A Game for Hooligans Jul 22 2022 Rugby union has undergone immense change in the past two decades - introducing a World Cup, accepting professionalism and creating a global market in players - yet no authoritative English-language general history of the game has been published in that time. Until now. *A Game for Hooligans* brings the game's colourful story up to date to include the 2007 World Cup. It covers all of the great matches, teams and players but also explores the social, political and economic changes that have affected the course of rugby's development. It is an international history, covering not only Britain and France but also the great rugby powers of the southern hemisphere and other successful rugby nations, including Argentina, Fiji and Japan. Contained within are the answers to many intriguing questions concerning the game, such as why 1895 is the most important date in both rugby-union and rugby-league history and how New Zealand became so good and have remained so good for so long. There is also a wealth of anecdotes, including allegations of devil-worship at a Welsh rugby club and an account of the game's contribution to the Cuban Revolution. This is a must-read for any fan of the oval ball.

Uniting a Divided City Aug 11 2021 For many, Johannesburg resembles the imagined spectre of the urban future. Global anxieties about catastrophic urban explosion, social fracture, environmental degradation, escalating crime and violence, and rampant consumerism alongside grinding poverty, are projected onto this city as a microcosm of things to come. Decision-makers in cities worldwide have attempted to balance harsh fiscal and administrative realities with growing demands for political, economic and social justice. This book investigates pragmatic approaches to urban economic development, service delivery, spatial restructuring, environmental sustainability and institutional reform in Johannesburg. It explores the conditions and processes that are determining the city's transformation into a cosmopolitan metropole and magnet for the continent.

Eastern European Railways in Transition Dec 15 2021 During the nineteenth century, railway lines spread rapidly across Europe, linking the continent in ways unimaginable to previous generations. By the beginning of the twentieth century the great cities of the continent were linked by a complex and extensive rail network. Yet this high-point of interconnectivity, was abruptly cut-off after 1945, as the Cold War built barriers - both physical and ideological - between east and west. In this volume, leading transport history scholars take a fresh look at this situation, and the ramifications it had for Europe. As well as addressing the parallel development of railways either side of the Iron Curtain, the book looks at how transport links have been reconnected and reconfigured in the twenty years since the reunification of Europe. In particular, it focuses upon the former communist countries and how they have responded to the challenges and opportunities railways offer both nationally and internationally. Including contributions from historians, researchers, policy makers, representatives of railway companies and railway museum staff, the essays in this collection touch upon a rich range of subjects. Divided into four sections: 'The Historical Overview', 'Under Russian Protection', 'After the Fall of the Iron Curtain', and 'The Heritage of Railways in Eastern Europe' the volume offers a broadly chronological introduction to the issue, that provides both a snap-shot of current debates and a starting point for further research. It concludes that in an era of increased globalisation and interconnectivity - and despite the rise of air and road transport and virtual methods of communication - railways still have a crucial role to play in the development of a prosperous and connected Europe.

A Concise History of Poland May 20 2022 The second edition of this guide to Poland has been updated to take account of the years from 1989–2005. This period marked its liberation from the Soviet Union, the birth of Poland's 'Third Republic' and, recently, its accession to the European Union in 2004. Poland's history has been marked by its resilience. Once a dominant force in central and eastern Europe and home to a remarkable experiment in consensual politics, it was excised from the map by its neighbours in 1795. Resurrected in 1918, partitioned afresh during the Second World War, it survived to become a satellite of the Soviet Union. Yet in the 1980s, it was Poland which blazed the trail in casting off communism, and

was finally able to reassert its Christian heritage. With its updated bibliography and new chronology, the book is the ideal companion for all looking for a comprehensive survey of this fascinating country.

Japanese Sports Aug 23 2022 In this first synthetic, comprehensive survey of Japanese sports in English, the authors are attentive to the complex and fascinating interaction of traditional and modern elements. In the course of tracing the emergence and development of sumo, the martial arts, and other traditional sports from their origins to the present, they demonstrate that some cherished "ancient" traditions were, in fact, invented less than a century ago. They also register their skepticism about the use of the samurai tradition to explain Japan's success in sports. Special attention is given to Meiji-era Japan's frequently ambivalent adoption and adaptation of European and American sports--a particularly telling example of Japan's love-hate relationship with the West. The book goes on to describe the history of physical education in the school system, the emergence of amateur and professional leagues, the involvement of business and the media in sports promotion, and Japan's participation in the Olympics. **Japanese Sports Trivia Quiz** (openli)Japan's first professional baseball team was founded in 1921. The Development of Afrikaans Oct 13 2021 The development of Afrikaans is investigated within its sociohistorical context from the beginnings of the Afrikaans speech community in the 17th century to the present. Language contact in the loose and heterogeneous early Cape society gave rise to a divergent variety of Dutch later to be named Afrikaans. There was extensive borrowing as well as creolisation due to the strong presence of foreigners who had to acquire Dutch rapidly and under adverse social conditions. Changes in the linguistic core and functions of Afrikaans are set forth in a number of chapters.

