A Different Mirror for Young People Jul 09 2021 A longtime professor of Ethnic Studies at the University of California at Berkeley, Ronald Takaki was recognized as one of the foremost scholars of American ethnic history and diversity. When the first edition of *A Different Mirror* was published in 1993, *Publishers Weekly* called it "a brilliant revisionist history of America that is likely to become a classic of multicultural studies" and named it one of the ten best books of the year. Now Rebecca Stefoff, who adapted Howard Zinn's best-selling *A People's History of the United States* for younger readers, turns the updated 2008 edition of Takaki's multicultural masterwork into *A Different Mirror for Young People*. Drawing on Takaki's vast array of primary sources, and staying true to his own words whenever possible, *A Different Mirror for Young People* brings ethnic history alive through the words of people, including teenagers, who recorded their experiences in letters, diaries, and poems. Like Zinn's *A People's History*, Takaki's *A Different Mirror* offers a rich and rewarding "people's view" perspective on the American story.

What Is a Nation? and Other Political Writings Feb 16 2022 Ernest Renan was one of the leading lights of the Parisian intellectual scene in the second half of the nineteenth century. A philologist, historian, and biblical scholar, he was a prominent voice of French liberalism and secularism. Today most familiar in the English-speaking world for his 1882 lecture "What Is a Nation?" and its definition of a nation as an "everyday plebiscite," Renan was a major figure in the debates surrounding the Franco-Prussian War, the Paris Commune, and the birth of the Third Republic and had a profound influence on thinkers across the political spectrum who grappled with the problem of authority and social organization in the new world wrought by the forces of modernization. *What Is a Nation? and Other Political Writings* is the first English-language anthology of Renan's political thought. Offering a broad selection of Renan's writings from several periods of his public life, most previously untranslated, it restores Renan to his place as one of

France's major liberal thinkers and gives vital critical context to his views on nationalism. The anthology illuminates the characteristics that distinguished nineteenth-century French liberalism from its English and American counterparts as well as the more controversial parts of Renan's legacy, including his analysis of colonial expansion, his views on Islam and Judaism, and the role of race in his thought. The volume contains a critical introduction to Renan's life and work as well as detailed annotations that assist in recovering the wealth and complexity of his thought.

Disasters and History Feb 04 2021 Disasters and History offers the first comprehensive historical overview of hazards and disasters. Drawing on a range of case studies, including the Black Death, the Lisbon earthquake of 1755 and the Fukushima disaster, the authors examine how societies dealt with shocks and hazards and their potentially disastrous outcomes. They reveal the ways in which the consequences and outcomes of these disasters varied widely not only between societies but also

within the same societies according to social groups, ethnicity and gender. They also demonstrate how studying past disasters, including earthquakes, droughts, floods and epidemics, can provide a lens through which to understand the social, economic and political functioning of past societies and reveal features of a society which may otherwise remain hidden from view. This title is also available as Open Access on Cambridge Core.

Food Heritage and Nationalism in Europe Apr 18 2022 Food Heritage and Nationalism in Europe contends that food is a fundamental element of heritage, and a particularly important one in times of crisis. Arguing that food, taste, cuisine and gastronomy are crucial markers of identity that are inherently connected to constructions of place, tradition and the past, the book demonstrates how they play a role in intangible, as well as tangible, heritage. Featuring contributions from experts working across Europe and beyond, and adopting a strong historical and transnational perspective, the book examines the various ways in which food can be understood and used as heritage. Including explorations of imperial spaces, migrations and diasporas; the role of commercialisation processes, and institutional practices within political and cultural domains, this volume considers all aspects of this complex issue. Arguing that the various European cuisines are the result of exchanges, hybridities and complex historical processes, Porciani and the chapter authors offer up a new way of deconstructing banal nationalism and of moving away from the idea of static identities. Suggesting a new and different approach to the idea of so-called national cuisines, Food Heritage and Nationalism in Europe will be a compelling read for academic audiences in museum and heritage studies, cultural and food studies, anthropology and history.

Understanding History Jun 20 2022 Has any question about the historical past ever been finally answered? Of course there is much disagreement among professional historians about what happened in the past and how to explain it. But this incisive study goes one step further and brings into question the very ability of historians to gather and communicate genuine knowledge about the past. *Understanding History* applies this general question from the philosophy of history to economic

history of American slaveholders. Do we understand the American slaveholders? Has the last word on the subject been said? Both the alleged "profitability" of slavery and the purported causes of the American Civil War are philosophically analyzed. Traditional narrative history and econometric history are examined and compared, and their different philosophical assumptions made explicit. The problem of justifying historical methodologies is first set in the wider context of the philosophical problem of knowledge, then lucidly explained and resolved along pragmatic lines. The novelty of Gorman's approach lies in its comparison of narrative with econometric history, its analysis of empathetic understanding in terms of cost-benefit analysis, and its elucidation of the metaphysical presuppositions of empiricism. It stands out especially for the clarity, rigor, and simplicity of its arguments.

It examines the long history of globalization of foods as well as the political, social, and environmental implications of our changing relationship with food, showing how hunger and taste have been driving forces in human history. Including numerous case studies from diverse societies and periods, *Food in World History* explores such questions as: What social factors

have historically influenced culinary globalization? How did early modern plantations establish patterns for modern industrial food production? Were eighteenth-century food riots comparable to contemporary social movements around food? Did Italian and Chinese migrant cooks sacrifice authenticity to gain social acceptance in the Americas? Have genetically modified foods fulfilled the promises made by proponents? This new edition includes expanded discussions of gender and the family, indigeneity, and the politics of food. Expanded chapters on contemporary food systems and culinary pluralism examine debates over the concentration of corporate control over seeds and marketing, authenticity and exoticism within the culinary tourism industry, and the impact of social media on restaurants and home cooks.

An Environmental History of Latin America May 27 2020 A narration of the mutually mortal historical contest between humans and nature in Latin America. Covering a period that begins with Amerindian civilizations and concludes in the region's present urban agglomerations, the work offers an original synthesis of the current scholarship on Latin America's environmental history and argues that tropical nature played a central role in shaping the region's historical development. Human attitudes, populations, and appetites, from Aztec cannibalism to more contemporary forms of conspicuous consumption, figure prominently in the story. However, characters such as hookworms, whales, hurricanes, bananas, dirt, butterflies, guano, and fungi make more than cameo appearances. Recent scholarship has overturned many of our egocentric assumptions about humanity's role in history. Seeing Latin America's environmental past from the perspective of many centuries illustrates that human civilizations, ancient and modern, have been simultaneously more powerful and more vulnerable than previously thought.

In the Name of History May 07 2021 In this book Joan Wallach Scott discusses the role history has played as an arbiter of right and wrong and of those who claim to act in its name—"in the name of history." Scott investigates three different instances in which repudiation of the past was conceived as a way to a better future: the International Military Tribunal at Nuremberg in 1946, the South African Truth and Reconciliation Commission in 1996, and the ongoing movement for reparations for slavery in the United States. Scott shows how in these cases history was not only used to explain the past but to produce a particular future. Yet both past and future were subject to the political realities of their time and defined in terms of moral absolutes, often leading to deep contradictions.

These three instances demonstrate that history is not an impartial truth, rather its very meaning is constructed by those who act in its name.

The Fingerprint Mar 25 2020 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.
