The vaunted “business partnership model” has yet to be realized—and in tough economic times, when the training budget is often the first to be cut, training is on trial for its very existence. Using a courtroom trial as a metaphor, Training on Trial seeks to get to the truth about why training fails and puts the business partnership model to work for real. Readers on both sides of the “courtroom” will learn how to stop viewing training as a cost center, and bridge the gulf between what learning functions deliver and what business units need to execute their strategies. A thought-provoking read for trainers and business unit leaders alike, Training on Trial provides a new application of the Kirkpatrick Four-Level Evaluation Model and a multitude of tips and techniques that allow lessons learned to be put into action now. Unfortunately, so has the number of sports injuries. Why? More games, more competitions, and early specialization have all contributed, but so have our methods of training them. High pressure to perform along with an increased volume and intensity of training has combined to hamper young soccer athletes. They favor one side, overuse one muscle group, and do it over and over again. This is a recipe for injury. In Fit 2 Finish, Dr. LeBolt takes a sport scientist's eye to the training of our soccer-loving kids. She distills the gems of two decades of coaching and injury prevention training to display the methods that have worked to make her athletes safer, healthier and more effective, all while never losing the fun. Coaches at all levels can apply the Fit2Finish principles to every facet of their coaching: warm up, skills and drills, game play, post game routines, recovery, rest and preparing for the next game. Fit 2 Finish is the training manual and the game plan for the coach who's first objective is to

keep kids healthy and in the game. Yes, we must address the 'too much, too early' in today's youth sports, but while we go about changing the culture, the kids who are currently in it need saving. Today's coaches can start now by taking the Fit2Finish method straight to their practice field. If strong, balanced, healthy, high-performing athletes are what we're after, then Fit 2 Finish will get us there. A successful scientist won't continue to combine the same compounds and expect a different result. The Financial Times Guide to Using and Interpreting Company Accounts is designed for the non-accountant manager, investor or entrepreneur who is expected to have financial knowledge but may not have accounting training. Wendy McKenzie approaches the project via three key points: What information will I find in these accounts?; How do I analyse the accounts?; How can I use my analysis? Using publicly available actual accounts, the book begins by covering the 'numbers' from company accounts then moves on to information such as the financial review and then explains the logic of the accounts. To help with the interpreting of the numbers Wendy shows the reader how to understand issues such as cash flow, what this will tell you about a company, how to consider a competitor's accounts and how to perform ratio calculations to help with company analysis. This book illustrates hitherto unexamined connections between the present state of teacher education in the UK and past models of practice. It locates contemporary debates within ongoing historical tensions over what constitutes a sound and proper start to a career in teaching. Questions as to the constituents of a professional training, the essential skills, knowledge and attitudes desired of an effective teacher, the most suitable locus of expertise, the relative roles of participants, and the balance of theory and practice lie at the heart of this book. The book reviews apprenticeship and teach-exemplar models of training, expert-novice relationships, model and demonstration teaching, school-based practice and the elaboration of core pedagogical principles in the educational debate and research. These developments are assessed against recent initiatives in ITT, such as partnership models of ITT, school-based mentoring, advanced skills teaching, training schools, a standards-driven model of assessment for student teachers and models of effective teaching. Central to the book is the concept of the power to teach. By reclaiming this notion, the book offers challenging new perspectives on current policy and practice in teacher education today and adds to existing histories of teacher training of the past.
