guide to the fundamentals of science and how it built our modern world.

The Epherium Chronicles: Embrace Jan 12 2022

colonists' footsteps. He wanted to help settle a new world—to be something greater. Then came the war... Hope. During years of vicious conflict with an insectoid alien race, it was nearly lost. Though Earth has slowly rebuilt in the six years since the war, overcrowding and an unstable sun have made life increasingly inhospitable. When mysterious signals from the nearly forgotten colony ships are received, Hood is ordered to embark on a dangerous reconnaissance mission. Could humanity's future sit among the stars? Hope. Hood needs it now more than ever. As secrets about the original colonists are revealed and the Epherium Corporation's dark agenda is exposed, new adversaries threaten the mission, proving more dangerous to Earth than their already formidable foes... 82,000 words

Singing and Dancing Are the Voice of the Law Mar 02 2021 “This is one of the best books on Zen and Zen practice that I have read in years. Busshō uses a well-known Zen song/poem to elucidate the key features of Zen meditation,

practice and life....It brings the famous Zen master's teaching alive while also showing how it is relevant to Zen practice in the 21st century." —Tim Burkett, author of *Nothing Holy About It* and *Zen in the Age of Anxiety* Singing and Dancing Are the Voice of the Law introduces us to one of the great works of Zen literature, "The Song of Zazen." Zen teacher Busshō Lahn illuminates Hakuin's enigmatic poem in plain language, unpacking it and applying it to contemporary life. His book offers a wealth of information on the context and content of this eighteenth-century work, clearly evoking its themes of abiding wisdom, meditation, compassionate self-regard, and our own everyday life's potential to express deep spiritual truth. Short stanza by short stanza, this exceptionally readable and deeply engaging book shows how the poem's teachings and invitations are as applicable now as they were when they were first written nearly three centuries ago. Lahn offers readers an intuitive

and progressive path of exploration of their spiritual lives, regardless of their faith tradition. *Understanding Affections in the Theology of Jonathan Edwards* Dec 19 2019 This volume argues that the notion of "affections" discussed by Jonathan Edwards (and Christian theologians before him) means something very different from what contemporary English speakers now call "emotions." and that Edwards's notions of affections came almost entirely from traditional Christian theology in general and the Reformed tradition in particular. Ryan J. Martin demonstrates that Christian theologians for centuries emphasized affection for God, associated affections with the will, and distinguished affections from passions; generally explaining affections and passions to be inclinations and aversions of the soul. This was Edwards's own view, and he held it throughout his entire ministry. Martin further argues that Edwards's view came not as a result of his reading of John Locke, or the pressures of the

Great Awakening (as many Edwardsean scholars argue), but from his own biblical interpretation and theological education. By analysing patristic, medieval and post-medieval thought and the journey of Edwards's psychology, Martin shows how, on their own terms, pre-modern Christians historically defined and described human psychology.

Self-Actualization and the Radical Gospel

Jan 20 2020 Can today's Christians reconcile a belief in self-actualization with the extreme ethical demands of the New Testament? The author argues that they can, although not easily, and that the felt uneasiness between two concerns—self-fulfillment and self-gift—may generate a healthy tension. There is then an

apparent mismatch between two views of ethics. On the one hand, psychological humanism is based on self-affirmation, acceptance of one's limitations, moderation, and the search for a quality of life in the midst of globalization. On the other hand, the radicalism of the gospel emphasizes passion (in the two senses of this word), self-transcendence towards the infinite, and generosity for God and others. Nonetheless, these two tendencies are neither incompatible nor easily reconcilable. The book uncovers both the pitfalls of self-actualization and the misleading interpretations that have disfigured the radical gospel. It highlights the developmental factors, views of human life, successes, and failures which play a considerable role in a person's journey. It brings psychological, biblical, philosophical, theological, and pastoral clarifications to bear on the issues. This book will help its readers to grasp what a psychologically informed Christian ethic can be, both intellectually and practically.

No Documents, No Escape Jun 24 2020 Rising out of the American art music movement of the late 1950s and 1960s, minimalism shook the foundations of the traditional constructs of classical music, becoming one of the most important and influential trends of the twentieth century. The emergence of minimalism sparked an active writing culture around the controversies, philosophies, and forms represented in the music's style and performance, and its defenders faced a relentless struggle within the music establishment and beyond. Focusing on how facts about music are constructed, negotiated, and continually remodeled, *We Have Always Been Minimalist* retraces the story of these battles that—from pure fiction to proven truth—led to the triumph of minimalism. Christophe Levaux's critical analysis of literature surrounding the origins and transformations of the stylistic movement offers radical insights and a unique new history.

National Security and Double Government

Jun 17 2022 Why has U.S. security policy scarcely changed from the Bush to the Obama administration? *National Security and Double*

Government offers a disquieting answer. Michael J. Glennon challenges the myth that U.S. security policy is still forged by America's visible, "Madisonian institutions" - the President, Congress, and the courts. Their roles, he argues, have become largely illusory. Presidential control is now nominal, congressional oversight is dysfunctional, and judicial review is negligible. The book details the dramatic shift in power that has occurred from the Madisonian institutions to a concealed "Trumanite network" - the several hundred managers of the military, intelligence, diplomatic, and law enforcement agencies who are responsible for protecting the nation and who have come to operate largely immune from constitutional and electoral restraints. Reform efforts face daunting obstacles. Remedies within this new system of "double government" require the hollowed-out Madisonian institutions to exercise the very power that they lack. Meanwhile, reform initiatives from without confront the same pervasive political ignorance

within the polity that has given rise to this duality. The book sounds a powerful warning about the need to resolve this dilemma-and the mortal threat posed to accountability, democracy, and personal freedom if double government persists. This paperback version features an Afterword that addresses the emerging danger posed by populist authoritarianism rejecting the notion that the security bureaucracy can or should be relied upon to block it.

rose up from the Dark Shore to aid a threatened dominion. It matters not that his courageous efforts helped to vanquish an all-devouring evil. Constructing Modernity Aug 07 2021 Naum Gabo (1890-1977), whose eventful life took him from his native Russia to Berlin, Paris, London, and finally the United States, achieved renown as one of the most inventive and controversial figures in twentieth-century sculpture. This book is the first comprehensive account of Gabo's life, career, and artistic theory and practice. Martin

Hammer and Christina Lodder explore in detail the evolution of the artist's work and his aesthetic concerns, creative processes, assimilation of such new materials as plastic, and approach to public sculpture. The authors also examine his response to the scientific and political revolutions of his age and trace the origins and development of Gabo's utopian conviction that Constructivist art was profoundly in tune with modernity, social progress, and advances in science and technology. Drawing on Gabo's extensive and largely unpublished archives of letters, diaries, notebooks, models, and sketchbooks, Hammer and Lodder discuss the sculptor's work in the context of his relations with other avant-garde artists, architects, and critics, including his brother Antoine Pevsner. They also situate his aesthetic theory and practice within the Constructi

Janicaud draws a firm connection between Heidegger's philosophical position and his political engagement. He thus goes beyond those writers who attempt to handle the issue of Heidegger's Nazism simply on the level of his personal political judgment, in isolation from his philosophy, by attempting to distinguish rigorously between Heidegger the thinker and Heidegger the man.