The Glasgow Boys Apr 26 2020 At the end of the 19th century, a group of young Glasgow-based painters established an

international reputation for realism and plein-air landscape painting. Led by James Guthrie, John Lavery, Arthur Melville, George Henry, and E. A. Hornel, the Glasgow Boys, as they came to be known, shared an enthusiasm for strong, fresh colors, naturalistic subject matter, and a willingness to travel outside Scotland for subjects and settings. Their enthusiasm for naturalism was equaled only by their dislike of the Scottish arts establishment. In this widely acclaimed book, Roger Billcliffe describes not only the work of the individual artists but also their rejection by local collectors and officialdom before European success caused their work to become much in demand. First published 20 years ago, the book rekindled interest in the group and their work. Now redesigned with more than 200 illustrations in color, it introduces the collective to a new generation of readers and collectors.

A Concise History of the Russian Revolution Mar 18 2022 Richard Pipes's authoritative history of the "violent and disruptive acts" that created the first modern totalitarian regime portrays the crisis at the heart of the tsarist empire. Drawing on archival materials newly released in Russia, he chronicles the upheaval that began as a conservative revolt but was soon captured by messianic intellectuals intent not merely on reforming Russia but on remaking the world. He provides fresh accounts of the revolution's personalities and policies, crises, and cruelties, from the murder of the royal family through civil war, famine, and state terror. Brilliantly and persuasively, Pipes shows us why the resulting system owes less to the theories of Marx than it did to the character of Lenin and Russia's long authoritarian tradition. What ensues is a path-clearing work that is indispensable to any understanding of the events of the century.

Glasgow, the Making of a City Jun 08 2021

The Making of Urban Europe, 1000-1994 Sep 11 2021 Europe became a land of cities during the last millennium. The story told in this book begins with North Sea and Mediterranean traders sailing away from Dorestad and Amalfi, and with warrior kings building castles to fortify their conquests. It tells of the dynamism of textile towns in Flanders and Ireland. While London and Hamburg flourished by reaching out to the world and once vibrant Spanish cities slid into somnolence, a Russian urban network slowly grew to rival that of the West. Later as the tide of industrialization swept over Europe, the most intense urban striving and then settled back into the merchant cities and baroque capitals of an earlier era. By tracing the large-scale processes of social, economic, and political change within cities, as well as the evolving relationships between town and country and between city and city, the authors present an original synthesis of European urbanization within a global context. They divide their study into three time periods, making the early modern era much more than a mere transition from preindustrial to industrial economies. Through both general analyzes and incisive case studies, Hohenberg and Lees show how cities originated and what conditioned their early development and later growth. How did urban activity respond to demographic and technological changes? Did the social consequences of urban life begin degradation or inspire integration and cultural renewal? New analytical tools suggested by a systems view of urban relations yield a vivid dual picture of cities both as elements in a regional and national hierarchy of central places and also as junctions in a transnational network for the exchange of goods, information, and influence. A lucid text is supplemented by numerous maps, illustrations, figures, and tables, and by substantial bibliography. Both a general and a scholarly audience will find this book engrossing reading. The Origins of the Slavic Nations Nov 13 2021 This book documents developments in the countries of eastern Europe, including the rise of authoritarian tendencies in Russia and Belarus, as well as the victory of the democratic 'Orange Revolution' in Ukraine, and poses important questions about the origins of the East Slavic nations and the essential similarities or differences between their cultures. It traces the origins of the modern Russian, Ukrainian and Belarusian nations by focusing on pre-modern forms of group identity among the Eastern Slavs. It also challenges attempts to 'nationalize' the Rus' past on behalf of existing national projects, laying the groundwork for understanding of the pre-modern history of Russia, Ukraine and Belarus. The book covers the period from the Christianization of Kyivan Rus' in the tenth century to the reign of Peter I and his eighteenth-century successors, by which time the idea of nationalism had begun to influence the thinking of East Slavic elites.

