Updated based on recent court cases, scientific data, and trends, the 2011 edition of NFPA 921: Guide for Fire & Explosion Investigations presents the information you need for reliable field work and conclusions that hold up in a court of law. Major revisions give fire investigators, litigators, and insurance professionals more comprehensive and effective guidance for today's world. Major revisions in NFPA 921 help you render opinions that stand up to scrutiny: An all-new section on Report Review Procedure in Chapter 4 outlines the review process in fire investigation and discusses peer vs. technical review. Rewritten Chapter 18, Cause helps ensure fire investigators use scientific methodology when developing hypotheses, to avoid Daubert challenges resulting from the absence of supportive evidence, commonly known as "negative corpus." Revised Chapter 21, Explosions includes a critical update of the science and technology affiliated with explosions, along with new illustrations and photos. Rewritten Chapter 23, Fire Deaths and Injuries explains how medical reports such as blood tests and tissue samples can help investigators determine fire origin and cause. Learn when to request toxicology reports and how to interpret findings. Chapter 25, Motor Vehicle Fires introduces expanded sections covering recreational vehicles and agricultural equipment. **Scientific Protocols for Fire Investigation, Third Edition** Sep 28 2020 *Scientific Protocols for Fire Investigation, Third Edition* focuses on the practical application of fundamental scientific principles to determine the causes of fires. Originally published in 2006, the First Edition was very well received by fire investigators and those who work with them. Since fire investigation is a rapidly evolving field—driven by new discoveries about fire behavior—the Second Edition was published in late 2012. This latest, fully updated Third Edition reflects the most recent developments in the field. Currently, serious research is underway to try to understand the role of ventilation in structure fires. Likewise, there is improved understanding of the kinds of errors investigators can make that lead to incorrect determinations of the causes of fires. In addition to the scientific aspects, the litigation of fire related events is rapidly changing, particularly with respect to an investigator's qualifications to serve as an expert witness. This book covers these latest developments and ties together the changing standards for fire investigations with the fundamental scientific knowledge presented in the early chapters of the book. The book is intended for those individuals who have recently entered the field of fire investigation, and those who are studying fire investigation with a plan to become certified professionals. In addition, professionals in the insurance industry who hire fire investigators will find this an invaluable resource. Insurance companies have sustained significant losses by hiring individuals who are not qualified, resulting in cases being settled or lost at a cost of millions. Insurance adjusters and investigators will learn to recognize quality fire investigations and those that are not up to today's standards. Lastly, this book is also for the many attorneys who litigate fire cases. Written with language and terms that make the science accessible even to the non-scientist, this new edition will be a welcome resource to any professional involved in fire and arson cases.

**ERISA and Health Insurance Subrogation in all 50 States - 5th Edition** Dec 20 2019 ERISA and Health Insurance Subrogation In All 50 States is the most complete and thorough treatise covering the complex subject of ERISA and health insurance subrogation ever published. NEW TO THE FIFTH EDITION! • Updated To Include All The Newest Case Law! • Updated To Include Medicaid Subrogation and Preemption of FEHBA ! • New Plan Language Recommendations! • Complete Health Insurance Subrogation Laws In All 50 States • Covers The Application of ERISA In Every Federal Circuit The Fifth Edition of ERISA and Health Insurance Subrogation In All 50 States has been completely revised, edited, and reorganized. This was partly to reflect the new direction recent case decisions have taken regarding health insurance subrogation as well as the crystallization of formerly uncertain and nebulous areas of the law which have now received some clarity. An entirely new chapter entitled, "What Constitutes Other Appropriate Equitable Relief?" has been added and replaces the old Chapter 9, which merely dealt with Knudson and Sereboff. The new edition introduces new state court decisions addressing the issue of causation and whether and when a subrogated Plan seeking reimbursement must prove that the medical benefits it seeks to recover were causally related to the original negligence of the tortfeasor. An entirely new section was added concerning the subrogation and reimbursement rights of Medicare Advantage Plans, a statutorily-authorized Plan which provides the same benefits an individual is entitled to recover under Medicare. This includes recent case law which detrimentally affects the rights of such Plans to subrogate. Also added to the new edition is additional law and explanation regarding Medicaid subrogation, including the differentiation between "cost avoidance" and "pay and chase" when it comes to procedures for paying Medicaid claims. Significant improvements have been made to suggested Plan language which maximizes a Plan's subrogation and reimbursement rights. The suggested language stems from recent decisions and developments in ERISA and health insurance subrogation from around the country since the last edition. The new edition has been completely reworked both in substance and organization. Recent case law has necessitated consolidation of several portions of the book and elimination or editing of others. A new section entitled "Liability of Plaintiff's Counsel" has been added, which provides a clearer exposition on the laws applicable and remedies available when plaintiff's attorneys and Plan beneficiaries settle their third-party cases and fail to reimburse the Plan. Also new to the book are recently-passed anti-subrogation measures such as Louisiana's Senate Bill 169, § 1881, which states that no health insurer shall seek reimbursement from automobile Med Pay coverage without first obtaining the written consent of the insured. The new edition also goes into much greater detail on the procedures for and law underlying the practice of removal of cases from state court to federal court, and the possibility of remand back to state court. This includes the Federal Courts Jurisdiction and Venue Clarification Act of 2011, effective Jan. 6, 2012, which amended federal removal, venue, and citizenship determination statutes in very significant ways. The new edition also delves into, for the first time, the role which the federal Anti-Injunction Act plays when beneficiaries sue in state court to enforce the terms of an ERISA Plan, while the Plan files suit in federal court seeking an injunction against the state court action. New case law and discussion on preemption of FEHBA subrogation and reimbursement claims have been added to Chapter 10 in the wake of new decisions regarding same.

