"Linotype Manual" by Various. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format. Many readers undoubtedly have run crosscut saws in the past, and a lot of you know the difference between a good running saw and a poorly filed one. A poorly filed saw deserves the name I have often heard attributed to it... "misery whip." A well-filed saw, however, is efficient and can be satisfying to use. Only in recent years was a chain saw developed that could beat a topnotch buckler in a contest. There is a record of a 32-inch Douglas-fir log cut in 1 minute 26²/₅ seconds by one buckler. Saw filers of any quality are becoming very difficult—if not impossible—to find. This manual was written so those of you who use crosscut saws can maintain them yourselves and overcome some of the misery of that ol' whip. The manual provides a basic description of how and why a crosscut saw works, tips on building a saw vise, and some experience-tested methods as a guide for achieving a well-running saw. Only saws having raker teeth are discussed, because they are by far the most common saws found today. This includes lance, perforated-lance, and champion tooth patterns. 1926/28- contains statistical tabulations relative to the public schools of the state (Division of Research and Statistics). There is nothing like catching a fish with a fly that you have tied. You have created something that has fooled a fish. The satisfaction of the time spent behind the vise, binding feathers, and fur with thread on a hook to look like something that the fish wants. We all started walking into a fly shop not knowing what to buy and thinking wow I might be able to tie that and save money doing it myself. Yes that could be a driving factor but personally once I am behind the vise all other thoughts leave me, it is just me and the vise, nothing else. I can now create and become an artist at the vise. Sometimes I feel fly tying is more important than going out fishing. Author and Master Fly Tier, Eric Leiser once told me that "They say the time spent fishing is not deducted from a man's allotted time on earth" So the same must be said for the time at the vise. So I say to all you fly tiers. "To those golden moments we spend at the vise or on the stream. Here is to a long lifetime of Golden Moments" Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.