The New Cambridge Medieval History: Volume 6, C.1300-c.1415 Mar 25 2020 The sixth volume of The New Cambridge Medieval History covers the fourteenth century, a period dominated by plague, other natural disasters and war which brought to an end three centuries of economic growth and cultural expansion in Christian Europe, but one which also saw important developments in government, religious and intellectual life, and new cultural and artistic patterns. Part I sets the scene by discussion of general themes in the theory and practice of government, religion, social and economic history, and culture. Part II deals with the individual histories of the states of western Europe; Part III with that of the Church at the time of the Avignon papacy and the Great Schism; and Part IV with eastern and northern Europe, Byzantium and the early Ottomans, giving particular attention to the social and economic relations with westerners and those of other civilisations in the Mediterranean.

Lenin, Stalin, and Hitler Jan 16 2022 A bold new accounting of the great social and political upheavals that enveloped Europe between 1914 and 1945—from the Russian Revolution through the Second World War. In *Lenin, Stalin, and Hitler*, acclaimed historian Robert Gellately focuses on the dominant powers of the time, the Soviet Union and Nazi Germany, but also analyzes the catastrophe of those years in an effort to uncover its political and ideological nature. Arguing that the tragedies endured by Europe were inextricably linked through the dictatorships of Lenin, Stalin, and Hitler, Gellately explains how the pursuit of their “utopian” ideals turned into dystopian nightmares. Dismantling the myth of Lenin as a relatively benevolent precursor to Hitler and Stalin and contrasting the divergent ways that Hitler and Stalin achieved their calamitous goals, Gellately creates in *Lenin, Stalin, and Hitler* a vital analysis of a critical period in modern history.

Reflections on Identity in Four African Cities Sep 23 2022 Identity has become the watchword of our times. In sub-Saharan Africa, this certainly appears to be true and for particular reasons. Africa is urbanising rapidly, cross-border migration streams are swelling and globalising influences sweep across the continent. Africa is also facing up to the challenge of nurturing emergent democracies in which citizens often feel torn between older traditional and newer national loyalties. Accordingly, collective identities are deeply coloured by recent urban as well as international experience and are squarely located within identity politics where reconciliation is required between state nation-building strategies and sub-national affiliations. They are also fundamentally shaped by the growing inequality and the poverty found on this continent. These themes are explored by an international set of scholars in two South African and two Francophone cities. The relative importance to urban residents of race, class and ethnicity but also of work, space and language are compared in these cities. This volume also includes a chapter investigating the emergence of a continental African identity. A recent report of the Office of the South African President claims that a strong national identity is emerging among its citizens, and that race and ethnicity are waning whilst a class identity is in the ascendance. The evidence and analyses within this volume serve to gauge the extent to which such claims ring true, in what everyone knows is a much more complex and shifting terrain of shared meanings than can ever be captured by such generalisations.

Johannesburg Jan 04 2021 *Johannesburg: The Elusive Metropolis* is a pioneering effort to insert South Africa's largest city into urban theory, on its own terms. Johannesburg is Africa's premier metropolis. Yet theories of urbanization have cast it as an emblem of irresolvable crisis, the spatial embodiment of unequal economic relations and segregationist policies, and a city that responds to but does not contribute to modernity on the global scale. Complicating and contesting such

characterizations, the contributors to this collection reassess classic theories of metropolitan modernity as they explore the experience of “city-ness” and urban life in post-apartheid South Africa. They portray Johannesburg as a polycentric and international city with a hybrid history that continually permeates the present. Turning its back on rigid rationalities of planning and racial separation, Johannesburg has become a place of intermingling and improvisation, a city that is fast developing its own brand of cosmopolitan culture. The volume’s essays include an investigation of representation and self-stylization in the city, an ethnographic examination of friction zones and practices of social reproduction in inner-city Johannesburg, and a discussion of the economic and literary relationship between Johannesburg and Maputo, Mozambique’s capital. One contributor considers how Johannesburg’s cosmopolitan sociability enabled the anticolonial projects of Mohandas Ghandi and Nelson Mandela. Journalists, artists, architects, writers, and scholars bring contemporary Johannesburg to life in ten short pieces, including reflections on music and megamalls, nightlife, built spaces, and life for foreigners in the city. Contributors: Arjun Appadurai, Carol A. Breckenridge, Lindsay Bremner, David Bunn, Fred de Vries, Nsizwa Dlamini, Mark Gevisser, Stefan Helgesson, Julia Hornberger, Jonathan Hyslop, Grace Khunou, Frédéric Le Marcis, Xavier Livermon, John Matshikiza, Achille Mbembe, Robert Muponde, Sarah Nuttall, Tom Odhiambo, Achal Prabhala, AbdouMaliq Simone