Burned Jan 21 2020 Was a monstrous killer brought to justice or an innocent mother condemned? On an April night in 1989, Jo Ann Parks survived a house fire that claimed the lives of her three small children. Though the fire at first seemed a tragic accident, investigators soon reported finding evidence proving that Parks had sabotaged wiring, set several fires herself, and even barricade her four-year-old son inside a closet to prevent his escape. Though she insisted she did nothing wrong, Jo Ann Parks received a life sentence without parole based on the power of forensic fire science that convincingly proved her guilt. But more than a quarter century later, a revolution in the science of fire has exposed many of the incontrovertible truths of 1989 as guesswork in disguise. The California Innocence Project is challenging Parks's conviction and the so-called science behind it, claiming that false assumptions and outright bias convicted an innocent mother of a crime that never actually happened. If Parks is exonerated, she could well be the "Patient Zero" in an epidemic of overturned guilty verdicts—but only if she wins. Can prosecutors dredge up enough evidence and roadblocks to make sure Jo Ann Parks dies in prison? No matter how her last-ditch effort for freedom turns out, the scenes of betrayal, ruin, and hope will leave readers longing for justice we can trust.

Guide to Wildland Fire Origin and Cause Determination: (black & White) Aug 28 2020 The National Wildfire Coordinating Group provides national leadership to enable interoperable wildland fire operations among federal, state, local, tribal, and territorial partners. Primary objectives include: Establish national interagency wildland fire operations standards. Recognize that the decision to adopt standards is made independently by the NWCG members and communicated through their respective directives systems; Establish wildland fire position standards, qualifications requirements, and performance support capabilities (e.g. training courses, job aids) that enable implementation of NWCG standards; Support the National Cohesive Wildland Fire Management Strategy goals: to restore and maintain resilient landscapes; create fire adapted communities; and respond to wildfires safely and effectively; Establish information technology (IT) capability requirements for wildland fire; and Ensure that all NWCG activities contribute to safe, effective, and coordinated national interagency wildland fire operations. The "Guide to Wildland Fire Origin and Cause Determination" is designed for use in the field as a guide for wildland fire investigators. Accurate wildland fire origin and cause determination is an essential first step in a successful fire investigation. Proper investigative procedures which occur during initial attack can more accurately pinpoint fire causes and preserve valuable evidence that might be destroyed by suppression activities. If a fire is human-caused, the protective measures described in the guide can preserve evidence that may lead to effective and fair administrative, civil, or criminal actions. The investigation should start at the time a fire is reported or discovered. First responders play an important role in protecting evidence, so it is important for the wildland fire investigator to help train first responders to identify and protect the General Origin Area of the fire. Wildland fire investigators should impress upon firefighters, law enforcement officers and other first responders that the preliminary protection of the General origin area and any associated evidence on any wildfire is their responsibility, and emphasize to them that they are the most important link in the subsequent origin and cause determination. Not only is it important for the first responders to recognize the need for an accurate origin and cause determination, it is important that they understand how their actions, both during and following suppression, can enable a qualified wildland fire investigator to accurately determine the origin and cause.

**Fire and Life Safety Educator** Jul 27 2020 The third edition of Fire and Life Safety Educator provides the educator with knowledge to support successful performance as a fire and life safety educator as addressed in NFPA 1035, Standard for Professional Qualifications for Fire and Life Safety Educator, Public Information Officer, and Juvenile Firesetter Intervention Specialist. In addition, the manual meets the learning outcomes of the National Fire Academy's Fire and Emergency Services Higher Education (FESHE) non-core course Fire and Life Safety Educator. New to the Fire and Life Safety Educator manual is the addition of two levels: Juvenile Firesetter Intervention Specialist I and Juvenile Firesetter Intervention Specialist II. All levels are covered separately for ease of use. In all, the third edition covers five levels of the standard: \* Fire and Life Safety Educator Level I: Chapters 2-6 \* Fire and Life Safety Educator Level II: Chapter 7-11 \* Fire and Life Safety Educator Level III: Chapters 12-16 \* Juvenile Firesetter Intervention Specialist I: Chapters 17-20 \* Juvenile Firesetter Intervention Specialist II: Chapters 21-25 This manual should be the first document on a public educator's bookshelf and a "ready reference" of public education knowledge. The manual is intended to educate the educator rather than to train the educator. In this way, the educator will be able to apply knowledge and skills to many different areas under the "umbrella" of injury prevention and control. The manual focuses on all-risk education. This manual is intended to assist in preparing for certification to the Fire and Life Safety Educator I, II, and III and Juvenile Firesetter Intervention Specialist I and II levels of NFPA 1035 Standard for Professional Qualifications for Fire and Life Safety Educator, 2010 edition.
